Arizona Community Oral Health Profiles

Introduction--Understanding the Information/How to Use these Profiles

Thank you for your interest in your community and state's oral health!
We hope that the Arizona Community Oral Health Profiles will promote further interest and effort in addressing the oral health needs of Arizona residents.

The Arizona Department of Health Services (ADHS), Office of Oral Health compiled the Arizona Community Oral Health Profiles from several sources having oral health information (see below). The information was compiled for 173 communities in Arizona. The section on each community also contains oral health information at the county and state level.

Users of the Arizona Community Oral Health Profiles may be:

- Community members and consumers of health care
- Elected state and local officials
- Health care professionals
- Community advocates and organizers, including coalitions

Information in the Arizona Community Oral Health Profiles can be used to:

- Determine an overall level of oral health for a specific area
- Provide information as part of a needs assessment or a planning process
- Discover oral health strengths, needs, and problems
- Bring community members together around issues of interest
- Identify changes over time
- To help allocate resources among alternate interventions
- Establish priorities among oral health problems or interventions
- Evaluate interventions directly or indirectly

Important! When reviewing the data...
The purpose of the Community Oral Health Profiles is not to validate data from each source, but to compile and present available information on oral health that could assist people in understanding and working with oral health issues. In some cases, data may be available only at the state level, or may not be representative of specific populations (for example, children in a particular school district). Please read the footnotes carefully to understand what the data does and does not represent. Please call the Arizona Department of Health Services, Office of Oral Health at 602-542-1866 with any questions.

The Arizona Department of Health Services (ADHS), Office of Oral Health wishes to acknowledge use of the following data sources and thank the individuals who provided the information used in the Arizona Community Oral Health Profiles:
U. S. Census 2000; Special Olympics, Special Smiles; ADHS Arizona Behavioral Risk Factor Surveillance System; ADHS Office of Health Registries, Arizona Cancer Registry and Birth Defects Monitoring Program; Arizona Department of Health Services Tobacco Education and Prevention Program; Arizona Board of Dental Examiners; and the Arizona Department of Health Services, Office of Health Systems Development.

Compiled by Julia K. Wacloff RDH, MS and Judy A. White RDH, MPH, with special assistance from Prudence Nelson. Joyce Flieger RDH, MPH Office Chief, Arizona Department of Health Services, Division of Public Health Services, Office of Oral Health, 2005.
