- Gila River Indian Community,
- Pascua Yaqui Tribe and
- White Mountain Apache Tribe

**Tribal Contractors:**
- Navajo Nation and
- Colorado River Indian Tribes
T/RBHA MAP

[Map of Arizona showing various GSAs and tribal areas, including NARBHA, GSA 1, GSA 2, GSA 3, GSA 4, GSA 5, GSA 6, and tribal territories such as the Navajo Nation and the Gila River Indian Community.]
Purpose

The purpose of this project is to establish a service package which ensures that a proven comprehensive crisis system is in place that accommodates the entitled services of the Title XIX population; while sustaining necessary crisis services for the Non-Title XIX population based on the current and proposed funding reductions.
Based on the current and anticipated reduction in state appropriated funds, ADHS/DBHS is working to establish a service package which ensures that a proven comprehensive crisis system is in place that accommodates the entitled services of the Title XIX population; while sustaining necessary crisis services for the Non-Title XIX population.

- The purpose of the behavioral health crisis system is to:
- *engage individuals experiencing a crisis situation early,*
- *stabilize within the community whenever possible,*
- *reduce unnecessary incarceration and burden on law enforcement,* and
- *decrease avoidable emergency room utilization.*
Process

1. Define Crisis Services
2. Articulate the targeted outcome of crisis services
3. Establish a crisis service package for all Non-Title XIX recipients
4. Establish a crisis service package for all Title XIX recipients
5. Establish monitoring mechanisms to measure outcomes and fiscal responsibility
6. Think outside the box!
Primary Issues

• Nearly all of the RBHAs’ FY 2010 Non-Title XIX/Non-SMI/Non-Block Grant funds were allocated to crisis services prior to the most recent non-XIX funding cuts.

• Crisis services are among the most costly services provided, yet there is minimal oversight or ability to demonstrate effectiveness.

• An additional round of funding cuts is expected in the near future.
Definition: Crisis

Crisis: A temporary state of upset and disorganization, characterized by an inability to cope with a particular situation using customary methods of problem solving, and by the potential for a radically positive or negative outcome. [Slaikeu, 1984]

- **Crisis**: An acute response to a critical incident wherein:
  - Psychological homeostasis is disrupted.
  - One’s usual coping mechanisms have failed.
  - There is evidence of human distress and/or dysfunction
    - (Everly, G.S., 2001)
Definition: Crisis Services

- **Crisis Services**: immediate and unscheduled behavioral health services provided: 
  (a) In response to an individual’s behavioral health issue to prevent imminent harm or to stabilize or resolve an acute behavioral health issue; and (b) At a Level 1 psychiatric acute hospital or a Level 1 sub-acute agency. [AAC R9-20-101(37)]

- **Crisis Services**: A collection of integrated services that are available 24 hours a day, seven days a week to respond to and assist individuals in a mental health emergency. These services are provided to persons who are in an emergency condition or crisis situation. The person’s need may be such that they require treatment to reduce the likelihood of death, harm to themselves or someone else, serious injury or deterioration of a physical condition on a major setback in their condition or illness. Examples of these service include but are not limited to:
  - Crisis Hotlines
  - Crisis residential and respite services
  - Crisis mobile outreach
  - Short-term crisis counseling
  - Crisis walk-in clinics
  - Crisis stabilization services

  -(Technical Assistance Collaborative, April 2005)
**Definition: Crisis Intervention**

- **Crisis Intervention (DBHS CSG):** Services provided to a person for the purpose of stabilizing or preventing a sudden, unanticipated, or potentially deleterious BH condition, episode or behavior.

- **Crisis Intervention (Everly, 2001):** The provision of acute psychological support the goals of which are:
  - Stabilization of the symptoms/signs of distress
  - Mitigation of the symptoms/signs of distress
  - Restoration of functional capabilities
  - Referral to follow-up by someone representing some higher level of support/care

- **Crisis Intervention (CARF):** CI programs offer services aimed at the assessment and immediate stabilization of acute symptoms of mental illness, alcohol and other drug abuse, and emotional distress or in response to acts of DV or abuse/neglect. CI services consist of mobile response, walk-in centers, or other means of face-to-face assessments and telephone interventions.
Crisis Stabilization (CARF): CS programs are organized and staffed to provide the availability of overnight residential services 24/7 for a limited duration to:

– stabilize acute psychiatric or behavioral symptoms,
– evaluate treatment needs, and
– develop plans to meet the needs of the persons served.

Often CS programs are used as a preemptive measure to deter unnecessary inpatient hospitalization.
DBHS Covered Services Guide

Crisis Services may include*:

- Screening
- Assessment
- Evaluation
- Counseling & therapy
- Medication services
- Medication management
- Case management
- Skills Training
- Self-Help/Peer Services
- Transportation
- Adtl. Support Services
- Psychiatric; room and board
- Detoxification; room and board
- Laboratory Services
- Radiology
- Medical Imaging

BH Svcs. Guide
ADHS/DBHS Crisis System Entry Points

- Outpatient Walk-in/On-Call (Enrolled Recipients)
- Hospital Rapid Response (Maricopa Only)
- Mobile Crisis Team
- Detox/PRC/A6 Walk-In
- 1st Responder (Police, Fire, etc.)
- COT/COE
- Emergency Department/Inpatient Hospital
- Crisis Phone

Note: ADHS/DBHS Crisis System Entry Points.
Initial Contact w/ Crisis Entry Points

Screening/Triage

Current MH/SA issue?
- Yes
  - Is the current encounter a crisis situation?
    - Yes
      - Is the recipient Currently enrolled?
        - Yes
          - Triage w/ Primary Service Provider
        - No
          - Is the recipient eligible? (E.g. TXIX/XXI; BG PP)
            - Yes
              - Refer recipient to In-network intake agency
            - No
              - Referral to Appropriate Community-based Services
    - No
      - Crisis Stabilization
  - No
    - Crisis Intervention

Referral to Appropriate Community-based Services
What is the targeted outcome?

- Decrease suicide/homicide rate among service recipients?
- Reduce hospital ED utilization?
- Reduce wait times in EDs?
- Reduce recidivism rates at EDs and crisis service providers?
- Reduce unnecessary incarceration and detainment?
- Reduce non-acute utilization of Level I beds?
- Reduce COT/COE?
- Improve continuity of care by coordinating with community-based supports and services?
- Return recipient to community as quickly as clinically possible?
How will we address the following?

- Walk-Ins/non-enrolled individuals
- Police/Fire Dept./1st Responder referrals
- COT/COE
- DTS/DTO
- Enrolled recipients presenting in crisis
- Repeat users of crisis system
- Medication Services (refills & crisis formulary)

  – 5% referred from Little Colorado Medical Center
  – 2.78% diverted in lieu of Little Colorado Med. Ctr.
  – 14% referred from police and fire departments
  – 13% transported by police department

• Peer Support Outreach
  – 58 individuals were engaged and/or transported by peer support specialists within the community
Crisis Services & 1st Responders
What benefit does the current crisis system provide?

• ‘No Wrong Door’
  – Maricopa County Crisis Providers have fully embraced this philosophy

• Timeliness of Response
  – Mobile Team Response Times
  – 23-hour stabilization facility wait times
    • UPC, PRC-W, Central City & EVAC

Paraphrased from 1st Responder Interviews 2009 & 2010
What areas could use improvement?

- Better collaboration between ACT/IRT Teams and the crisis system
- Enhance collaboration between crisis providers and community-based and faith-based groups
What impact would a restricted crisis system have?

• If the quality and responsiveness of the crisis system does not change, then the close collaboration with 1st responders will continue as well.

• If the above cannot be maintained, there would be a complete breakdown in 1st responders’ willingness to refer for crisis intervention.

Paraphrased from 1st Responder Interviews 2009 & 2010
An Example of Impact

• In 2006 the Maricopa County RBHA eliminated 2 mobile crisis teams from their network.
• Over the next 6 months the following occurred:
  – The Mobile Team denial rate (refuse to respond) went from 5% to 22%
  – A 50% increase in crisis line referrals to 911 dispatch

Paraphrased from 1st Responder Interviews 2009 & 2010
What impact would the elimination of a crisis system have?

• Jail or emergency departments will be the primary disposition.
  – When police request a mobile team the police officer feels that the individual is at risk and must be either professionally stabilized or removed from the community. A removal of mobile crisis services and stabilization facilities will force police officers to take individuals to jail or an emergency department.

• There will be an increase in 1st responders relocating individuals in a crisis episode to another jurisdiction to avoid further involvement.

• There will be a rapid increase in 1st responder initiated petitions

Paraphrased from 1st Responder Interviews 2009 & 2010
An Example of Impact

• Maricopa County has a daily average of 8,000-9,000 incarcerated individuals.
  – 66% (or 5,280) have an identified substance use disorder
  – 20% (or 1,600) are receiving psychotropic medications

• Police refer roughly 3,000/year to mobile teams
  – Based on 50% of individuals referred by police would otherwise be incarcerated, there would be an increase of 1,500 individuals in Maricopa County alone.
What are the most important crisis services, in order, for 1\textsuperscript{st} responders?

1. Front Door Access – Crisis Stabilization
   - If there is no alternative to EDs and jail, the 1\textsuperscript{st} responders will not bother utilizing crisis phone or mobile teams.

2. Crisis Phones
   - A majority of the 10,000/month crisis calls would likely go to 911 dispatch; which would cripple the 911 emergency system.

3. Crisis Mobile Teams
   - Regardless of best practices, if it is easier or quicker for a 1\textsuperscript{st} responder to take an individual to an ED or to jail, they will stop utilizing crisis services.

Paraphrased from 1\textsuperscript{st} Responder Interviews 2009 & 2010
Arizona Suicide Trends
Suicide Mortality Rates for Arizona & United States
1998-2008
Suicide Prevention Strategic Plan
FY 2010 - 2015

• Goal: Reduce the rate of completed suicide to 10 per 100,000, by 2015.
  – Objective A: Increase gatekeeper comfort with intervention & referrals by 5%
  – Objective B: Increase life satisfaction to 10% among ADHS program participants as measured by the end of FY 2010
  – Objective C: Increase parent child bonding among DBHS prevention program participants by 5% by the end of FY 2010
Garrett Lee Smith Grant

• Youth Suicide Prevention and Early Intervention
• 3-Year Grant, ending September 29, 2012
• $1.5 million award ($500,000/year)
• The purpose of Arizona’s Suicide Prevention Project is to reduce the rate of completed suicide among Arizona youth, ages 15-24.
• Activities Include:
  – developing the capacity of Lesbian, Gay, Bisexual, Transgender, and Questioning (LGBTQ) organizations to incorporate evidence based strategies into their programs.
  – provide training in gatekeeping and climate improvement for education, behavioral health and juvenile corrections.

*Facility-based Crisis Services Include: (1) 23-hour stabilization, (2) detoxification, (3) Rural Substance Abuse Transitional Centers, and (4) Level I sub-acute/hospitalization (solely for the purpose of continued crisis stabilization)
ADHS/DBHS Funding Proposal Rationale

• Utilizing the 9/23/2009 Crisis Services Survey, this scenario preserves the full allocation of Crisis Phone and Mobile Crisis Services, and uses the same distribution percentages to separate out the remainder of funds for Facility-Based Crisis Services.

• By combining 23-hour, Rural SA Transitional Centers and Inpatient Stabilization into 1 category, each RBHA can use their discretion as to how best allocate these remaining dollars based on geographic, population and resource needs.
Out of the Box Thinking & Possible Solutions
How do we start?

- Intensive Community Education
- Community-based Resource Development
- Policy clarifications
- Contract revisions
- Billing/Claims Restriction Enforcement
- Funding adjustments
- Block Grant reallocation
The following are strategies that ADHS/DBHS is exploring. No formal decisions have been made, and further research is necessary.
Policy Clarifications

• Covered Services Guide
  – Crisis Intervention Services (Mobile) [pg. 128]
    • Wherever possible, the two-person crisis team should consist of a behavioral health professional and a behavioral health technician. In some situations (e.g., the safety of staff and control of the environment are not primary concerns, such as in hospitals, schools, residential settings) it may only be necessary to send a single individual out to intervene. Depending on the acuity of the person, the crisis intervention services may be provided by either a qualified behavioral health professional or behavioral health technician.

  – Define these two phrases

  – By clearly permitting BHTs to provide mobile crisis services on 1- and 2-person teams would be a huge cost-saving measure. (RBHAs are currently interpreting this differently)
Billing Restrictions/Limitations

• Mobile Crisis Services
  – Exploration into possibly converting the 15-minute unit into a per-episode billing unit.

• Potentially cap the benefit for consecutive days in a facility-based crisis facility.
  – (E.g. no payment beyond 4-days)
Establish Admission Criteria

• Admission Criteria (ALL must be met)

1. The individual is determined to be in crisis per [insert crisis criteria]
2. The individual has an identified issue or goal that cannot be resolved at this point in time with a less restrictive intervention.
Brief Crisis Intervention

• Brief Crisis Intervention Process:
  – Intervene Immediately
  – Stabilize
  – Facilitate Understanding
  – Focus on Problem-Solving
  – Encourage Self-Reliance

• Key Feature:
  – No Follow-Up
Establish Discharge Criteria

• Discharge Criteria (ANY can be met)

1. Identified crisis is resolved
2. Recipient is referred to a higher level of care
3. Recipient is referred to community resources outside the T/RBHA network
Timeliness of Service

• Potentially implement the 3 tiered response timeframes for adult population.
  – Immediate (within 2 hours)
    • For use with Crisis Stabilization and Mobile Crisis Services
  – Urgent (within 24 hours)
    • For individuals who appear in need of intervention to prevent a crisis situation (E.g. medication, etc.)
  – Routine (within 7 days or 23 days)
  – What role should ACT teams and outpatient clinics have in crisis response?
CPS Rapid Response

• Explore the possibility of transitioning this program to an office or community-based service provided within 72-hours from the point of referral
  – Similar timeframe to the Families FIRST program
Questions or Comments?
