**SUBSTANCE RELATED DISORDERS (con't)****C. Relapse and Recovery Environment****1. Continued Use/Relapse Potential**

1(a) Assess and describe the level of structure, supervision, safety and medication needed by the person in order to avoid/limit continued substance use or a relapse event (e.g., Will you drink/use when you leave here today? Have you ever abstained on your own before? When did that occur? How did you do that?) \_\_\_\_\_

1(b) Based on this assessment, indicate below which statement best describes the person:

- Can Independently Abstain**
- Need for Encouragement:** Person needs encouragement not to use; has fair self-management and relapse coping skills.
- Need for Supervision:** Impaired recognition or understanding of relapse issues, but able to self-manage with prompting.
- Need for Structure / Supervision:** Little recognition or understanding of relapse issues; no/poor skills to cope with and interrupt addiction problems or to avoid/limit relapse; no imminent danger.
- Safety Risk:** Person is unable to prevent relapse; continued use places person or others in imminent danger.

**2. Recovery Environment**

2(a) Assess and describe the level of support for recovery in the person's home, community and immediate surroundings, and the level of services and supports necessary for the person to cope with a negative environment (e.g., How does the person currently cope with his/her environment? Are these strategies effective? Is the person willing to learn more effective coping skills? Does the person need an alternative environment?) \_\_\_\_\_

2(b) Based on this assessment, indicate below which statement best describes the person:

- Environment is supportive of recovery.
- Environment contains triggers that exposes person to continued use (job, friends, school, neighborhood); able to cope most of the time.
- Person is living in an unsupportive environment; difficult/unable to cope even with clinical support.
- Person is living in an environment that would hinder recovery (shelter, non-therapeutic residential setting, homeless).
- Person is living with active users or in an abusive situation.

**Responses in this section combined with information from other areas of the core assessment should be used to make a differential diagnosis when completing the Clinical Formulation and Diagnoses Section.**

**NEXT STEPS/INTERIM SERVICE PLAN**

1. Identify specific people who may be supportive and helpful and who should be invited to be part of the person’s ongoing Team, including phone numbers and action to be taken: \_\_\_\_\_

2. Identify any additional documentation (e.g., medical records, IEP, probation report), which needs to be collected to assist in the ongoing assessment and service planning including the individuals and/or agencies and action to be taken to obtain this information: \_\_\_\_\_

3. Identify who the person and/or family/legal guardian/significant other should contact if the person needs immediate assistance before the next appointment: \_\_\_\_\_

4. **Interim Service Plan.** Based on the person’s presenting issues, your impressions and the preferences of the person and his/her family/legal guardian/significant other, describe in the Interim Service Plan on the next page recommended next steps (e.g., formation of Team, response to immediate risks and needs of the person, further assessment). Additionally, this Interim Service Plan should include:

- Any immediate next steps to be taken by the person and/or family/legal guardian/significant others.
- Referral to the person’s primary care physician, if *physical health problems* have been identified.
- Additional considerations for urgent response for children removed by Child Protective Services (see shaded box below).

Assessors may also add a goal statement, if appropriate.

For urgent response for **children removed by Child Protective Services**, the assessor must include as part of the recommended next steps/interim service plan, identification of:

1. Actions needed to be taken immediately to mitigate the effects of the removal itself;
2. Supports and services the child’s caregivers may need to meet the child’s needs; and
3. A plan to ensure that even asymptomatic children are reassessed and observed for surfacing behavioral health needs within at least the next 23 days (or sooner if indicated).

The assessor may also provide any input he/she has regarding the types and amount/frequency of contact (e.g., visits, phone calls, e-mail), the child should have with parents, siblings, relatives and other individuals important to the child.
