3.13.1 Introduction

The Arizona Department of Health Services/Division of Behavioral Health Services (ADHS/DBHS) system of care offers an assortment of covered behavioral health services to meet the individual needs of persons seeking behavioral health services. The continuum of available services includes supervised and semi-supervised facility-based care, an array of treatment services and support services. Covered behavioral health services assist and encourage each person to achieve and maintain the highest possible level of health and self-sufficiency. The provision of covered behavioral health services is contingent on each person's current eligibility status and, for some persons, may be based on available funding.
