

Mission Statement

The Vocational Training Program provides the patients at ASH the opportunity to work and be paid for their time, allow their **skill** sets to shine and to help produce funds for the hospital. It provides the patients with the **opportunity** to develop the skills, such as timeliness, organization and the following directions abilities necessary to hold a job in the **community**.

Additionally, the VTP strives to further talents related to patient **goals** and expand on prior knowledge to add meaning to the work **experience**. We have patients who specialize in graphic design, knitting, woodworking, recycling, painting and even throwing beautiful **works of art** on the potter's wheel!

Therapeutic Vocational Training Program

At the Arizona State Hospital

*Work joyfully and peacefully,
knowing that right thoughts
and right efforts will
inevitably bring about right
results.*
- James Allen
