Arizona-Sonora Health Resource Guide

This Arizona-Sonora Health Inventory and Resource Guide was created to inform border residents and health providers of the services that are available in their local area and binationally throughout the region. The inventory/resource guide is a tool that is considered a work in progress. It will continue to grow and expand as it becomes more accessible to the public through multiple forms of media. For instance, it will be available online through the Arizona Department of Health–Office of Border Health website, through cd-rom, and in hard copy. Through these forms of distribution, we hope participants, non-participants and other health services will use this Guide as a powerful promotional and collaborative tool, which can link their programs and community members to service agencies throughout the Arizona-Sonora border.

Although the printed version does include the following information, the on-line version and CD-version will include interactive Internet links to:

- Arizona-Sonora border health and social service agencies
- Agency and Program Contact e-mail addresses
- Local, state, national and international funding agencies currently supporting activities along the Arizona-Sonora Border
- Sister City epidemiological graphs of the major Healthy Gente/Frontera Saludable 2010 objectives
- Overviews of each Arizona county and Sonoran Municipio
- Comprehensive key word search capability

The health inventory resource guide went through multiple stages of development before finally being assembled. The development of the guide/handbook as a finished product consisted of three major steps. The first was to create a list of agencies or organizations (including locations and phone numbers) that have worked on specific health-related projects in the Arizona-Sonora border region. The second step, and the most research-oriented activity, involved developing, drafting, and editing a bilingual questionnaire in English and in Spanish to obtain specific information (e.g., type of agency, activities, target populations, health problems or needs, projects, objectives, funding sources, etc) about each agency or organization. The final step was to create and establish a database using the information gathered from the interviews and questionnaires. The final steps prior to the completion of the project included hosting community and agency focus groups as to ensure the Guide as user friendly in such things as the language used in the text, the organization of the information, and the ability to navigate through the guide without difficulty or confusion. The comments and suggestions made during the binational focus groups information will guide our formatting and follow up for the Second Edition!

Healthy Gente-Healthy Border 2010 Sonora Border Summary

What is Healthy Gente—Healthy Border 2010?

Healthy Gente outlines a health promotion and disease prevention agenda through the year 2010 for the communities that border the United States and Mexico. Healthy Gente draws on the national health objectives defined in Healthy People 2010, identifying 25 of the most important objectives for the distinct needs and concerns of the border. Healthy Gente aims to develop preventive goals, objectives and strategies, resulting in a strategic management tool that will be used by the four U.S. border states, and ten Mexican states, their border communities and many other public- and private-sector partners.

Who is developing Healthy Gente– Healthy Border 2010?

The idea of establishing health objectives for the border region was an outgrowth of preparatory work for the U.S.-Mexico Border Health Commission, a group designed to serve as a forum for addressing critical health issues in the border region. Four principles were used to guide the selection of objectives: a) they should address key health issues on the border; b) they should be limited in number; c) To the extent possible, the objectives should be measurable; and d) they should be compatible with federal and state objectives. The goal was to develop a set of objectives that will resonate with the border population, will be easily understood, and will help to coordinate public and private health programs.

Within each U.S. and Mexican border state, the Healthy Gente program will be implemented in border communities by a consortium of state and local organizations, including the state health department, border health office, local health departments, private health programs and private businesses.

What are the goals of Health Gente –Healthy Border 2010?

- Increase quality and years of healthy life
- Eliminate health disparities

What objectives are included in the Healthy Gente program?

The 25 Healthy Gente objectives cover the majority of the focus areas set out in the list of national health objectives, Healthy People 2010. The Healthy Gente objectives are all measurable objectives, however information for some of these measures is not yet available for the border communities. The objectives are presented and ordered according to the focus areas used for the national objective.

In this section, various Sonoran Healthy Gente-Healthy Border 2010 Objectives will be presented. For easy reference, bar graphs are used to describe mortality and morbidity rates for 12 of the 25 Objectives. Sonoran Municipalities include :Agua Prieta, Naco, Nogales, Puerto Peñasco and San Luis Rio Colorado. Please see the Arizona Section for information regarding the four US Border Counties of : Pima, Cochise, Santa Cruz and Yuma.

Healthy Gente—Healthy Border 2010 Sonora Border Summary

Healthy Gente—Healthy Border 2010 Objectives

Topic Area	Year 2010 Objectives	
	Mexico	United States
Access to Care	Maintain at less than 5% the population without access to basic health services	Reduce by 25 % the proportion of persons lacking access to a primary care provider I underserved areas.
Cancer	Reduce the breast cancer rate for women by 20 %.	Reduce the breast cancer rate for women by 20 %.
	Reduce the cervical cancer death rate for women by 20 %.	Reduce the cervical cancer death rate for women by 30 %.
Diabetes	Reduce diabetes death rate by 10 %.	Reduce diabetes death rate by 10 %.
	Maintain the current level of hospital admissions for diabetes.	Reduce the diabetes morbidity by 25%
Environmental Health	Household connection objective not established.	Reduce to zero the proportion of households without complete bathroom facilities.
	Maintain the current level of hospitalization rates for pesticide poisoning.	Reduce to 25% the hospital admissions for acute pesticide poisoning.
HIV/AIDS	Maintain HIV incidence at 2000 level or below.	Reduce the Incidence of HIV cases by 50%.
Immunization and Infectious Disease	Reduce the incidence of hepatitis A and B cases by 50 %.	Reduce the incidence of hepatitis A and B cases by 50 %.
	Reduce the incidence of tuberculosis by 10%.	Reduce the incidence of tuberculosis by 10%.
	Maintain immunization coverage rate of 95% or higher for children under age 1 and age 1-4.	Achieve and maintain immunization coverage rate of 90% for children 19-35 months.
Injury Prevention	Reduce the motor vehicle crash death rate 20 %.	Reduce the motor vehicle crash death rate 25 %.
	Reduce the childhood (under age 5) death rate due to unintentional injuries by 50 %.	Reduce the childhood (under age 5) death rate due to unintentional injuries by 30 %.
Maternal, Infant and Child Health	Reduce the infant mortality rate due to all causes by 50 %.	Reduce the infant mortality rate due to all causes by 15 %.
	Reduce the infant mortality rate from birth defects by 50 %.	Reduce the infant mortality rate from birth defects by 30 %.
	Raise initiation of beginning prenatal care in the first trimester to 70 %.	Increase the proportion of women beginning prenatal care in the first trimester to 85 %.
	Reduce the pregnancy rate among 10-19 year olds by 20 %.	Reduce the pregnancy rate among 15-17 year olds by 33 %.
Mental Health	Reduce the suicide mortality rate by 25%.	Reduce the suicide mortality rate by 15%.
Oral Health	Ensure that 25% of population uses oral care services annually.	Raise the proportion of using oral care to 75% annually.
Respiratory Diseases	Maintain hospital admission rate for asthma at current level.	Reduce hospital admission rate for asthma by 40%.
* Nutrition and Overweight	Reduce the proportion of adults who are obese to 15%.	Reduce the proportion of adults who are obese to 15%.
* Substance Abuse	Reduce the number of vehicle accidents due to alcohol by 50%.	Reduce the number of vehicle accidents due to alcohol by 50%.
	Increase the proportion of youth 12 to 17 years that do not use alcohol or illicit drugs during the last 30 days.	Increase the proportion of youth 12 to 17 years that do not use alcohol or illicit drugs during the last 30 days.
*Tobacco	Reduce to 33 % the proportion of adults and adolescents that use tobacco	Reduce to 33 % the proportion of adults and adolescents that use tobacco

* Specific objectives for the USMBHC-Arizona-Sonora delegations

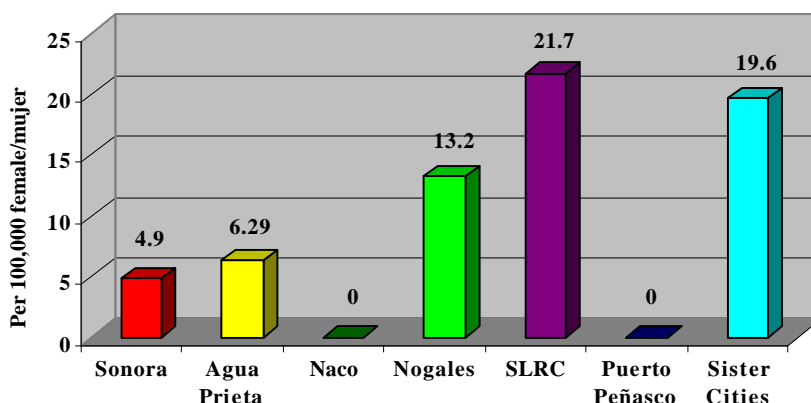

Healthy Gente—Healthy Border 2010

Sonora Border Summary

Healthy Gente Healthy Border Objectives 2 and 3 are concerned with Breast and Cervical Cancers among Sonoran women. Although significant decreases in mortality and morbidity cannot be determined from the following epidemiological graphs, comparisons will be made between Sonoran border counties and 1997 baseline data. In 1997, baseline data was gathered from Arizona– Sonoran residents living in the Sister Cities of : Agua Prieta-Douglas ,AZ, Naco-Naco, AZ, Nogales-Nogales, AZ and San Luis Rio Colorado-San Luis, AZ . In relation to breast cancer among both Arizona and Sonoran women , 19.6 women per 100,000 died of breast cancer in 1997.

Healthy Gente 2010 Objective 2 : Breast Cancer
 Reduce the breast cancer death rate for women by 20 percent
 Reducir la tasa de muerte por cáncer mamario en las mujeres por 20 por ciento

Breast Cancer Mortality Rate by Municipio, Sonora, 2000
 La Tasa de Muerte por Cáncer Mamario por Municipio, Sonora, 2000

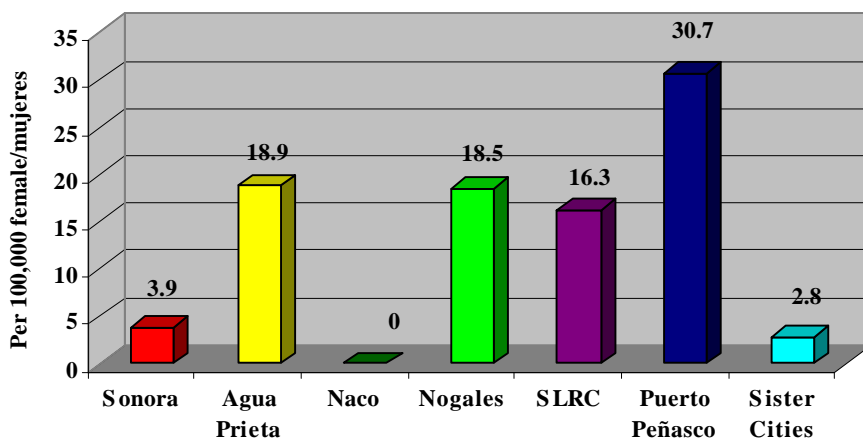

Source: 2000, Secretaria De Salud, Sonora, Mexico
 1997 National Vital Statistics System, CDC, NCHS

In 2000, the breast cancer mortality rate for the Sonoran Municipalities of Nogales (13.2) and Agua Prieta (6.29) continue to be lower than this 1997 baseline rate, with only San Luis Rio Colorado exceeding this rate, with a breast cancer mortality rate of 21.7 deaths per 100,000 women. Data was not provided for Naco or Puerto Peñasco.

In 1997, Arizona-Sonora women experienced a cervical cancer mortality rate of 2.8 per 100,000 females residents. In 2000, this rate was exceeded by all Sonoran border Municipalities. Although information from Naco is unavailable, Agua Prieta and Nogales Municipalities had similar cervical mortality rates of 18.5 and 18.9 respectively. San Luis Rio Colorado was lower, with a rate of 16.3 deaths to cervical cancer per 100,000 women , while Puerto Peñasco experienced the highest cervical cancer mortality rate of 30.7 per 100,000 women.

Healthy Gente 2010 Objective 3 : Cervical Cancer
 Reduce the cervical cancer death rate for women by 20 percent
 Reducir la tasa de cáncer cérvico-uterino por 20 por ciento.

Cervical Cancer Mortality by Municipio, Sonora, 2000
 La Tasa de Muerte por Cáncer Cérvico-Uterino por Municipio, 2000

Source: 2000, Secretaria De Salud, Sonora, Mexico
 1997 National Vital Statistics System, CDC, NCHS

Luis Rio Colorado was lower, with a rate of 16.3 deaths to cervical cancer per 100,000 women , while Puerto Peñasco experienced the highest cervical cancer mortality rate of 30.7 per 100,000 women.

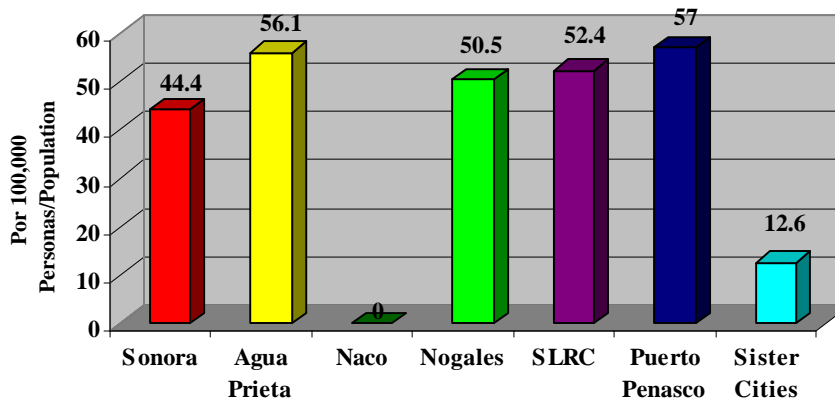

Many Arizona and Sonoran-women protect themselves from these two different types of Cancer by talking with their Doctor and Promatora about having a Pap smear to detect cervical cancer and a Mammography to detect breast cancer.

Healthy Gente—Healthy Border 2010 Sonora Border Summary

In 2000, the Sonoran diabetes mortality rate was 44.4 per 100,000. The 1997, Arizona Sonora sister city baseline diabetes mortality rate of 12.6 per 100,000 persons has been exceeded by all Sonoran border Municipalities. In 2000, Agua Prieta and Puerto Penasco registered the highest diabetes death rates among Sonoran Municipalities, with 56.1 deaths due to diabetes per 100,000 Agua Prieta residents and 57 deaths per 100,000 residents of Puerto Penasco. The mortality rate for Nogales residents was 50.5 and 52.4 for San Luis Rio Colorado residents.

Healthy Gente 2010 Objective 4 : Diabetes
Reduce the diabetes death rate by 10 percent
Reducir la tasa de muerte por diabetes por 10 por ciento

Diabetes Mortality Rates by Municipio, Sonora 2000
La Tasa de Muerte por Diabetes por Municipio, Sonora, 2000

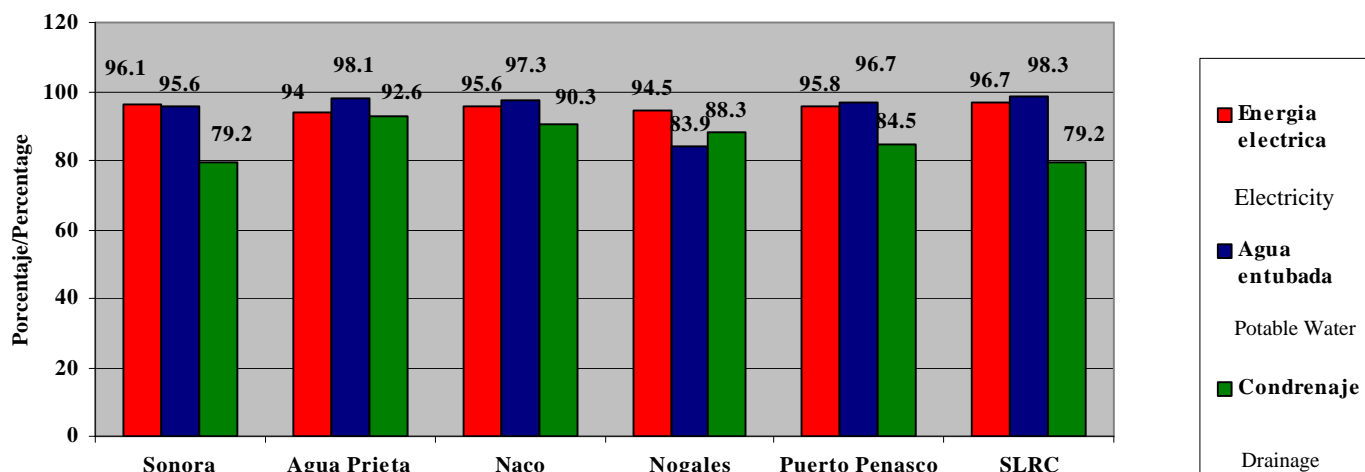

Source: 2000, Secretaria De Salud, Sonora, Mexico
1997 Baseline : National Vital Statistics System, CDC, NCHS

The Healthy Gente 2010 Environmental Health Objective for household connections has not been established, an overview of the proportion of Sonoran households connected to Electricity, Potable water and Drainage systems is provided.

Healthy Gente 2010 Objective 6: Environmental Health
Reduce the Proportion of Homes not Connected Public Drainage or Septic systems
Reducir a cero la Proporción de Hogares no Conectados a Sistemas de Drenaje Públicos o Sistemas Sépticos

Percentage of Population Connected to Electricity, Potable Water and Public Sewage Systems, Sonora 2002
Personas que cuentan con los servicios de Energía Eléctrica, Agua Entubada y Drenaje, Sonora, 2002

Instituto Nacional de Estadística Geográfica e Información, Indicadores seleccionados de vivienda por Municipio, 2000

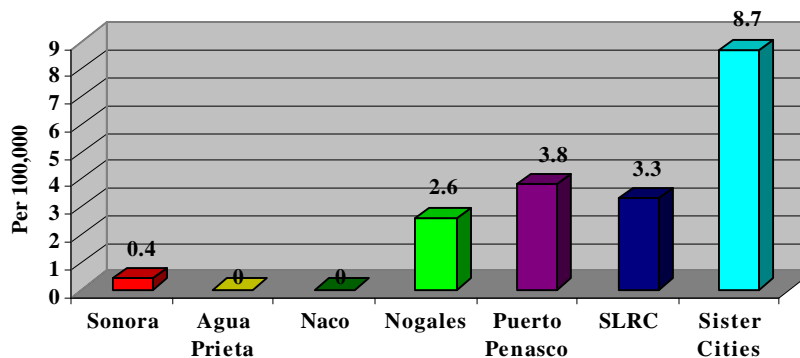

Healthy Gente—Healthy Border 2010

Sonora Border Summary

In 1997, the rate of newly diagnosed HIV cases was 8.7 per 100,000 Arizona-Sonora border residents. In 2000, the HIV incidence rate for Sonora was 0.4. The Municipalities of Nogales (2.6), Puerto Peñasco (3.8) and San Luis Rio Colorado (3.3) were above this State average. Information for Agua Prieta and Naco Municipalities are not available at this time.

Disease Healthy Gente 2010 Objective 8 : HIV/AIDS
 Maintain HIV incidence at 2000 level or below
 Mantener la Incidencia de VIH a o Abajo el Nivel de 2000

Incidence Rates for HIV Infection by Municipio , Sonora, 2000
Incidencia de Casos Diagnosticados por VIH por Municipio, Sonora, 2000

Source: 2000, Secretaria De Salud, Sonora, Mexico
 1997 HIV/AIDS Surveillance System, CDC, NCHSTP.

Healthy Gente- Healthy Border 2010 Objectives 9 through 11, are

dedicated to Immunization and Prevention of Infectious Diseases. The infectious diseases targeted by these objectives are *Hepatitis A*, *Hepatitis B* and *Tuberculosis*. The next three Objectives demonstrate the number of new cases, or incidence of these three infectious diseases. Hepatitis A is found in the stool of persons who are infected with Hepatitis A, it is usually spread from person to person by putting something in the mouth (even though it may look clean) that has been contaminated with the stool of a person with hepatitis A. is transmitted through the oral fecal route.

Signs and Symptoms :

Jaundice, Fatigue, Abdominal Pain, Loss of Appetite, Nausea, Diarrhea, Fever.

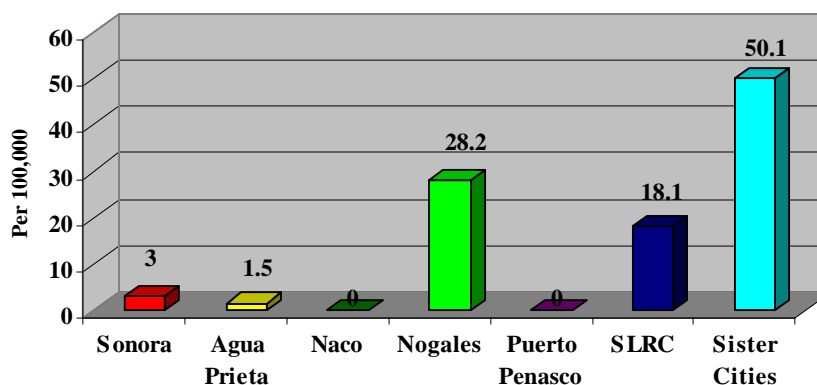

To Prevent Hep A -

Washing hands with soap and water after going to the bathroom, changing a diaper and before preparing food.

In 2000, the incidence rate of Hepatitis A in Sonora was 3.0 per 100,000. Nogales (28.2) and San Luis Rio Colorado (18.1) were well above tiserate, while Agua Prieta reported a lower rate of 1.5 per 100,000 residents.

Disease Healthy Gente 2010 Objective 9a: Immunization and Infectious Disease
 Reduce the incidence of Hepatitis A cases by 50 percent.
 Reducir la incidencia de Hepatitis A por 50 por ciento.

Incidence Rates for Hepatitis A per Municipio, Sonora 2000
Incidencia de Hepatitis A por Municipio, Sonora, 2000

Source: 2000, Secretaria De Salud, Sonora, Mexico
 1997 National Notifiable Disease Surveillance System (NNDSS), CDC, EPO

Healthy Gente—Healthy Border 2010

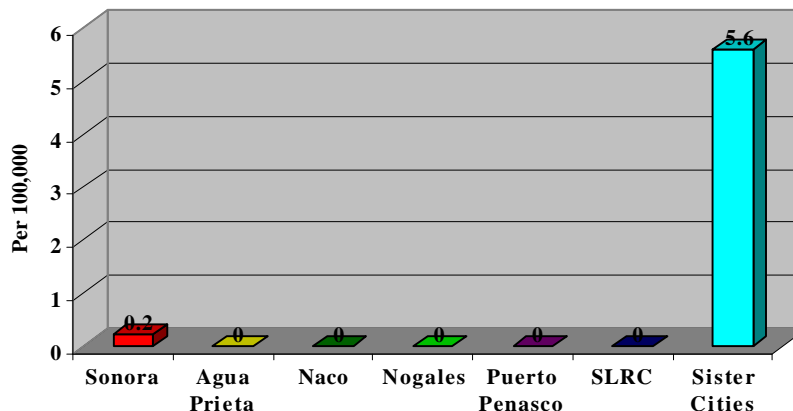

Sonora Border Summary

HG-HB 2010 Objective 9b is dedicated to the reduction of the number of new cases, or incidence of Hepatitis B. Hepatitis B is a serious disease caused by a virus that attacks the liver. Hep B occurs when blood or body fluids from an infected person enters the body of a person who is not immune. Hep B is spread through having sex with an infected person without using a condom, by sharing drugs, needles, or "works" when "shooting" drugs, through needle sticks or sharps exposures on the job, or from an infected mother to her baby during birth. Hep B has many of the same signs and symptoms of Hep A, including joint pain. In 2000 the State of Sonora experienced less than 1 new case of Hepatitis B and no new cases of Hep B were reported for any of the Sonoran border Municipalities.

Healthy Gente 2010 Objective 9b: Immunization and Infectious Disease

Reduce the incidence of Hepatitis B cases by 50 percent

Rates of Reported Cases of Hep B by Municipio, Sonora 2000
 Incidencia de Hepatitis B por Municipio, Sonora, 2000

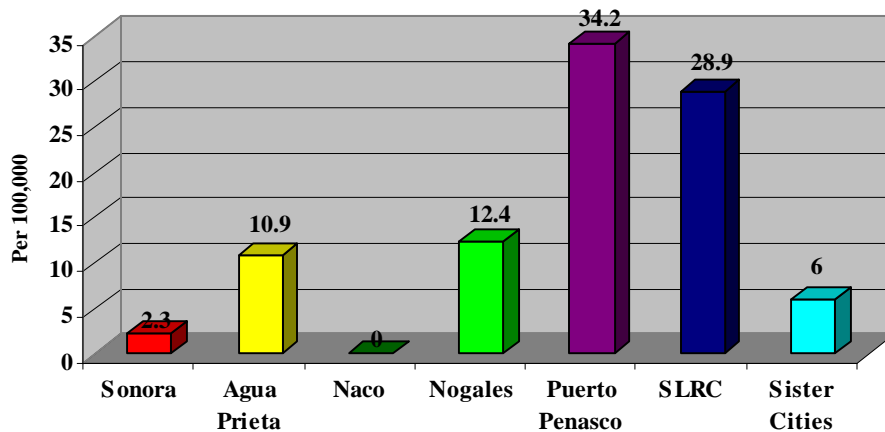

Source: 2000, Secretaria De Salud, Sonora, Mexico
 1997 National Notifiable Disease Surveillance System

Disease Healthy Gente 2010 Objective 10: Immunization and Infectious Disease

Reduce the incidence of Tuberculosis cases by 10 percent
 Reducir la incidencia de casos de Tuberculosis por 10 por ciento

Rates of Reported Cases of Tuberculosis by Municipio, Sonora, 2000
 La incidencia de Casos Reportados de Tuberculosis por Municipio, Sonora, 2000

Source: 2000, Secretaria de Salud, Sonora, Mexico
 1997 National Notifiable Disease Surveillance System (NNDSS), CDC, EPO

Tuberculosis or TB is one of the oldest transmissible diseases and continues to be a public health problem. In 1997, the TB incidence rate was 6 new cases per 100,000 Arizona-Sonora border residents. In 2000, this rate was exceeded by all Sonoran Municipalities. Puerto Peñasco (34.2) and San Luis Rio Colorado (20.9) residents experience the highest incidence rates, while Agua Prieta (10.9) and Nogales (12.4) rates were quite lower.

Healthy Gente—Healthy Border 2010

Sonora Border Summary

The Healthy Gente Healthy Border 2010 Objectives for Injury and Violence Prevention, include goals related to decreasing the rate of accidental deaths among children aged 1-4, and the reduction of the motor vehicle crash death rate among all border county residents.

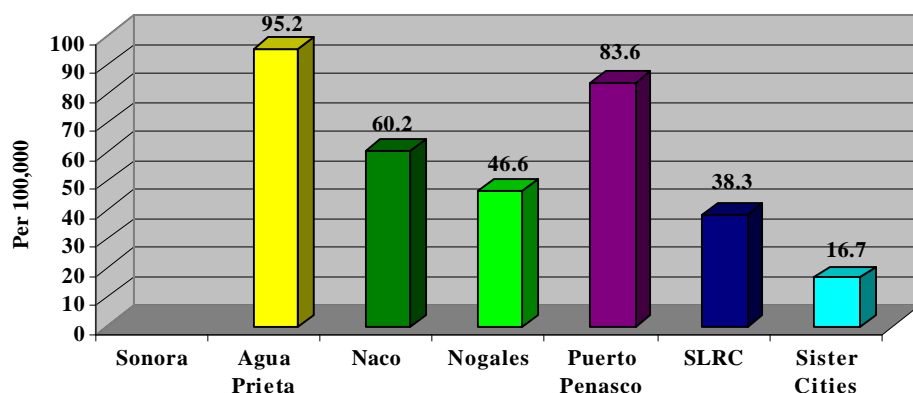

In 2000, the 1997 baseline mortality rate for motor vehicle crashes has been exceeded by all Sonoran Municipalities . Agua

Prieta (95.2) and Puerto Peñasco(83.6) registered the highest mortality rates, with Naco (60.2) and Nogales (46.6) somewhat lower, while San Luis Rio Colorado registered the lowest mortality rate of 38.3 motor vehicle crash deaths per 100,000 residents.

Healthy Gente Objective 12 : Injury and Violence Prevention

Reduce the motor vehicle crash death rate by 20 percent.
Reducir la tasa de muerte por choques vehiculares al 20 por ciento

Motor Vehicle Accident Mortality Rates by Municipio, 2000
La Tasa de Muerte por Choques Vehiculares por Municipio, Sonora

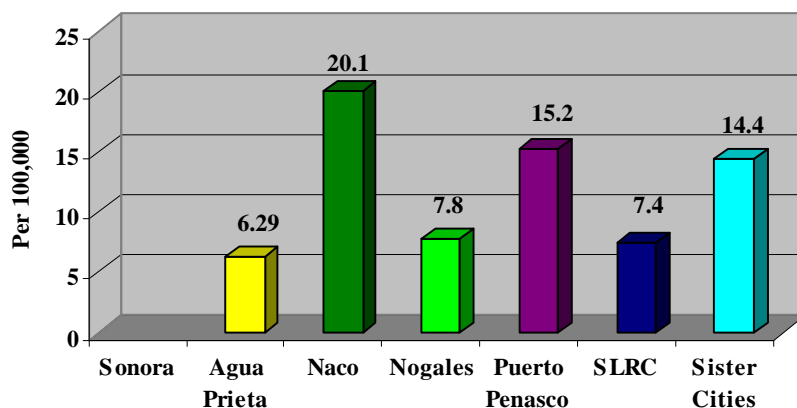

Source: 2000, Secretaria de Salud , Sonora, Mexico
1997 National Vital Statistics System, CDC, NCHS

Healthy Gente 2010 Objective 18 : Mental Health

Reduce the suicide death rate by 25 percent
Reducir la tasa de suicidio al 25 por ciento

Mortality from Suicide by Municipio, Sonora, 2000
La Tasa de Muerte por Suicidio por Municipio, Sonora, 2000

Source: 2000, Secretaria de Salud , Sonora, Mexico
1997 National Vital Statistics System, CDC, NCHS

HG-HB 2010 Objective 18 is concerned with Mental Health. Among the Sonoran border Municipalities. In this region, the suicide mortality rates vary greatly. The lowest rates of mortality were experienced by Agua Prieta (6.29), Nogales (7.8) and San Luis Rio Colorado (7.4). Puerto Peñasco had a suicide death rate of 15.2, and Naco, 20.1 per 100,000 persons. In 1997, suicide mortality was 14.4 for Arizona-Sonora residents, this baseline rate has been exceeded by both Naco and Puerto Peñasco.

Healthy Gente—Healthy Border 2010

Sonora Border Summary

Healthy Gente Objectives 14 through 17 are concerned with Maternal, Infant and Child Health.

They include infant Mortality, Early Initiation of Prenatal Care and Teenage Pregnancy. In this section information is provided for Infant Mortality objectives 14 and 15.

Infant mortality, or the rate of infant death is an indicator of the health of a community. In 2002, infant mortality for Sonora was 14.95 per 1,000 live births.

This rate was exceeded by all Municipalities, with the

highest rates occurring in Agua Prieta (25.59), Nogales

(20.72) , Puerto Peñasco (19.11) and San Luis Rio Colorado

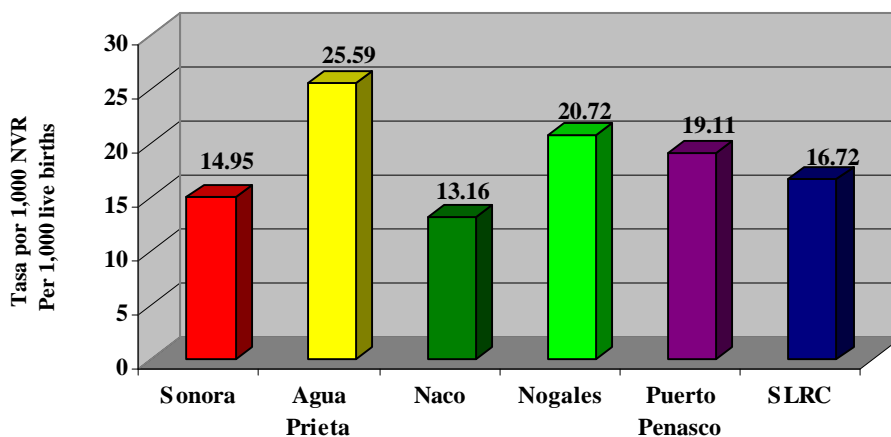

(16.72). Naco, had the lowest infant mortality rate in 2002, with 13.16 infant deaths per 1,000 live births.

In 2000, the State of Sonora experienced 21.44 per 1,000 live births due to birth defects. All Sonora border municipalities were below this State rate. Naco (1), San Luis Rio Colorado (2) and Agua Prieta (3) had the lowest infant mortality rate due to birth defects. Puerto Peñasco (5) and Nogales (11) were slightly higher than above mention border municipalities, but remained well below the Sonora rate.

Healthy Gente Objective 14: Maternal, Infant and Child Health

Reduce the infant mortality rate from all causes by 50 percent
Reducir la tasa de mortalidad infantil por 50 por ciento

Infant Mortality per Municipio, Sonora, 2002

Agua Prieta-Sonora

STATISTICAL DATA

DEMOGRAPHIC OVERVIEW

The actual municipality area was, during the colonial era en the early times of the independence, under the administration of the Border Presidio, located in the Chiricahua Apache region.

Tourists coming from many of the States of the U.S. see this border city as the gateway to the Sonora Desert Route.

The municipality is located in the Northwest region of the State of Sonora being its seat the town of Agua Prieta. Limits with the United States of America to the north, the State of Chihuahua to the east; the municipality of Naco to the west; with the municipalities of Bavispe and Nacozeni de García to the south and with the municipality of Fronteras to the southwest.

It has an area of 3,631.65 square kilometers, which is 1.95 per cent of the State's total and 0.18 of the national's total. The largest population, aside the seat, is *colonia* Morelos.

According to the INEGI census the population reported for 1980 was 34,380, en 1990 it was 39,120 and in 2000, 61,821 of which 31,243 are men and 30,578 women. This corresponds to a growing rate of 1.3% for 1980/1990 and 4.6% for 1990/2000.

Sonora Public Health Department reports that in 2001 Sonora Public Health Department hospitals and Social Security (IMSS, ISSSTE e ISSSTESON), provided 81,666 general consultation services, 17,171 special care services, 7,570 dental services provided, 1,789 surgeries were performed, 29,630 emergency services were provided, 5,007 users were released, 1,466 births were assisted, 96,248 clinical lab tests were performed and 8,479 x-ray studies done.

Immigrant Children ACJ

Calle 3, Ave. 10 No 999 Colonia Centro

Agua Prieta, Sonora

Fax: (633) 33 8-40-00

Email: ymcaaguaprieta02@hotmail.com

Program: Building YMCA for Immigrant Children

Mission:

Contribute to the full development of spirit, mind and body of children and immigrant children of the USA – Mexico border area, seeking the greatest possible protection of their human rights, providing them with a safe and healthy shelter where they will receive food, clothing, basic medical care and access to communications.

Objectives

To make people aware of the dangers these children face when illegally crossing the border and the risks they face being so young and even the adults.

Activities performed and expected results

Information tools to further explain, through pamphlets, videos, newspaper immigration news, short talks within the shelter's facilities and information posters, the risks that minor immigrant may face. To accomplish, by these means, a reduction in the number of minors who try to cross the USA border.

Targeted Population

Minor between 12 – 17 years old who arrive to our border with the intention of attaining the American dream, and are deported.

Assistants

Institutions and volunteers.

Objectives of this project

Access to health care

Naco-Sonora

STATISTICAL DATA

DEMOGRAPHIC OVERVIEW

Until 1901, Naco's territory was part of the municipality of Fronteras, and then part of Cananea, until the decree issued by the local congress on June 22, 1937, granted municipal autonomy. The name Naco means "**Prickly pear cactus**" in opata language.

The municipality is located in the northern region of the State of Sonora, being its seat the town of Naco and is located at 31° 19' north latitude and 109° 19' west longitude from the Greenwich, at an altitude of 1,524 meters over sea level. Limits with the United States of America to the north, the municipality of Agua Prieta to the east, with Bacoachi to the south and Cananea to the west.

It has an area of 651.80 square kilometers, which is 0.35 per cent of the State's total and 0.03 of the national's total. The largest population, aside from the seat, is *ejido* Cuauhtemoc.

According to the INEGI census the population reported for 1980 was 4,441, en 1990 it was 4,645 and in 2000, 5,352 of which 2,672 are men and 2,680 women. This corresponds to a growing rate of .4% for 1980/1990 and 1.4% for 1990/2000.

Sonora Public Health Department reports that in 2001 Sonora Public Health Department hospitals and Social Security (IMSS, ISSSTE e ISSSTESON), provided 13,893 general consultation services, an 22 births were assisted.

Nogales-Sonora

STATISTICAL DATA

DEMOGRAPHIC OVERVIEW

Nogales emerge from the authorization obtain in 1880 by the Sonora Railroad Company. Seeking a border terminal, it chose the Nogales wash, thus taking it to the international border in the Magdalena District.

Later, the federal government authorized a border customs post in the location chosen for the railroad terminal. At that time, the area was deserted with the exception of a few inhabitants in the Elias ranch. Customs officials had to be housed in tents.

The municipality is located in the northern region of the State of Sonora, being its seat the town of Nogales. Limits with the United States of America to the north and with the following municipalities: with Santa Cruz to the east, with Imuris to the south and with Saric to the west.

It has an area of 1,654.76 square kilometers, which is 0.89 per cent of the State's total and 0.08 of the national's total. It has a total of 180 centers of population.

According to the INEGI census the population reported for 1980 was 68,076 habitants, en 1990 it was 107,936 habitants and in 2000, 159,103 of which 80,625 are men and 78,478 women. This corresponds to a growing rate of 4.6% for 1980/1990 and 3.9% for 1990/2000. This represents a population density of 80.70 inhabitants per square kilometer.

Sonora Public Health Department reports that in 2001 Sonora Public Health Department hospitals and Social Security (IMSS, ISSSTE e ISSSTESON), provided 210,195 general consultation services, 46,953 special care services, 7,570 dental care services provided, 1,789 surgeries were performed, 29,630 emergency services were provided, 5,007 users were released, 1,466 births were assisted, 96,248 clinical lab tests were performed and 8,479 x-ray studies done.

Governmental

5 de Febrero y Moctezuma

Nogales, Sonora

Telephone: (631) 31 3-0519

Fax: 31 3-0519

Email: cdiabetesnogales@hotmail.com

Mission:

To improve the quality of life of patients with diabetes and their families

Program: To Better the Life of the Population

Objective:

- Educate the population to better the quality of life.
- Detect diabetes timely in the population at large.
- Provide follow up to patients with diabetes.

Activities performed and expected results:

- Continuing education to all groups of the population
- Timely detection of diabetes
- Early phase detection of diabetes in people, with fewer complications.

Targeted Population:

Population at large.

Children, teenagers and adults

Assistants :

Sonora Health Department, Nogales General Hospital,
Arizona-Sonora Border Public Health Office.

Funding:

Activities performed by the Association's Board of Directors.

Prevention***

Program: Laboratories Infrastructure Improvement

Objective:

The State Public Health Laboratory will have the diagnosis capacity for all reoccurring diseases; therefore, we will be better prepared to respond to any event of bioterrorism that could occur in the State of Sonora. Furthermore, by implementing this Biosecurity Type III Laboratory within the State Public Health Laboratory places the State of Sonora as the only laboratory of this kind in the northern region of the country and it will serve as a reference to the States of Chihuahua, Baja California, Sinaloa y Nayarit.

Activities performed and expected results:

A physical structure assessment of the State Public Health and Nogales General Hospital Laboratories was required. The plans to build a Biosecurity Laboratory (Level III) in the State Public Health Laboratory were designed, consisting of a equipment distribution plan, electrical installation plan, consisting of lights and outlets and it was also designed a construction plan for a Biosecurity Laboratory (Level II) in the Nogales General Hospital Laboratory consisting in adapting physical space for the distribution of equipment..

Puerto Peñasco-Sonora

STATISTICAL DATA

DEMOGRAPHIC OVERVIEW

It is one of the youngest centers of population in the State of Sonora. Puerto Peñasco started around 1927 as a fisherman's camp. From that time fishermen from different parts of the state, like Guaymas, Bahía de Kino, Puerto Libertad and Puerto Lobos, among others, started to come during the fishing season, settling and living in an improvised way in tents and caves found in the hills and on sandy dunes

By 1929, the place was known as Punta de Piedra or Punta Peñasco. Due to the large rocky outcrop of volcanic origin that protrudes into the waters of the Sea of Cortes, the main attraction of this fishing camp was the extraordinary abundance of *totoaba*, a very large fish very appreciated in the U. S., not so much for its meat as for its medicinal value.

The municipality is located in the northern region of the State of Sonora, being its seat the town of Puerto Peñasco. Limits with the following municipalities: with San Luis Rio Colorado to the northwest; with the United States of America and Plutarco Elías Calles to the north, with Caborca to the southeast and with its natural boundary to the south, the Golf of California.

According to the INEGI census the population reported for 1980 was 26,755 habitants, en 1990 it was 26,625 habitants and in 2000, 31,101 of which 15,719 are men and 15,382 women. This corresponds to a growing rate of 0.0% for 1980/1990 and 1.6% for 1990/2000. This represents a population density of 5.50 inhabitants per square kilometer.

Sonora Public Health Department reports that in 2001 Sonora Public Health Department hospitals and Social Security (IMSS, ISSSTE e ISSSTESON), provided 61,420 general consultation services, 12,418 special care services, 5,658 dental care services provided, 1,361 surgeries were performed, 22,075 emergency services were provided, 3,575 users were released, 677births were assisted, 59,917 clinical lab tests were performed and 5,492 x-ray studies done.

San Luis Rio Colorado - Sonora

STATISTICAL DATA

DEMOGRAPHIC OVERVIEW

In the northeast end of Sonora, limited by the Colorado River and the moving sands of the Altar Desert, is San Luis, born around 1918, as a military farm colony. It grew thanks to the miracle of the river waters, capable of transforming the desert in fertile lands where wheat, cotton and other crops grow for its economy.

The municipality is located in the northwest region of the State of Sonora, being its seat the town of San Luis Rio Colorado. Limits with the United States of America to the north, with the municipality of Puerto Peñasco to the east, the Golf of California to the south and the State of Baja California to the west.

According to the INEGI census the population reported for 1980 was 92,790 habitants, en 1990 it was 110,530 habitants and in 2000, 145,276 of which 72,617 are men and 72,659 women. This corresponds to a growing rate of 1.7% for 1980/1990 and 2.7% for 1990/2000. This represents a population density of 17.26 inhabitants per square kilometer. We must bear in mind that 9% live in rural areas.

Sonora Public Health Department reports that in 2001 Sonora Public Health Department hospitals and Social Security (IMSS, ISSSTE e ISSSTESON), provided 67,744 general consultation services, 54,428 special care services, 6,776 dental care services provided, 4,225 surgeries were performed, 24,282 emergency services were provided, 7,723 users were released, 2,386 births were assisted, 288,183 clinical lab tests were performed and 23,080 x-ray studies done.

Healthy Gente-Healthy Border 2010 Arizona Border Summary

What is Healthy Gente—Healthy Border 2010?

Healthy Gente outlines a health promotion and disease prevention agenda through the year 2010 for the U.S. communities that border Mexico. Healthy Gente draws on the national health objectives defined in Healthy People 2010, identifying 25 of the most important objectives for the distinct needs and concerns of the border. Healthy Gente aims to develop preventive goals, objectives and strategies, resulting in a strategic management tool that will be used by the four U.S. border states, communities and many other public- and private-sector partners.

Who is developing Healthy Gente– Healthy Border 2010?

The idea of establishing health objectives for the border region was an outgrowth of preparatory work for the U.S.-Mexico Border Health Commission, a group designed to serve as a forum for addressing critical health issues in the border region. The objectives were developed by members of the Design Team, the support group for the Border Health Commission, including the directors of the four U.S. State border health offices. The team used four principles to guide the selection of objectives: a) they should address key health issues on the border; b) they should be limited in number; c) To the extent possible, the objectives should be measurable; and d) they should be compatible with federal and state objectives. The goal was to develop a set of objectives that will resonate with the border population, will be easily understood, and will help to coordinate public and private health programs.

Within each U.S. border state, the Healthy Gente program will be implemented in border communities by a consortium of state and local organizations, including the state health department, border health office, local health departments, private health programs and private businesses.

What are the goals of Health Gente –Healthy Border 2010?

- Increase quality and years of healthy life
- Eliminate health disparities

What objectives are included in the Healthy Gente program?

The 25 Healthy Gente objectives cover the majority of the focus areas set out in the list of national health objectives, Healthy People 2010. The Healthy Gente objectives are all measurable objectives, however information for some of these measures is not yet available for the border communities. The objectives are presented, ordered according to the focus areas used for the national objective. In this section, various Health Gente-Healthy Border 2010 Objectives will be presented in graph form for easy comparison among the four Border Counties.

Healthy Gente—Healthy Border 2010 Arizona Border Summary

Healthy Gente—Healthy Border 2010 Objectives

Topic Area	Year 2010 Objectives	
	Mexico	United States
Access to Care	Maintain at less than 5% the population without access to basic health services	Reduce by 25 % the proportion of persons lacking access to a primary care provider I underserved areas.
Cancer	Reduce the breast cancer rate for women by 20 %.	Reduce the breast cancer rate for women by 20 %.
	Reduce the cervical cancer death rate for women by 20 %.	Reduce the cervical cancer death rate for women by 30 %.
Diabetes	Reduce diabetes death rate by 10 %.	Reduce diabetes death rate by 10 %.
	Maintain the current level of hospital admissions for diabetes.	Reduce the diabetes morbidity by 25%
Environmental Health	Household connection objective not established.	Reduce to zero the proportion of households without complete bathroom facilities.
	Maintain the current level of hospitalization rates for pesticide poisoning.	Reduce to 25% the hospital admissions for acute pesticide poisoning.
HIV/AIDS	Maintain HIV incidence at 2000 level or below.	Reduce the Incidence of HIV cases by 50%.
Immunization and Infectious Disease	Reduce the incidence of hepatitis A and B cases by 50 %.	Reduce the incidence of hepatitis A and B cases by 50 %.
	Reduce the incidence of tuberculosis by 10%.	Reduce the incidence of tuberculosis by 10%.
	Maintain immunization coverage rate of 95% or higher for children under age 1 and age 1-4.	Achieve and maintain immunization coverage rate of 90% for children 19-35 months.
Injury Prevention	Reduce the motor vehicle crash death rate 20 %.	Reduce the motor vehicle crash death rate 25 %.
	Reduce the childhood (under age 5) death rate due to unintentional injuries by 50 %.	Reduce the childhood (under age 5) death rate due to unintentional injuries by 30 %.
Maternal, Infant and Child Health	Reduce the infant mortality rate due to all causes by 50 %.	Reduce the infant mortality rate due to all causes by 15 %.
	Reduce the infant mortality rate from birth defects by 50 %.	Reduce the infant mortality rate from birth defects by 30 %.
	Raise initiation of beginning prenatal care in the first trimester to 70 %.	Increase the proportion of women beginning prenatal care in the first trimester to 85 %.
	Reduce the pregnancy rate among 10-19 year olds by 20 %.	Reduce the pregnancy rate among 15-17 year olds by 33 %.
Mental Health	Reduce the suicide mortality rate by 25%.	Reduce the suicide mortality rate by 15%.
Oral Health	Ensure that 25% of population uses oral care services annually.	Raise the proportion of using oral care to 75% annually.
Respiratory Diseases	Maintain hospital admission rate for asthma at current level.	Reduce hospital admission rate for asthma by 40%.
* Nutrition and Overweight	Reduce the proportion of adults who are obese to 15%.	Reduce the proportion of adults who are obese to 15%.
* Substance Abuse	Reduce the number of vehicle accidents due to alcohol by 50%.	Reduce the number of vehicle accidents due to alcohol by 50%.
	Increase the proportion of youth 12 to 17 years that do not use alcohol or illicit drugs during the last 30 days.	Increase the proportion of youth 12 to 17 years that do not use alcohol or illicit drugs during the last 30 days.
*Tobacco	Reduce to 33 % the proportion of adults and adolescents that use tobacco	Reduce to 33 % the proportion of adults and adolescents that use tobacco

* Specific objectives for the USMBHC-Arizona-Sonora delegations

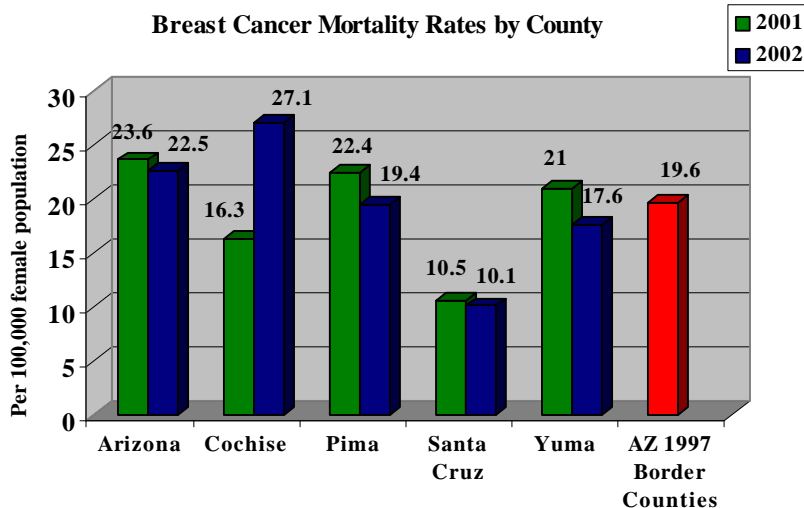

Healthy Gente—Healthy Border 2010

Arizona Border Summary

Although significant decreases in mortality and morbidity cannot be determined from the following epidemiological graph, comparisons will be made between border counties and the state of Arizona. In 2001-2002 the AZ mortality rate from breast cancer has fallen slightly, from 23.6 to 22.5. A decrease in breast cancer mortality among women living along the border has occurred in Pima, Santa Cruz and Yuma Counties. Although, women in Cochise County have experienced a dramatic increase in breast cancer mortality, with rates of 16.3 in 2001 and 27.1 in 2003. Comparing 2002 mortality rates to those registered among women in Border Counties in 1997, Yuma, Santa Cruz and Pima rates are below the 1997 baseline of 19.6 women die of breast cancer per 100,000 female population.

Healthy Gente 2010 Objective 2 : Breast Cancer

Reduce the breast cancer death rate for women by 20 percent

Source: Arizona Health Status and Vital Statistics 2001 Table 5E-11, 2002, Table 5E-11 1997 Baseline : National Vitals Statistic System, CDC, NCHS

Surveys conducted by the Centers for Disease Control (CDC), during 1999 and 2000 in border counties in California, Arizona, New Mexico, and Texas found that Hispanic women in all age groups had lower rates of

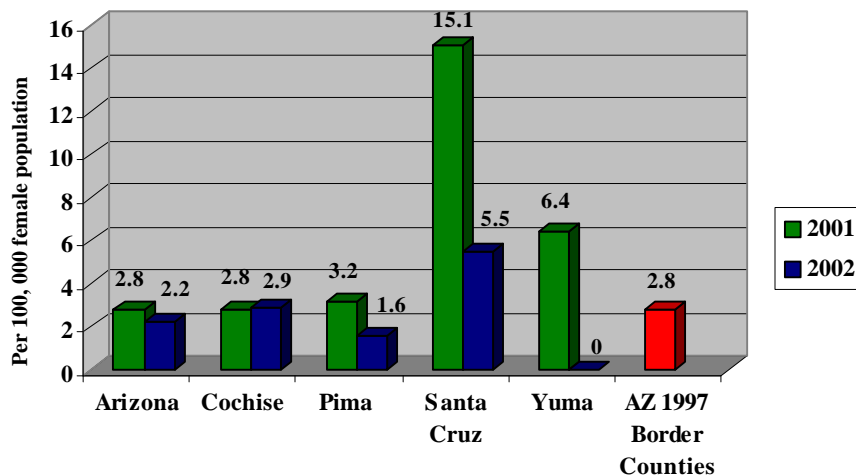

Pap tests for cervical cancer and mammography for breast cancer than did non-Hispanic women of the same age. It has been suggested that lack of access to health care services in the border region and the need for culturally sensitive and appropriate preventative health care in the US may partly account for lower cancer screening rates among Hispanic women. Many women protect themselves from these two different types of Cancer by talking with their Doctor and Promotora about having a Pap smear to detect cervical cancer and a Mammography to detect breast cancer.

In Arizona, cervical cancer mortality in 2001-2002 remained below 3 women per 100,000 female population. This average is consistent in Cochise, Pima and in Yuma counties. Although Santa Cruz remains above this average, in 2001 15.1 women died of cervical cancer and in 2002 that rate significantly decreased to 5.5 women per 100,000.

Healthy Gente 2010 Objective 3 : Cervical Cancer

Reduce the cervical cancer death rate for women by 30 percent

Age Adjusted Cervical Mortality Rate

Source: Arizona Health Status and Vital Statistics 2001, Table 5E-11, 2001, Table 5E-11 1997 National Vital Statistics System, CDC, NCHS

The Centers for Disease Control (CDC) is currently funding the *National Breast and Cervical Cancer Early Detection Program* to offer screening to low-income women, including women who are new immigrants. In addition to clinical breast exams, mammograms and Pap tests, the program ensures appropriate diagnostic follow-up, case management and assurances for medical treatment. To find out more about this program, check out the CDC website at : www.cdc.gov/cancer/nbccedp/about.htm

Source : CDC Media Relations, August 12, 2003.

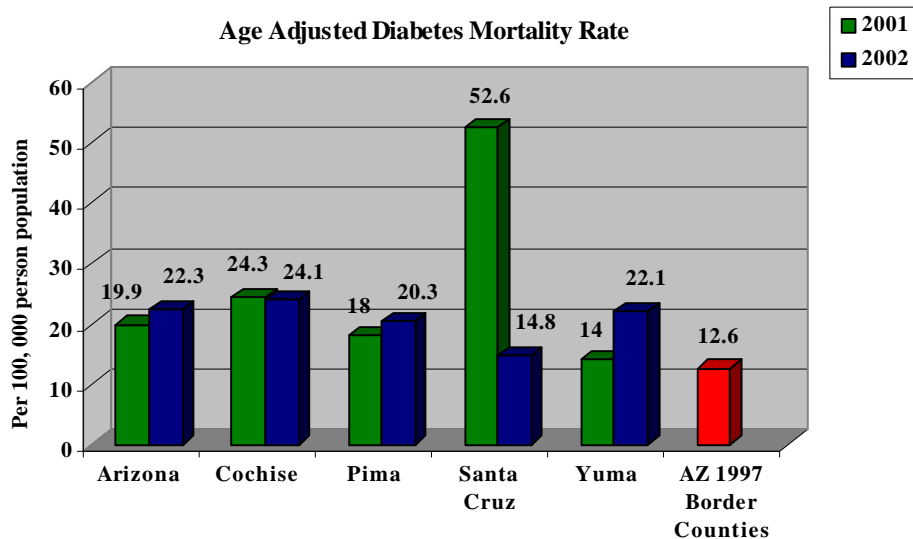

Healthy Gente—Healthy Border 2010 Arizona Border Summary

Disease Healthy Gente 2010 Objective 4 : Diabetes Reduce the diabetes death rate by 10 percent

Like the Breast and Cervical cancer objectives, HG-HB Objective 4 is dedicated to the reduction of deaths due to Diabetes, or the reduction in the diabetes mortality rate.

The Arizona diabetes mortality rates for 2001-2002 increased slightly from 19.9 deaths to diabetes per 100,000 Arizonans to 22.3 deaths in 2002. In 2002, Pima, Santa Cruz and Yuma Counties were below this AZ average. In 2002, Santa Cruz County residents experienced a dramatic decrease in diabetes-associated deaths, registering 52.6 deaths per 100,000 in 2001, down to 14.8 in 2002.

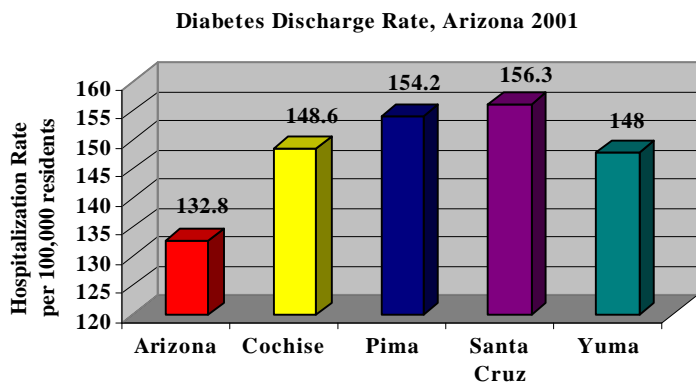

Cochise County residents continue to experience above average rates, with 2001-2002 rates of 24 deaths per 100,000 residents. All border county diabetes mortality rates are up from the 1997 rate of 12.6. According to the Centers for Disease Control (CDC), 1 out of every 10 Mexican Americans living in the United States, aged 20 and older has been diagnosed with diabetes.

Source: Arizona Health Status and Vital Statistics 2001, Table 5E-11, 2002, Table 5E-11 1997 Baseline : National Vital Statistics System, CDC, NCHS

HG-HB Objective 4b is concerned with Diabetes *morbidity*, or the number of people who have been diagnosed with diabetes, but have not died due to diabetes. Objective 4b proposes to reduce the number of people who will be diagnosed and/or suffer from diabetes by 25 percent. For every 100,000 Arizonans, who were admitted into a primary health care center, 132.8 were discharged with a diagnosis of diabetes. For every 100,000 Cochise, Yuma and Pima County residents, 148 and 154.2 persons respectively, were discharged from the hospital diagnosed with diabetes. Yet, Santa Cruz County exceeded the AZ rate and those of all Border Counties with a diabetes morbidity rate of 156.3 per 100,000.

Disease Healthy Gente 2010 Objective 4b : Diabetes Reduce the diabetes morbidity rate by 25 percent

People who think they might have diabetes must visit a physician for diagnosis. They might have SOME or NONE of the following symptoms:

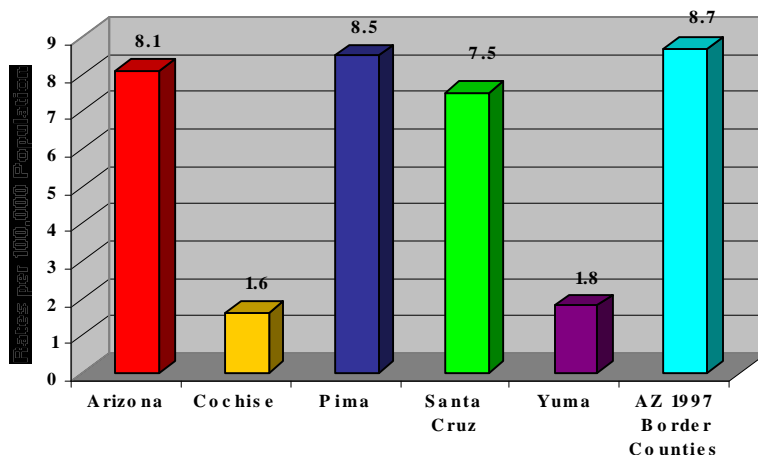

Frequent urination, excessive thirst, unexplained weight loss, extreme hunger, sudden vision changes, tiredness, numbness or tingling in hands and feet, sores that won't heal.

Healthy Gente—Healthy Border 2010 Arizona Border Summary

In 2002, the state of Arizona had an HIV incidence rate (number of new cases) of 8.1. For every 100,000 persons in Cochise and Yuma Counties, 1.6 and 1.8 persons respectively were newly diagnosed with HIV. Higher rates were found in Pima County (8.5), Santa Cruz (7.5) in 2002. Currently, incidence rates, for 2002 are lower than those incidence rates for the Arizona—Sonora Border Counties back in 1997.

Disease Healthy Gente 2010 Objective 8 : HIV/AIDS
Reduce the incidence of diagnosed HIV infection cases among adolescents and adults by 50 percent.

Incidence Rates of HIV Infection by County, Arizona, 2002

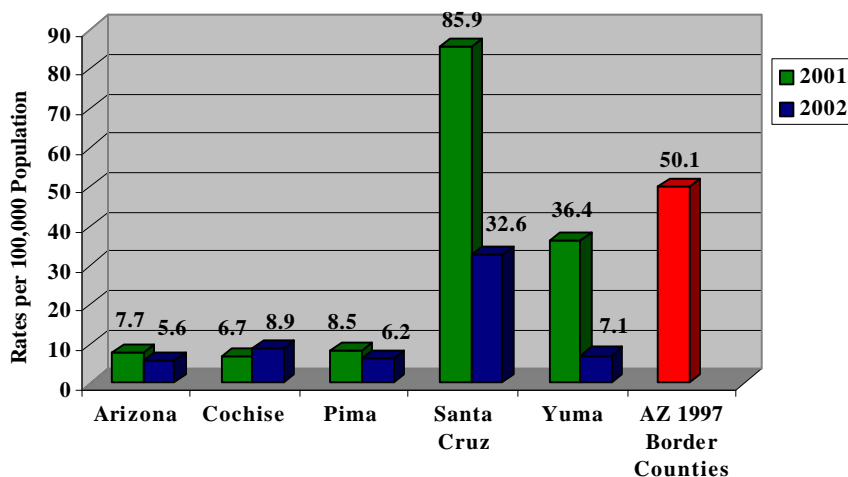

Source: Arizona Health Status and Vital Statistics, 2002
1997 HIV/AIDS Surveillance System, CDC, NCHSTP.

Healthy Gente- Healthy Border 2010 Objectives 9 through 11, are dedicated to Immunization and Prevention of Infectious Diseases. The infectious diseases targeted by these objectives are *Hepatitis A*, *Hepatitis B* and *Tuberculosis*. The next three Objectives demonstrate the number of new cases, or incidence rate of these three infectious diseases. In 1997, rates of reported Hepatitis A among all border counties was 50 cases per 100,000 Arizona- Sonora border residents. Currently all border counties, as well as the state of Arizona are below this baseline rate. The AZ average has decreased from 7.7 to 5.6 cases over the 2001-2002 period, while Cochise County increased slightly from 6.7 to 8.9 per 100,000. Pima, Santa Cruz and Yuma Counties have all experienced a decrease in Hep A, while Santa Cruz showed a significant drop from 85.9 cases per 100,000 in 2001 to 32.6 per 100,000 in 2002. A similar decline was seen in Yuma County, dropping from 36.4 in 2001 to 7.1 in 2002.

Disease Healthy Gente 2010 Objective 9a: Immunization and Infectious Disease
Reduce the incidence of Hepatitis A cases by 50 percent.

Hepatitis A is found in the stool of persons who are infected with Hepatitis A, it is usually spread from person to person by putting something in the mouth (even though it may look clean) that has been contaminated with the stool of a person with Hepatitis A.
To Prevent Hep A - Washing hands with soap and water after going to the bathroom, changing a diaper and before preparing food.

Rates of Reported Hep A Cases

Source: Arizona Health Status and Vital Statistics 2001, Table 5F-2, 2002, Table 5F-2
1997 National Notifiable Disease Surveillance System (NNDSS), CDC, EPO

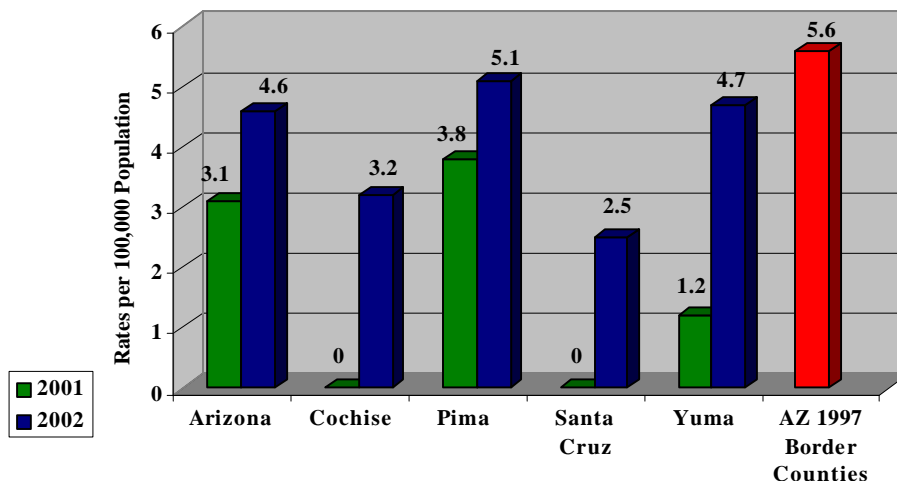

Healthy Gente—Healthy Border 2010 Arizona Border Summary

HG-HB 2010 Objective 9b is dedicated to the reduction of the number of new cases, or incidence of Hepatitis B. Hepatitis B is a serious disease caused by a virus that attacks the liver. Hep B occurs when blood or body fluids from an infected person enters the body of a person who is not immune. Hep B is spread through having sex with an infected person without using a condom, by sharing drugs, needles, or "works" when "shooting" drugs, through needle sticks or sharps exposures on the job, or from an infected mother to her baby during birth. Hep B has many of the same signs and symptoms of Hep A, including joint pain.

In 1997 the average incidence rate for Hep B among Arizona-Sonora Border residents was 5.6 reported cases per 100,000 border residents. In 2001, Arizona had an average of 3.1 cases of Hep B, with an increase in 2002 to 4.6 newly reported cases per 100,000 Arizonans. Cases of Hep B varied along the border. Cochise and Santa Cruz county rates were found to be well below the AZ state average, with incidence rates of 3.2 and 2.5 respectively. Pima and Yuma Counties experienced increased incidence rates in 2002.

Healthy Gente 2010 Objective 9b: Immunization and Infectious Disease Reduce the incidence of Hepatitis B cases by 50 percent

Rates of Reported Hep B Cases

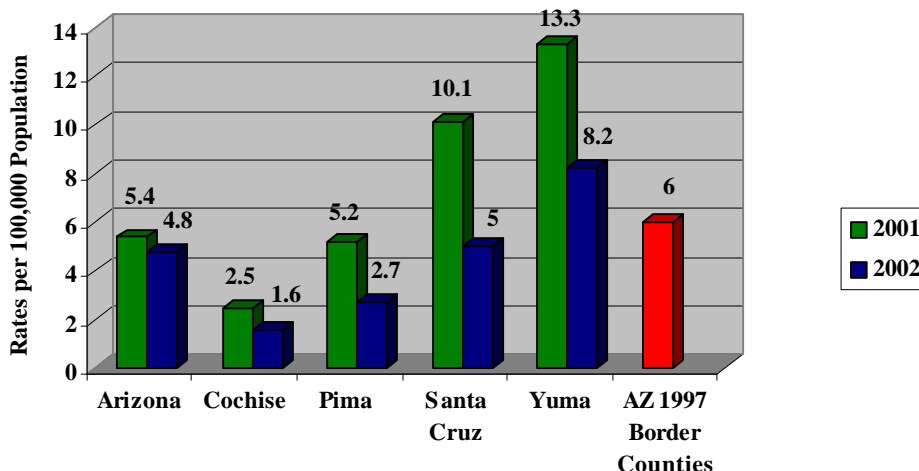

Source: Arizona Health Status and Vital Statistics 2001, Table 5F-2, 2002, Table 5F-2 1997 National Notifiable Disease Surveillance System (NNDSS), CDC, EPO

Tuberculosis or TB is one of the oldest transmissible diseases and continues to be a public health problem. The state of Arizona did exhibit a decrease in the rate of reported TB cases, from 5.4 cases of TB in 2001 to 4.8 cases per 100,000 Arizona residents in 2002.

Along the border the rate of reported TB cases varied in 2001-2002. Cochise and Pima Counties experienced the lowest rates in 2002, with a consistent decrease in TB cases. While, in 2001, Santa Cruz County had a reported TB case rate of 10.1 per 100,000 which dropped to a rate of 5 in 2002. A similar decrease was found in Yuma County, ranging from a rate of 13.3 in 2001, down to 8.2 cases per 100,000 in 2002. In 1997, 6 reported cases of Tuberculosis were found per 100,000 Arizona and Sonoran border resident, this rate continues to be exceeded by both Yuma and Santa Cruz Counties.

Disease Healthy Gente 2010 Objective 10: Immunization and Infectious Disease Reduce the incidence of Tuberculosis cases by 50 percent

Rates of Reported Cases of TB

Source: Arizona Health Status and Vital Statistics 2001, Table 5F-2, 2002, Table 5F-2 1997 National Notifiable Disease Surveillance System (NNDSS), CDC, EPO

Healthy Gente—Healthy Border 2010 Arizona Border Summary

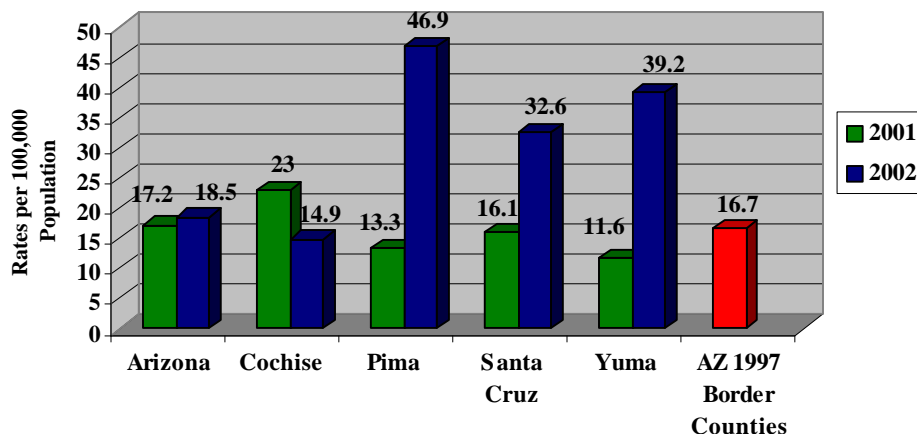

The Healthy Gente Healthy Border 2010 Objectives for Injury and Violence Prevention, include goals related to decreasing the rate of accidental deaths among children aged 1-4, and the reduction of motor vehicle crash death rate among all border county residents.

In 2001, 17.2 per 100,000 AZ residents died of motor vehicle crashes, which is slightly lower than the 18.5 rate for 2002. This increase in the motor vehicle crash death rate was experienced by all

border counties, except for residents in Cochise County who experienced a decrease in mortality, from a rate of 23 deaths per 100,000 in 2001 and 14.9 in 2002. In 2002, motor vehicle mortality dramatically increased in Pima (46.9), Santa Cruz (32.6) and Yuma (39.2) Counties.

Healthy Gente Objective 12 : Injury and Violence Prevention Reduce the motor vehicle crash death rate by 25 percent.

Age Adjusted Motor Vehicle Mortality Rate

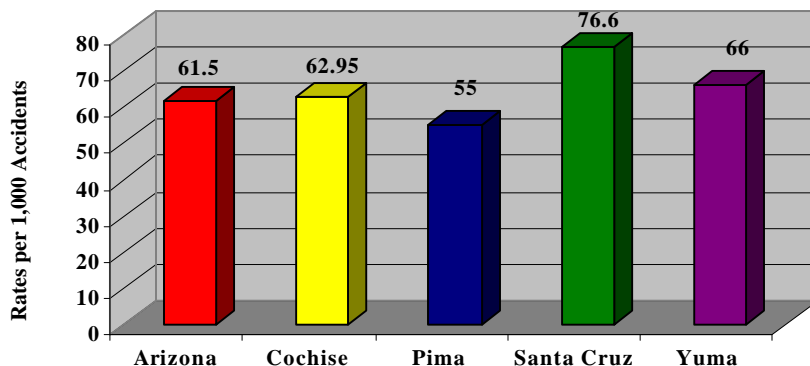

Source: Arizona Health Status and Vital Statistics 2001, Figure 5E-11, 2002, Table 5E-11 1997 National Vital Statistics System, CDC, NCHS

Objectives dedicated to the reduction of deaths caused by motor vehicle accidents can also be found among the Substance Abuse objectives of Healthy Gente-Healthy Border 2010. These preventative objectives are dedicated to the reduction of motor vehicle accidents due to alcohol.

Healthy Gente Objective 22 : Substance Abuse Reduce the motor vehicle accidents related to alcohol by 50 percent.

Motor Vehicle Accidents due to Alcohol by County, Arizona, 2001

Source : Arizona Department of Transportation (ADOT)

In Arizona, 61.5 per 1000 motor vehicle accidents involved alcohol in 2001. In other counties along the border, there were similar accident rates involving alcohol. Although Cochise (62.95), and Pima (55) Counties are close to the Arizona rate, Yuma (66) and Santa Cruz (76.6) were well above the Arizona average for motor vehicle accidents due to alcohol.

Healthy Gente—Healthy Border 2010

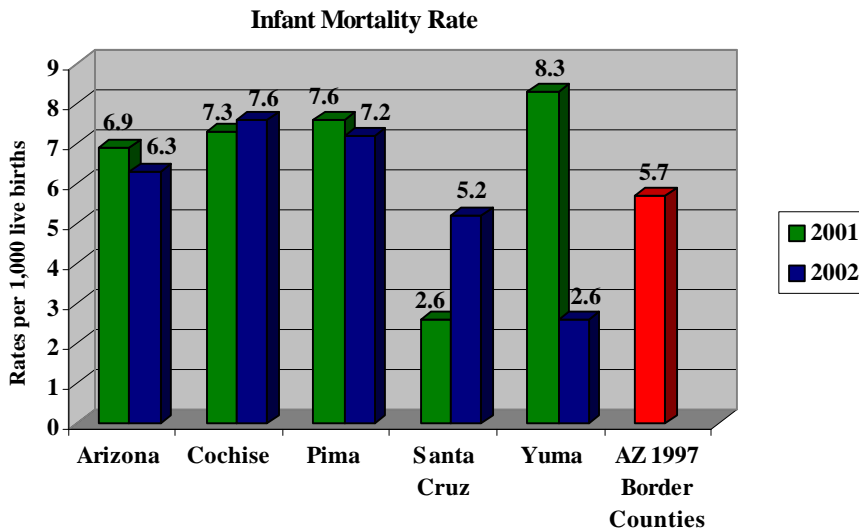

Arizona Border Summary

The following three Healthy Gente Objectives are concerned with Maternal, Infant and Child Health. Infant mortality, or the rate of infant death is an indicator of the health of a community. Infant mortality varies greatly across Arizona border counties. In 2002, the AZ state infant mortality rate of 6.3, was slightly lower than the Cochise and Pima County infant mortality rates of 7.6 and 7.2 respectively. Santa Cruz County infant mortality jumped from 2.6 infant deaths per 1,000 live births in 2001, to 5.2 in 2002.

Yuma County experienced the opposite, with 8.3 infant deaths per 1,000 live births in 2001, down to 2.6 in 2002. Overall, the infant mortality rate for Arizona border counties continued to surpass the 1997 rate of 5.7 infant deaths per 1,000 live births among both Arizona and Sonora residents.

Healthy Gente Objective 14: Maternal, Infant and Child Health

Reduce the infant mortality rate from all causes by 15 percent.

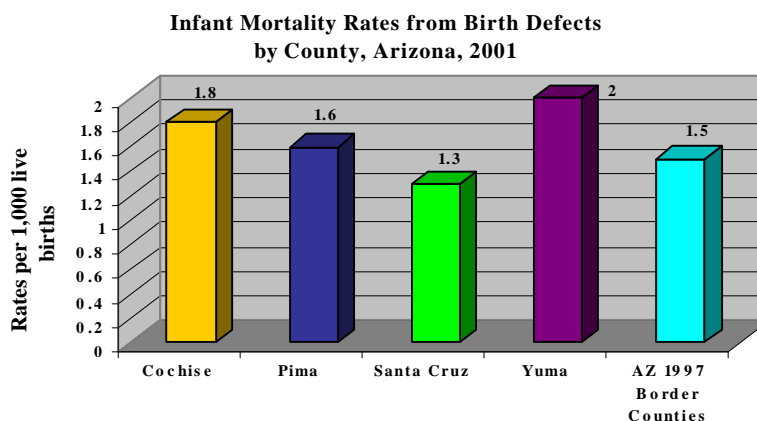

Source: Arizona Health Status and Vital Statistics 2001, Figure 7A-9, 2002, Table 6;325 1997 National Vital Statistics System, CDC, NCHS

Birth defects are a leading cause of infant mortality for infants. In 2001, the Arizona average infant mortality rate from birth defects was 1.8 infant deaths per 1,000 live births, similar rates were noted for all Arizona border counties.

Each border county maintains similar rates to those experienced by Arizona Sonora border county residents at the 1997 baseline survey. Although the Healthy Gente-Healthy Border 2010 objective seeks to reduce infant mortality from birth defects by 30%, it is important to note that each Arizona border county has maintained in close range of the baseline rate.

Healthy Gente Objective 15: Maternal, Infant and Child Health

Reduce the infant mortality rate from birth defects by 30 percent.

Source: Arizona Birth Defects Monitoring Program 1997 National Vital Statistics System, CDC, NCHS

Healthy Gente—Healthy Border 2010

Arizona Border Summary

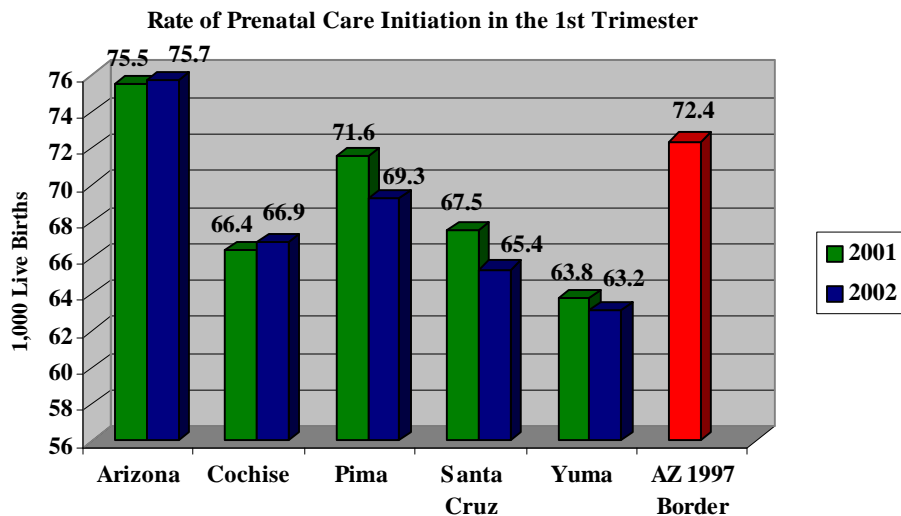

Objective 16 is concerned with increasing the proportion of women beginning their prenatal care in the first trimester (within weeks) of their pregnancy.

Since 1997, Arizona border counties experienced a decrease in the proportion of women who begin prenatal care in the first trimester. Although the AZ rate of initiation was 75% in both 2001 and 2002, there has been a consistent decline in women initiating prenatal care among Arizona border counties over the 2001-2002. In 2002, 66.9% of Cochise County women initiated prenatal care in the first semester of pregnancy, 69.3% in Pima, 65.4% in Santa Cruz and 63.2% in Yuma. All Arizona border counties, except for Pima County experience a 10% disparity in early initiation of prenatal care when compared to the AZ state average of 75%.

HG-HB 2010 Objective 17 is concerned with teenage pregnancy. The pregnancy rate among girls aged 15-17 in the United States is 27 %, in 2002 the Arizona average was 43 %. In 1997, among all Arizona-Border Counties, 44.% of teenagers became pregnant. Cochise County teens aged 15-17 experienced a slight decrease in pregnancy rates in 2002, dropping from 39.9% of 15-17 year old females becoming pregnant in 2001, to 35.8% in 2002. Pima County incurred the opposite, with 43.6% becoming pregnant in 2001, to 44.7% in 2002. And although Santa Cruz County teens were well above the AZ and 1997 base-line averages in 2002, they did experience a decrease in pregnancy rates over the 2001-2002 period, from 48.6% of 15-17 year old becoming pregnant in 2001 down to 46.2% in 2002. Yuma County told a different story in 2002, with only 40% of Yuma teens becoming pregnant in 2001, (well below the AZ and base-line averages) jumping up to 46.5% in 2002.

Healthy Gente Objective 16: Maternal , Infant and Child Health

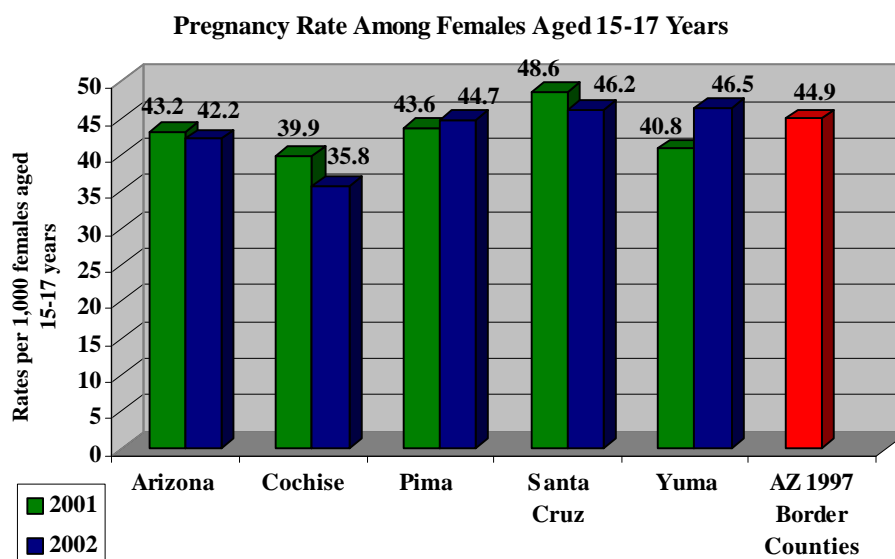

Increase the proportion of women beginning prenatal care in the first trimester to 85 percent.

Source: Arizona Health Status and Vital Statistics 2001, Figure 7A-1, Table 5A-2, 2002, Table 6;325 1997 National Vital Statistics System, CDC, NCHS

Healthy Gente 2010 Objective 17: Maternal, Infant and Child Health

Reduce the pregnancy rate among 15-17 year-olds by 33 percent

Source: Arizona Health Status and Vital Statistics 2001, Figure 7A-1, Table 5A-2, 2002, Table 6;325 1997 National Vital Statistics System, CDC, NCHS

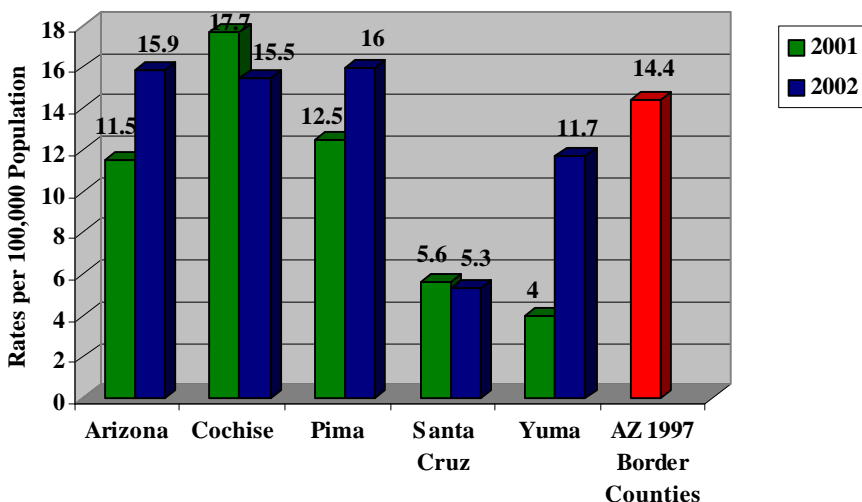

Healthy Gente—Healthy Border 2010

Arizona Border Summary

Healthy Gente 2010 Objective 18 : Mental Health

Reduce the suicide death rate by 15 percent

Age Adjusted Mortality form Suicide

Source: Arizona Health Status and Vital Statistics 2001, Table 5E-11, 2002, Table 5E-11 1997 National Vital Statistics System, CDC, NCHS

In 2002, The state of Arizona experienced an increase in the age adjusted mortality rate from suicide. In 2001, the suicide rate was 11.5 per 100,000 AZ residents and in 2002 this rate went up to 15.9. This increase was also seen in Pima and Yuma Counties. A decrease in the suicide rate was experienced by Cochise and Santa Cruz County residents. In 1997 the baseline suicide rate for all Arizona-Sonora border county residents was 14.4 per 100,000. In 2002, this rate was exceeded by Cochise (15.5), and Pima (16) Counties. Although Yuma County experienced an increase over the 2001-2002 period, their suicide rate of 11.7 remains below the 1997 baseline and the AZ state average. Santa Cruz

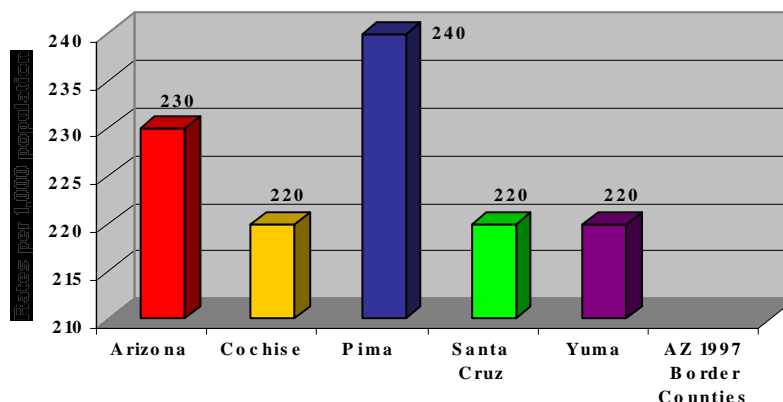

County is the only Arizona border county, which remains well below the AZ state average and the 1997 suicide rate, with 5.3 deaths from suicide per 100,000 Santa Cruz residents. According to the *Arizona Community Profiles*, produced by the Arizona Department of Health Services, in 2000, there were zero Mental Health Providers in Yuma and Santa Cruz Counties, and only 7 Mental Health Providers for the entire county of Cochise, while Pima County was the home to approximately 140 mental health providers.

In the state of Arizona, for every 1,000 people, 230 of them smoke tobacco, this equals 23% of Arizona residents smoke cigarettes. Cochise, Santa Cruz and Yuma Counties had the same prevalence of adults who smoke, averaging 22% of their counties' population as tobacco users. Pima County had a slightly higher rate of 24 percent of it's population smoking. Although nicotine, the major chemical in cigarette is highly addictive, **it is always possible to quite smoking.**

Healthy Gente 2010 Objective 25: Tobacco Use

Reduce to 33 percent the proportion of adults and adolescents that use tobacco.

Prevalence of Cigarette Smoking in Adults by County, Arizona, 2000

Mission

To promote and protect the health of all border area residents through sound and competent public health practices along the Arizona-Sonora border.

Project : Arizona Sonora Health Resource Directory Guide

Objectives :

This Arizona-Sonora Health Inventory and Resource Guide was created to inform border residents of the services that are available to them. This resource guide also serves as a promotion tool for the agencies and organizations that have participated in the project. Although there are numerous projects and programs related to health along the border, many continue to be unknown or unrecognized because of the lack of promotion and exposure within the communities they serve.

Expected Activities and Outcomes :

To develop a health related project inventory guide, on the Arizona-Sonora border in an effort to educate and outreach to the various communities along the border about the Healthy People/Healthy Gente 2010 objectives. The inventory and resource guide/handbook is a tool that is considered a work in progress. It will continue to grow and expand as it becomes more accessible to the public through multiple forms of media. For instance, it will be available online (internet/website), through cd-rom, and in hard copy. The reason and the goal for this kind of dissemination (making it accessible in so many ways) is so that more health agencies and organizations can participate, if they did not have the opportunity to do so before, and to improve upon the distribution of this information.

Target Population :

Health agencies and organizations dedicated to servicing residents living along the Arizona-Sonora border.

Contact Agency :

ADHS-Office of Border Health or US-Mexico Border Health Commission-Arizona Delegation.

Funding Source :

US-Mexico Border Health Commission

Collaborators :

ADHS-Office of Border Health, US - Mexico Border Health Commission-Arizona Delegation, Sonora-Arizona Binational Health Office

Project : Binational Terrorism and Public Health Emergency Response Preparedness

Objectives :

The Office of Border Health provides support and coordination to Terrorism and Public Health Emergency planning and preparedness efforts. These activities are being conducted binationally in collaboration with the Binational Health Office in Sonora.

Expected Activities and Outcomes :

Strengthen the Public Health infrastructure and communication , specifically in terms of development of a binational response plan for public health emergencies occurring on either side of the Arizona Sonora Border. Plan functional exercises in bio-terrorism and emergency response preparedness. Participate in the Arizona-Sonora Binational Health Alert Network (SIREN) :The Secure Integrated Response Electronic Notification (SIREN), will strengthen and maintain the Arizona-Sonora Binational Health Alert Network, in order to provide the needed technology to follow up on projects/programs currently in place including, but not limited to the Binational Infectious Disease Surveillance project (BIDS), the Binational Tb Program, Border Patrol detainees infected with Tb that are deported through the Nogales port of entry, and future projects including the surveillance of Dengue in the Pima County-Ambos Nogales area; compilation and expansion on a Binational Directory of state and local health department personnel; communication of critical health alerts; online disease reporting; binational patient case follow-up; and access to surveillance data, health advisories, emergency response information, diagnostic and treatment guidelines and other data critical to minimizing the impact of public health emergencies.

Target Population :

Arizona -Sonora border region.

Funding Source :

Office of Homeland Security

Contact Agency :

ADHS-OBH

Collaborators :

Office of Emergency Management , Border County Health Departments. Border Tribes, Secretaria de Salud, Proteccion Civil, Fire

Project : Binational Tuberculosis Program

Objectives :

In 1995 the Arizona Department of Health Services in collaboration with the Secretariat of Health of the State of Sonora in Mexico agreed to implement a project with the purpose of assisting in the early detection of possible cases of tuberculosis along the Arizona-Sonora border. Objectives of this project include drug susceptibility testing, adherence to the anti-tuberculosis regimen and preventive therapy to contacts at risk of developing active disease.

Expected Activities and Outcomes :

Coordination of activities between the border county health departments, The Secretariat of Public Health of Sonora, and the Arizona Department of Health Services in the detection, control, home-visits, and follow-up of TB patients. A referral system of binational cases is also in process.

Target Population :

All border residents at risk for Tuberculosis.

Funding Source :

ADHS

Contact Agency :

ADHS - Office of Border Health

Collaborators :

Arizona Department of Health Services in collaboration with the Secretariat of Health of the State of Sonora in Mexico

Project : Border Infectious Disease Surveillance (BIDS)

Objectives :

The Border Infectious Disease Surveillance (BIDS) Project is a network of selected clinical sites that will conduct surveillance for infectious diseases along the border region.

Expected Activities and Outcomes :

The objectives of BIDS are to establish an active, binational sentinel surveillance system to enhance existing passive systems by using standardized data collection and laboratory diagnostic testing; exchange disease incidence rates and risk factor information to enable the development of coordinated binational prevention and control strategies; enhance the public health infrastructure along the U.S.-Mexico border by improving local laboratory diagnostic capabilities and offering training opportunities for local health officials, and; improve binational communications and data exchange.

Target Population :

All individuals at risk for the infectious diseases mentioned in the BIDS Project.

Funding Source :

ADHS

Project : *Healthy Gente***Objectives :**

Healthy Gente outlines a health promotion and disease prevention agenda through the year 2010 for the U.S. communities that border Mexico. This initiative draws on the national health objectives defined in Healthy People 2010, identifying 25 of the most important objectives for the distinct needs and concerns of the border.

The idea of establishing health objectives for the border region was an outgrowth of preparatory work for the U.S.-Mexico Border Health Commission, a group designed to serve as a forum for addressing critical health issues in the border region. The objectives were developed by members of the Design Team, the support group for the Border Health Commission, including the directors of the four U.S. State border health offices. The team used four principles to guide the selection of objectives: a) they should address key health issues on the border; b) they should be limited in number; c) To the extent possible, the objectives should be measurable; and d) they should be compatible with federal and state objectives. The goal was to develop a set of objectives that will resonate with the border population, will be easily understood, and will help to coordinate public and private health programs.

Expected Activities and Outcomes :

Within each U.S. border state, the Healthy Gente program will be implemented in border communities by a consortium of state and local organizations, including the state health department, border health office, local health departments, private health programs and private businesses. The two main expected outcomes for this project include :

Increase the quality and years of healthy life and the elimination of health disparities along the US - Mexico Border.

Target Population :

All US - Mexico Border residents.

Project : *Pediatric Lead Assessment on the US Mexico Border***Objectives :**

In response to a request from the states of Arizona and Sonora, Mexico to document and prevent childhood lead poisoning along the U.S. Mexico border. We formed teams with local professional (nurses, doctors) and lay health care workers (promotoras). These teams received extensive training on how to obtain a fingerstick blood sample and how to operate a portable blood lead analyzer.

Expected Activities and Outcomes :

The investigation concluded that the blood levels of children in this area of the U.S.-Mexico border region do not appear to be a major public health problem. The low prevalence of elevated BLLs documents the success of lead-reduction programs in the community. Nevertheless, the children with blood levels $\geq 10\mu\text{g/dL}$ are of concern. Continued and focused surveillance based on risk factors is important to identifying children with elevated blood lead levels and responding rapidly so that their exposure can be reached as quickly as possible. Community education on ways to reduce or eliminate lead exposure should be continued.

Target Population :

Arizona-Sonora border region in the cities of Agua Prieta and San Luis Rio Colorado in the state of Sonora and in the Yuma County, Arizona, cities of

Project : *US-Mexico Border Health Diabetes Project*

Objectives :

The US/Mexico Border Diabetes Project is a five-year collaborative team effort attempting to determine prevalence of diabetes in the border region, develop binational prevention and control programs for diabetes, and respond to the needs of the border population.

Expected Activities and Outcomes :

To diminish the impact of diabetes of the border population by conducting activities in two related and chronological phases:

1.) Development of a prevalence study
2.) Development of an implementation program for diabetes prevention

Methodology

Households and individuals chosen at random by computer, were monitored closely in the Douglas, Arizona area in order to avoid over-lap of the previous study in reference to the current binational investigation. The main areas selected in Arizona include, Yuma, Wellton, Willcox, Sierra Vista, Douglas, Nogales, and Tucson. Lay Health workers interviewed selected residents and collected their anthropometric measures as well as a blood draw, all of which are used to diagnose diabetes.

Target Population :

All border residents at risk for diabetes.

Mission

To go beyond political changes and create a local focus on our border health issues. To create an effective venue for bi-national discussion to address public health issues and problems which affect the U.S.-Mexico border populations.

Project : Arizona Sonora Binational Immunization Campaign

Objectives :

To increase vaccination coverage to infants and children between 0 to 5 years living along the border area. In keeping with the mission of Arizona Department of Health – Office of Vaccines for Children and the vision of the Secretaría de Salud Pública de Sonora, all children under the age of 18 seeking immunizations will have access to childhood vaccinations during these campaigns.

Expected Activities and Outcomes :

Mexico has a long history of systematic efforts, which have been extremely successful in identifying and vaccinating non-immunized children. Binational, week long campaigns are conducted three times throughout the year in the months of February, June, and October.

In the spirit of creating change in our communities through collaboration and communication, a Binational Immunization Committee was formed to model some of these effective immunization strategies used by the Public Health system of the Secretaría de Salud de Mexico.

The sister communities of Ambos Nogales (both Nogales Arizona and Sonora), Cochise County and their sister communities of Naco and Agua Prieta, Sonora and Yuma County and San Luis Rio Colorado, Sonora have agreed to work jointly to improve the immunization rates of children living along the border.

Target Population :

All children under the age of 18

Project : Cancer and Sexually Transmitted Disease Screening

Objectives :

Prevent cervical and breast cancer and the improve women's medical services by establishing a women's reproductive health clinic in San Luis Rio Colorado and Nogales, Sonora. Through the provision of necessary equipment and reinforcement of existing staff , the cervical cancer screening capabilities of the Hospital General, SSP in San Luis R.C, Sonora Mexico, and the Hospital General de Nogales will be improved. The increase detection of sexually transmitted disease and infections among women seeking care with the MexFam Rural Outreach Clinic will also be reinforced through the provision of necessary laboratory equipment.

Expected Activities and Outcomes :

Decrease cervical cancer mortality rate by 20% , by increasing awareness of early detection and treatment.

Target Population :

Women living in San Luis Rio Colorado, and
Nogales, Sonora, Mexico

Project : Increase Access to Care and Improve Quality of Care**Expected Activities and Outcomes :**

Triage and Stabilization Unit Expansion to Agua Prieta and San Luis Rio Colorado, Sonora

This program has been established to reduce the number of critically ill persons crossing the border to seek medical care in the U.S. while better coordinating and upgrading the care available in their own country. The Arizona Outreach Office also provide support for the transfer of patients to institutions with a higher level of care. In addition, it assures adequate care for U.S. residents touring, conducting, business, or visiting family in Mexico. This triage model is been expanded to Agua Prieta, Sonora and San Luis Rio Colorado, Sonora.

Tohono O'odham Nation Department of Human Services

This outreach activity is designed to increase the quality of life of the Tohono O'odham Nation members residing in Sonora by providing access to health care services.

Tuberculosis Second Line Medications

This program will help acquire second line medications, thereby, improving the treatment of multi-drug resistant patients.

Mission

Address trans-boundary environmental and environmental health issues that affect the Arizona-Sonora border. ADEQ-Border team cover issues related to air quality, emergency response, environmental education, environmental health, hazardous materials and hazardous waste, pollution prevention, transportation infrastructure (as it relates to air quality), water and wastewater infrastructure and water quality.

Project : Arizona Mexico International Green Organization, AMIGO Program

Objectives :

Generate partnerships leading to voluntary pollution prevention activities among border industries in Arizona and Sonora.

Expected Activities and Outcomes :

Promote international private sector collaboration by bringing industries closer together, provide guidance, information and general support, provide annual awards to border industries with exemplary accomplishments for environmental protection while participating in the AMIGO Program.

Target Population :

Industries in the Arizona-Sonora border area.

Funding Source :

EPA

Contact Agency :

ADEQ

Collaborators :

EPA, Procuraduría Federal de protección al Ambiente, Secretaria de Infraestructura Urbana y Ecología , municipal governments in Arizona and Sonora.

Project : *Ambos Nogales Binational Air Quality Dialogue*

Objectives :

Implement actions that will improve local air quality and public health.

Expected Activities and Outcomes :

Facilitate binational dialogue to consensus on action that will be taken to improve air quality and reduce the public health risk by reducing the particulate matter and emissions generated by or from unpaved traffic areas, vehicle emissions, traffic congestion, soil erosion and residential emissions (wood and garbage burning), the recommended actions and next step to implementation are described in the "Plan of Action to Improve Air Quality in Ambos Nogales"

Target Population :

Nogales and Rio Rico, Arizona and Nogales, Sonora

Funding Source :

EPA

Contact Agency :

ADEQ

Collaborators :

Secretaria de Infraestructura Urbana y Ecología, U.S. State Department, Secretaria de Relaciones Exteriores, Arizona Department of Health Services, Secretaria de Salud Publica, Santa Cruz County, municipalities of Nogales, Arizona and Nogales, Sonora and a variety of other agencies in both countries who have a role in local air quality.

Project : *Ambos Nogales Binational Air Quality Educational Outreach Campaign*

Objectives :

Ensure public support for and participation in activities to improve local air quality.

Expected Activities and Outcomes :

Increase to a greater degree of Public awareness and individual actions to help improve air quality. Publish and disseminate the Ambos Nogales Clean Air Calendar (4th year) and

The Breath Easy report (newspaper column). Disseminate of a series of air quality pamphlets, promotional material in the form of bumper stickers, magnets and t shirts. Use Billboard/bus placard campaign and public service announcements on TV and radio about garbage burning, vehicle emissions, as a to for the promotion for alternatives modes of transportation.

Target Population :

Nogales and Rio Rico, Arizona and Nogales, Sonora

Mission

The mission of the Office for Children with Special Health Care Needs is to continuously improve comprehensive systems of care which enhance the health, future, and quality of life for children with special health care needs, their families, and the communities in which they live.

Project : Arizona Early Intervention Program (AzEIP)

Objectives :

Provide developmental evaluation services for infants and toddlers (0-3) who are experiencing delays and may benefit from early intervention.

Expected Activities and Outcomes :

The five state agencies work together to provide a comprehensive system of early intervention for children with special health care needs under the age of 3 and their families

Target Population :

Infants/toddlers 0-3 exhibiting developmental delays statewide.

Contact Agency :

ADHS-Office for Children with Special Health Care Needs

Funding Source :

Part C, Title IXX, Title V

Collaborators :

Department of Economic Security, Arizona Health Care Cost Containment System (AHCCCS), Department of Education, Arizona School for the Deaf and Blind (ASDB) and ADHS

Project : Asthma Program

Objectives :

To reduce morbidity and mortality due to asthma.

Expected Activities and Outcomes :

Development of local coalitions that will develop and implement community based programs to address the needs of children who have asthma

Target Population :

Statewide

Contact Agency :

Office for Children with Special Health Care Needs

Funding Source :

Title V: Maternal and Child Health Block Grant

Collaborators :

Arizona Asthma Coalition, American Lung Association - Arizona Affiliate, Maricopa County Health Department, Pinal County Health Department, Phoenix Children's Hospital

Project : Children's Rehabilitative Services (CRS)**Objectives :**

Assure the highest quality comprehensive care for the function improvement of medically qualified individuals through a family centered, interdisciplinary team approach in a cost effective managed care setting.

Expected Activities and Outcomes :

Improve case finding techniques, increase outreach services to rural areas, decrease waiting times for CRS outpatient clinics, decrease length of stay in hospitals, increase the proportion of ambulatory to inpatient surgeries, avoid duplication of services, and increase the availability and accessibility of multi-specialty, interdisciplinary services.

Target Population :

The target area is the state of Arizona. The target population is children with special health care needs 0-21 years of age who have certain medical, handicapping or potentially handicapping conditions.

Contact Agency :

ADHS-Office for Children with Special Health Care Needs

Funding Source :

A combination of funding is received from state and federal sources. ADHS collects Federal funding from the AHCCCS Administration for Title XIX

Collaborators :

The program provides statewide services through four regions, each with its own hospital and physician support. Currently, the northern regional clinic is in Flagstaff. The western regional clinic is in Yuma. The southern regional clinic is in Tucson, and Phoenix is the home of the central regional clinic. In addition to four regional sites, services are provided through field clinics at specified locations throughout the state.

Project : Community Development**Objectives :**

To develop parent led self-reliant, self-sustaining community organizations to mobilize local, state and federal resources to improve the quality of life for children with special health care needs and their families.

Expected Activities and Outcomes :

1. Protocol for Community Development/ Promoting Community Change for Children with Special Health Care Needs (Hunter/Homan): Upon Community Selection, Identifying and/ or Develop Community Group of Investors/ Stakeholders. Communities may enter the process either through invitation or self-selection. Families, Service providers and agencies, community leaders and existing groups are identified. Interest in the Needs-Resource Assessment/ Community Development process is ascertained. A relationship is established with either an existing group, or a new group is formed. A team of Parent Community Leaders is identified and placed under contract to serve as liaisons, developers, and coordinators of activities and communication.

2. Conduct a Community Needs/ Resources Assessment

The sponsoring community group/team and Parent Community Leaders plan needs/resources assessment process. Parents are identified who may serve as surveyors, times and locations of forums noted, and arrangements finalized. Parent and Provider Community Forums are held, interviews and surveys completed and community data compiled. An identification of community resources is integrated into the process, identifying special citizen skills, talents and knowledge as well as professionals, service organizations and natural resources.

3.Data Analysis

Information gathered through the Needs/Resources Assessment process is compiled and analyzed by OCSHCN staff, Parent Community Leaders, the Community Planning Team, and System of Care Team/ Agency staff. A written Community Report Card, Issue Things to Consider, and Community Profile is completed. The Workbook for Community Change is updated with specific community documents, identifying resources as well as issues.

4.Community Presentation of Needs/ Resources Assessment Results.

The results of the Needs/ Resources Assessment are presented back to the community according to plans made by the sponsoring community action group. Community team members present the results to the assembled community team and forums participants, and solicit their participation in taking action. The community team may consist of families who have children with special health care needs, young adults who are disabled, service providers and agencies, advocacy groups, interested community and business leaders and elected officials.

5.Community Action.

The community identifies one or two issues to resolve within a specified time frame. Parent Community Leaders organize and sustain action to resolve identified action. The community team pursues all potential resources, intrinsic and financial, to accomplish their goals, continually connecting people and resources with each other, sharing talents and energy. Once substantial progress is made on the initial issues, the community team prioritizes and resolves additional family and community issues for action.

6.Ongoing Community Support/ Increasing Leadership/ Linking of Communities.

Parent Community Leaders, through ongoing support and technical assistance by OCSHCN staff and consultant, continually seeks and promotes new community leadership and learning. Linking strategies of regularly held conference calls, get-togethers, and conferences assist leaders and members of their respective teams to learn from, coordinate with and support one another, both from within their own communities and among other communities. Community teams, mentoring other community teams, exchange information and techniques, building statewide strength and power bases to produce both community and state level change.

7.Measuring Success

Working in partnership, Parent Leaders, Community Action Teams and OCSHCN identify indicators of their success utilizing the Elements of Community Development as a guide. Realizing that everything happens through relationships, parent leaders and community team members, are reinforced for their talents, energy and interest in improving the system of care by identifying and recognizing their successes.

8.State Level Support and Responsibility

The State Level System of Care Team, through coordination and communication with Parent Leaders and Community Teams, supports community initiatives by identifying system barriers and responsibilities for change, with the goal of promoting desired community change for all children and especially for those with special health care needs.

9.Transference of Community Development Philosophy and Protocol to other Elements of the Service Delivery System
Other participants of the system of care are positively influenced and altered through communication and education of the principles, activities and strategies of the Community Development Philosophy and Protocol, thereby promoting a community based, parent driven service delivery system.

Target Population :

The goal is to eventually provide services statewide. Currently programs are available in the following communities: Page, Prescott, Prescott Valley, Chino Valley, Bullhead City, Yuma, Somerton, San Luis, St. Johns, Springerville, Eager, Mesa, Flagstaff, Douglas. New communities are consistently being identified.

Contact Agency :

ADHS-Office for Children with Special Health Care Needs

Funding Source :

Title V Maternal and Child Health Block Grant,
Other Grants or Donated funds

Collaborators :

Each community has formed partnerships and community action organizations. Parents with children with special health care needs provide leadership and management to the organization, which also consists of parents and professionals from various entities within their community. The sectors are: medical, social service, education, public health and community. Examples of community team membership include: Public Health and School Nurses, School District Superintendents or Special Education Directors, City Officials, Physicians, Social Service Providers and others.

Project : Arizona Sickle Cell Anemia Program

Objectives :

To work in partnership with families and other team members to develop and implement the Individualized Family Service Plan, Family Service Plan or Individualized Service Plan for children/teens with chronic medical, developmental delays, or Traumatic Brain Injury, recognizing that the family is the child’s most important resource. To assist families in acquiring the knowledge and skills they need to support the development of their child who has special needs. To help families communicate and coordinate services among all providers. emphasizing the team approach.

4.To assist families in identifying their priorities, resources and concerns and accessing resources / services within their community.

Expected Activities and Outcomes :

The Arizona Department of Health Services provides service coordination assistance for families with children birth to three years of age who are eligible for ADHS/Arizona Early Intervention Program. The children may have metabolic disorders, neural tube defects (spina bifida), severe attachment disorders, pediatric under-nutrition/failure to thrive, or other medical conditions/disorders that impact 50 % or more of their developmental milestones. Examples include: children who have an exceptional need for coordination of multiple service providers and resources; families presenting with multiple children with special health care needs needing coordination of medical services; children/families needing time limited assistance to accomplish discharge or transition to other service providers; children ages of 2 and 17 years of age who have had a traumatic brain injury and are within 2 years post injury.

Target Population :

Families with children birth to three years of age statewide.

Mission

To strengthen the family and the community by promoting and improving the health status of women, infants and children.

Project : *Newborn Screening Program (comprised of Newborn Endocrine/Metabolic/Hematological Screening [NBS] and Universal Newborn Hearing Screening [UNHS])*

Objectives :

New Born Screening Program (NBS) : The objective is to identify those babies who have specific serious medical conditions. Finding these babies and providing them with early treatment can prevent serious problems, such as mental retardation or even death.

Endocrine/Metabolic/Hematological Screening [NBS] and Universal Newborn Hearing Screening [UNHS]he objective is to identify those babies who have a hearing loss by 1 month of age, so they can be diagnosed and receive intervention services early. Finding these babies and providing them with appropriate intervention helps assure that they have the opportunity to acquire the language, social and cognitive skills that will ensure their success in school and society.

Expected Activities and Outcomes :

Health Practitioners (physicians, nurse midwives, lay midwives, primary care providers) are responsible for: ordering the screening tests for newborn infants in their care; informing parents about the screening tests; collecting, handling and submitting of newborn screening specimens; promptly following-up with families in the event of an abnormal result; and providing appropriate medical monitoring/referral to specialists.

Hospitals, practitioners, and/or their contracted laboratories collect and submit specimens for testing.

Arizona Department of Health Services - State Laboratory tests the specimens for the designated diseases and reports results to the physicians listed on the form. The Laboratory reviews the specimens for acceptability, performs the screening tests, keeps records of the tests performed, and conducts quality control studies of laboratory methods and practices.

Target Population :

All babies born in Arizona

Funding Source :

NBS – Newborn screening fund (funding from fees paid by the submitters of the specimens being tested).

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Collaborators :

Health Practitioners (physicians, nurse midwives, lay midwives, primary care providers)
Hospitals and/or their contracted laboratories
Arizona Department of Health Services - State Laboratory
Arizona Department of Health Services - Newborn Screening Program
Medical specialists (pediatric endocrinologists, metabolic geneticists, pediatric hematologists, pediatric audiologists)
Arizona Department of Health Services – Children’s Rehabilitative Services Program
Arizona Schools for the Deaf and the Blind

Project : Sensory Program

Objectives :

Improve the health of Arizona Children by identifying hearing and vision problems early through school screening programs.

Expected Activities and Outcomes :

All children enrolled in Arizona schools will have their hearing and vision screened.

Target Population :

Children in pre-school, public schools, private schools and charter schools.

Funding Source :

Maternal and Child Health Block Grant

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Collaborators :

University of Arizona, Department of Education, Audiologists, Optometrists, public health nurses and others in the sensory professions

Project : Child Health Grant

Objectives :

Reduce the rate of deaths caused by motor vehicle crashes.
Reduce hospitalizations for nonfatal injuries and poisonings per 100,000 adolescents age 15 through 19.
Increase the proportion of children who receive dental care each year.
Reduce the rate of children 1 through 14 hospitalized for ambulatory care sensitive conditions per 100,000.

Expected Activities and Outcomes :

Reduced mortality and morbidity of children. Increased access to health care.

Target Population :

Statewide/low income families

Funding Source :

Title V MCH Block Grant

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Collaborators :

Pima County Health Department; Southeast Arizona Behavioral Health Services; AHCCCS, Bureau of Emergency Medical Services, Asthma Coalition, American Lung Association, Office of Oral Health

Project : Reproductive Health/Family Planning**Objectives :**

To provide comprehensive reproductive health/family planning services, which include:

Initial/annual exams
Physical assessment
Laboratory testing
Medical, social, reproductive history
Fertility regulation
Infertility services
Pregnancy diagnosis and counseling
Adolescent services
Sexually transmitted disease screening
Client education
Client counseling
Information and referral services

Expected Activities and Outcomes :

Low-income families will have increased access to health care and will receive preventative services.

Target Population :

Statewide/Low-income individuals

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Funding Source :

Title V, MCH Block Grant

Collaborators :

Cochise County Health Department; Yuma County Department of Public Health; Arizona Family Planning Council; Arizona Family Planning Coalition

Project : Child Health Indicator Program**Objectives :**

Gather data regarding health concerns of children in participating schools

Expected Activities and Outcomes :

Market CHIP to school nurses. Train school nurses and ITS employees from participating schools on how to use CHIP. Offer "Help Desk" Services. Gather data from participating schools. Create reports with the aggregate data.

Target Population :

School Nurses Statewide

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Funding Source :

Title V

Collaborators :

AZ School Nurse Consortium, School Nurses

Project : Health Start Program**Objectives :**

To increase prenatal services to at risk pregnant women, reduce the incidence of low birth weight babies, reduce the incidence of children affected by childhood diseases, increase the number of children receiving age appropriate immunizations by two years of age, educate families on good nutrition habits, preventative health care and child development

Expected Activities and Outcomes :

Reduction in low birth weight babies born to program mothers, early entry into prenatal care, increased immunization rates among index children.

Target Population :

High Risk pregnant women in a variety of communities around the state. The following service communities are in close proximity to the Arizona-Mexico border; Douglas, Bisbee, Nogales, Elgin, Patagonia, Tubac, Yuma, Somerton, San Luis, Sumerton, East City and Wellton.

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Proposition 204 tobacco tax settlement funds

Collaborators :

County Health Departments and Community Health Centers

Project : County Prenatal Block Grant (Cochise, Santa Cruz and Yuma Counties)

Objectives :

Provide pre-natal classes and breastfeeding classes
Reduce the rate of low birth weight babies
Referral and linkage of community services
Education on women's health and it's impact on birth outcome
Child safety and health programs
Teen program (cases management)
Tobacco, alcohol and drug education and impact on birth outcome

Expected Activities and Outcomes :

Prenatal classes that educate women on childbirth, healthy lifestyles and birth outcome, importance of breastfeeding and infant health, child safety (i.e., car seat training and provision), case management programs for women and teens who are considered to be at risk

Target Population :

All women of child bearing age, infants and children.

Contact Agency :

Arizona Department of Health Services, Bureau of Community and Family Health Services

Funding Source :

ADHS

Collaborators :

Private and Public health care providers and social service agencies.

Project : Abstinence Until Marriage Education

Objectives :

To reduce teen pregnancy and rates of Sexually Trnsmitted Disease among this population.

Expected Activities and Outcomes :

Unavailable

Target Population :

Children and adolescents 9-18 years, and their parents.

Contact Agency :

Mission

To enhance the Quality of life for all children and their families.

Project : Community Assistance of Southern Arizona (CASA)

Objectives :

Reduce the community's exposure to environmental pollutants, by linking members of the community who are affected by adverse environmental conditions with health care providers. Provide relevant and culturally sensitive information about environmental pollutants to promote a community -wide interest in the project. Act as liaison between researchers and communities and help disseminate research results in an easy to understand format. Reduce the number of visits to the school nurse caused by respiratory illness. Reduce the number of childhood lead and arsenic poisoning reported by doctors and laboratories. Finish the testing for items of concern for heavy metals. These items include home remedies,

and candies. Develop survey instrument appropriate for each community based on the Nogales instrument. Conduct a minimum of 200 home visits in each community (Nogales, Douglas, Southern Tucson, Yuma). Conduct six workshops for parents and children in each community. Present at least on radio broadcast for each community. Develop at least one school program other than the workshops in each community. Of those identified as having health affects from environmental pollutant, assists at least 75 percent of those not currently under medical supervision to obtain medical care and conduct at least on workshop for acacias and yerberias on the heavy metal content of home remedies.

Expected Activities and Outcomes :

Program Goal : Reduce the communities exposure to environmental pollutants. Activities: Training of Promotoras on new information and procedures; Conduct a minimum of 200 home visits in each community; Provide relevant and culturally sensitive information about environmental pollutants; Conduct 6 workshops for parents and children in each community.

Develop one school program other than the workshop.

The following outcomes are expected:

Increase the knowledge of 75% of the participants that complete home visits ; Increase community awareness; Increase the number of asthma educational programs provided in schools; Complete 100% of educational workshops; Of the 200 homes visited, complete mitigation in at least 85% of homes requiring and desiring mitigation; Reduce the number of childhood lead and arsenic poisoning cases reported by doctors and laboratories by 2 percent.

Complete outreach to 100 pharmacies and yerberias in Nogales, Arizona.

Program Goal --Link members of the community who are affected by adverse environmental conditions with health care providers

Activity--Of those identified as having health affects from environmental pollutants under medical supervision to obtain medical care.

Outcomes--Assist at least 75% of those not currently under medical supervision to obtain medical care.

Program Goal--Act as liaison between researchers and the communities and help disseminate research results in an easy to understand format.

Activities--Finnish the testing for items of concern for heavy metals. These items include home remedies, and candies.

Continue to work with the University of Arizona.

Development and use of existing material.

Outcomes--Complete 100% of the testing of the home remedies.

Mission

Crossroads Mission is a Christian organization dedicated to helping individuals who find themselves at a "crossroads" in their lives. Our goal is to help them make that turn that will bring them to a personal encounter with God, and to help them make changes that will result in better lives.

We offer life-changing, individualized programs leading to stable employment and independent living. With the help of caring donors like yourself, we are able to reach out to the chemically dependent, the needy, and the homeless of Yuma County and its surroundings..

Project : Serenity House

Objectives :

To help disadvantaged, disabled and disenfranchised individuals and families achieve a better quality of life.

Expected Activities and Outcomes :

Our services are coordinated by individual case management and education plans. Our Case Managers and Instructors identify individual goals and needs, the services required to meet these goals and partner with the client to accomplish these goals as an achievement for a better quality of life.

Target Population :

Homeless, Alcoholics, Addicts, Near Homeless, The Poor and Those That Are In Need

Contact Agency :

Crossroads

Funding Source :

Community contributions, state funding, other grants.

Collaborators :

Housing Authority of the City of Yuma, City of Yuma, County of Yuma, Western Arizona Counties of Governments, Department of Economic Security, Arizona Coalition to End Homelessness, Yuma Regional Medical Center, Salvation Army, ET. Al.

Project : *Renewed Life Program, Education Center, Family Shelter, Homeless Shelter.*

Objectives :

To help disadvantaged , disabled, and disenfranchised individuals and families achieve a better quality of life.

Expected Activities and Outcomes :

Our services are coordinated by individual case management and education plans. Our Case Managements and Instructors identify individual goals and needs, the services required to meet these goals and partner with the client to accomplish these goals as an achievement for better quality of life.

Target Population :

Homeless, Alcoholics, Addicts, Near Homeless

Project : *Crossroads Recovery Life Skills Program*

Objectives :

To assist the addicted to overcome their self-defeating, addictive behaviors to attain a higher quality of life through remission from chemical dependence.

Expected Activities and Outcomes :

Remission from substance dependence and return to being “normal” productive members of our community.

The Life Skills Program is a complete drug and alcohol recovery program. It features:

A Chemical Withdrawal Unit that allows for safe and supervised detoxification, open 24 hours a day, 7 days a week, 24 hour monitoring by qualified medical technicians. All cases overseen by a Medical Doctor. Including a 120 day residential program following detoxification based on 12 step method and Christian principles. Crossroads offer Individualized counseling, group meetings, spiritually/religious oriented meetings and activities.

Target Population :

Any person who meets the assessment criteria (DSM IV criteria for substance dependence.

Contact Agency :

Environmental Education Exchange

Border Programs

738 N. 5th Avenue, Suite 100

Tucson 85705 Arizona

Phone (520) 670-1442

Fax (520)-670-1443

E-mail jmarcos-iga@eeexchange.org

Website www.eeexchange.org

Mission

The Environmental Education Exchange is a nonprofit 501(c)(3) organization established to enhance and expand the environmental literacy of inhabitants and visitors in the unique desert regions of the southwestern United States and northwestern Mexico.

Project : *Border EE Web***Objectives :**

Beginning in 1997, the EE Exchange maintained a searchable online database of over 350 EE resource providers in Arizona and New Mexico. As this type of website has proven valuable, more recently the website has been updated and the project has been expanded to encompass a much larger geographic area.

Expected Activities and Outcomes :

Provide information on over 1100 agencies and organizations along the border, as well as information from entities throughout Arizona and New Mexico.

Teachers, other educators, and the general public can search this easy-to-use database by state, organization or agency name, audiences served, program theme, and materials format. New EE providers can be added at any time, and existing entries can be easily updated. Visitors are encouraged to fill out a user profile (although this is not required to access the site), so that they may receive future information specific to their environmental education interests. Fully bilingual, with two portals of entry, so that it can be accessed completely in Spanish or in English. Entries from both sides of the border can be accessed from either portal, that is, in either language

Target Population :

All individuals interested in the Environmental Education Efforts along the US-Mexico border.

Contact Agency :

<http://www.redefronteriza.net>

Funding Source :

U.S. Forest Service, Region 3, Public Affairs Office

Collaborators :

Unavailable

Project : *Mission 3R: A Challenge for Change***Objectives :**

Increase understanding and stimulates excitement about the "three R's" with a message that encompasses reducing, reusing, recycling, composting, recycling, buying recycled, and more. Through a unique educational software program distributed on CD-ROM.

Expected Activities and Outcomes :

The interactive segments are framed in an opening and closing that provide a meaningful context, with Spike explaining how the choices we make every day (to reduce, reuse, recycle, buy recycled, and compost) can help conserve natural resources and protect Arizona's natural environment. These segments feature beautiful nature photography as well as many images of items meaningful to students.

Target Population :

Upper-elementary students

Contact Agency :

Environmental Educational Exchange

Collaborators :

Recycling Office of the Arizona Department of Environmental Quality, schools and students

Project : *Tucson's Water Conservation Education Programs*

Objectives :

Create literacy among students regarding the water cycle, water resources, and water quality as well as prepare youth to better understand, when they take on adult roles, the complex and pressing water conservation issues facing southern Arizona.

Expected Activities and Outcomes :

Our Water, Our Future: Teach the Ways of Water, a two-part program consisting of five teacher-led activities followed by an interactive 90 minute presentation from a Tucson Water educator. Our Water, Our Future has reached over 700 classes and is now an institution for many local fourth and fifth grade teachers.

The Water Info Van Program, which begins with a short video, soon became known as Da Drops in honor of the animated talking water drops that take students on a journey beginning in the clouds and ending in the kitchen sink. After this brief video, the presentation focuses on groundwater model activities in which students experience changes in how people have used water over time.

The Tucson Toolkit: Perspectives on Our Water, a five-unit curriculum developed for middle school science teachers to integrate into their lesson plans. The Tucson Toolkit contains nine engaging hands-on activities such as collecting transpiration from leaves, constructing a miniature Mount Lemmon, and building a model to investigate groundwater contamination. In the culminating activity, after the class has learned why water is such a precious and limited resource in southern Arizona, students measure the flow rate of their showerheads at home. Those who report high flow rates receive a free water-saving showerhead. The Tucson Toolkit differs from the elementary school programs in that no presenter visits the classroom and all of the activities are led by the science teacher.

Target Population :

Elementary school children and teachers.

Contact Agency :

Environmental Exchange

Funding Source :

Tucson Water's Conservation Office

Collaborators :

Tucson Water

Project : *ToxRap Workshops*

Objectives :

ToxRAP (Toxicology, Risk Assessment and Pollution) is an innovative, K-9 curriculum that utilizes concepts from toxicology and environmental health risk assessment to teach applied science.

Expected Activities and Outcomes :

In the context of investigations about environmental health problems relevant to their lives, students develop basic skills in critical thinking, decision making, scientific inquiry, mathematics, language arts and communication.

Target Population :

The three modules or volumes in the ToxRAP curriculum series are for Early Elementary (grades K-3); Intermediate Elementary (grades 3-6); and Middle School (grades 6-9).

Contact Agency :

Environmental Education Exchange

Funding Source :

Center for Toxicology / Southwest Environmental Health Sciences Center at the University of Arizona

Collaborators :

Environmental and Occupational Health Sciences Institute (EOHSI), in New Jersey, and funded by the National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH)

Project : *Training and Environmental Education Materials (TEEM)*

Objectives :

The Environmental Education Exchange is implementing this project with the guidance of diverse groups of environmental educators working along the U.S.-Mexico border. The project includes conducting regional environmental education needs assessments, providing training, organizing professional development opportunities, and otherwise enhancing the capacity for environmental education along the U.S.-Mexico border.

Expected Activities and Outcomes :

Participants in the TEEM effort are asked to take responsibility for identifying their own EE training needs. Appropriate trainings are then organized, and the participants are engaged in suggesting strategies for further dissemination of the process; they then help to implement their own recommendations. Thus professional development is only one facet of the project. By its very nature, the TEEM process offers excellent opportunities to further collaboration and to establish new partnerships which focus on the provision of EE programs and services for Hispanic audiences specifically and border residents in general.

The project's work plan includes the following tasks:

- Collect information and form a core planning team;
- Convene an organizing committee;
- Identify needs of EE practitioners in the region;
- Design strategies, programs, or project options;
- Select appropriate project(s) and target audience(s) for action; and
- Build in a framework that can provide follow-up support for the long term.

Key goals of the project are to:

- Identify priority environmental issues and related environmental literacy needs within communities;
- Examine options for ways to improve environmental education;
- Elaborate and/or plan strategies, programs, or projects to meet identified needs;
- Form support networks to help implement strategies, programs, or projects; and
- Create a broad base of support that will help monitor program progress, evaluate the effects, and make any adjustments needed to sustain the process into the future.

Target Population :

Hispanic audiences, a typically underserved group in general as identified by the EE community at large.

Contact Agency :

Project : The Tohono O'odham Environmental Education (TOEE) Project

Objectives :

Further environmental education on the Nation by identifying environmental education resources and opportunities and assisting schools and communities with the integration of selected educational projects.

Expected Activities and Outcomes :

Bridging gaps of communication between schools and the Nation's resource offices through the development of a "Directory of Tohono O'odham Educators and Resource Personnel"; assisting with the development of a traditional native gardening project for Tohono O'odham High School; assisting with the organization of environmental projects for the Native American Clubs at both high schools on the Nation; assisting with the development of a pollution prevention outreach program; and organizing a "Tohono O'odham Cultural and Environmental Resources and Opportunities for Teachers" in-service workshop for the Nation's teachers.

Target Population :

Members of the Tohono O'odham Nation

Contact Agency :

Environmental Education Exchange

Funding Source :

EPA's Border XXI Program

Collaborators :

Tohono O'odham Environmental Office and the Tohono O'odham Department of Natural Resources

Project : Border Environmental Education Resource Guides

Objectives :

Provide two new Border Environmental Education Resource Guide(s), one for the eastern and another for the western borderlands.

Expected Activities and Outcomes :

Each guide also includes a set of thematic indices, by state, with such headings as agriculture, biodiversity, occupational safety, sustainable development, water, wildlife, and many others. This allows users to quickly locate the types of entries that most interest them. One guide addresses the western U.S.-Mexico borderlands and lists agencies, organizations, and businesses involved in environmental education in southern California and southern Arizona, as well as northern Baja California and northern Sonora. (This western guide is actually a second edition.) The other guide of the set addresses the eastern U.S.-Mexico borderlands and lists EE providers in southern New Mexico and Texas as well as northern Chihuahua, Coahuila, Nuevo Leon, and Tamaulipas. Each guide contains both an English section and a Spanish section, with all entries fully translated, so that the information can be conveniently accessed by any interested person

Target Population :

All programs, studies and efforts relating

Funding Source :

Project : Juntos: Intercultural Environmental Studies in the Western Borderlands

Objectives :

Create bridges of communication between schools, community resources, and regional environmental organizations.

Expected Activities and Outcomes :

The Student Guide coupled with the overall curriculum aims to expose students to relevant local environmental information and issues and facilitate student participation in local environmental projects. Activities in the curriculum are cross-referenced to the Student Guide to Environmental Resources and Opportunities, encouraging students to contact local environmental organizations to gain more information on specific topics, invite guest speakers, or investigate potential student projects with the organizations.

Target Population :

30 schools are involved in the program, including the two high schools on the Tohono O'odham Nation

Funding Source :

Collaborators :

International Sonoran Desert Alliance, Intercultural Center for the Study of Deserts and Oceans (CEDO), Organ Pipe Cactus National Monument, The Tohono O'odham Nation, the Arizona-Sonora Desert Museum, CREAS, and the Upper Gulf of California Biosphere Reserve, teachers, resource personnel, and administrators from project communities in Arizona, Sonora, and the Tohono O'.odham Nation

Project : Chihuahuan Desert Bioregion Environmental Education Needs Assessment

Objectives :

Working in partnership with the World Wildlife Fund (U.S.), the Exchange has recently completed the process of gathering detailed information on environmental education programs, materials, and providers throughout the Chihuahuan Desert Bioregion. The work area includes portions of the states of Texas and New Mexico in the U.S. and portions of Chihuahua, Coahuila, and Nuevo Leon in Mexico.

Expected Activities and Outcomes :

The educational needs of residents of the Chihuahuan Desert from young school children to adults are being analyzed in the context of conservation priorities.

Target Population :

Environmental educators from the US-Mexico border region

Mission

Improve the quality of life for those we serve: working collaboratively within our diverse region to promote community wellness and to provide an array of quality behavioral health services which are accessible, cost effective, and offered in a respectful, caring, and culturally sensitive manner

Project : General Mental Health Services

Objectives :

All SEABHS outpatient clinics offer a variety of General Mental Health Services.

Expected Activities and Outcomes :

Provide psychiatric medications, medication monitoring, individual therapy, marital therapy, family therapy, group therapy, and case management services (i.e. transportation, housing referrals, vocational rehabilitation referrals) to General Mental Health clients.

Depending on the particular clinic, therapy could include anger management, stress management, sex abuse survivor's groups, depression groups, anxiety groups, hypnosis, and other modalities.

Target Population :

Adults, 18 and older who do not receive services through our SMI and substance abuse programs.

Contact Agency :

SEABHS

Project : Community & Prevention Services

Objectives :

Provide a variety of trainings and technical assistance including :Conflict Resolution , Various Trainings & Technical Assistance , Community & Youth Empowerment Programs , Prevention Resource Library/Materials (Includes Spanish versions) Workshops/Retreats

Target Population :

All age ranges and all client populations, children, adolescents, and adults, of Cochise and Santa Cruz Counties, whether they are enrolled with CPSA and SEABHS or not.

Contact Agency :

SEABHS

Project : Chemical Dependency Services

Objectives :

SEABHS substance abuse treatment programs are committed to improving the quality of life for the people we serve in a respectful, caring and sensitive manner. Our programs are built around the belief that the problems created by the use of drugs and alcohol can be stopped through the development and implementation of personal plans of recovery.

Expected Activities and Outcomes :

Substance Abuse Education: Group sessions focused on education about drugs of abuse and the effects on the individual and family.

Substance Abuse Education for Families: Education groups for family members offering age-appropriate information to parents, spouses and children from substance abuse affected families.

Intensive Outpatient Programs: This is designed for those people and families who need a higher level of support. It involves a minimum of 9 hours per week of group treatment in addition to other necessary services the family may need.

Outpatient Group: A three- hour per week group program with the goal of assisting the individual to develop a relapse prevention plan. People may be referred directly into this service or may be recommended to attend this group as a follow-up to the Intensive Outpatient Program.

Continuing Care Groups: Usually a follow up group to the Outpatient Group, the goal of the Continuing Care Group is to provide on-going support and counseling to individuals who are transitioning to life after the end of treatment.

Family Group: Throughout the course of treatment family group is offered. This is to help the entire family, spouses, parents and children, in making the changes needed for a substance-free life. Families receive support, education and counseling.

Individual Counseling: One- to- one sessions with the Substance Abuse or Mental Health Counselors is offered as an adjunct to the treatment program.

Family Counseling: This is an important component of the treatment program designed to assist families on an individual basis in making changes, improving communications and developing plans of recovery.

Detox services: Through its SEAPHF program SEABHS offers medically necessary detox. For other detox services SEABHS counselors assist in finding placement.

Residential Treatment: SEABHS believes it is important for people to remain in their communities, families and jobs during the treatment process. However there are times when a person is unable to succeed in the outpatient setting. For those individuals SEABHS counselors assist in finding residential placement through insurance, SEABHS contracts or

other public programs. Upon discharge from the residential setting, individuals are encouraged to enroll in the outpatient programs.

DUI Services: SEABHS is a provider for DUI screening, DUI Education and DUI Treatment

In addition to these programs, specialty groups are available through SEABHS or by referral to other agencies. These include Anger Management groups, gender specific groups like Women's Groups, groups for Pregnant and Parenting Women, Parenting Programs, and Psychiatric services.

Target Population :

Residents of Cochise and Santa Cruz Counties

Contact Agency :

SEABHS

Project : Youth and Family Services

Objectives :

SEABHS strives to provide youth and family services that are family-centered and strength-based. Services are delivered collaboratively, building on individual, family, and community assets.

Expected Activities and Outcomes :

INTAKE/ASSESSMENT: Children and their families begin services with an interview with a clinician to determine what services may be available to assist the child and family.

INDIVIDUAL, FAMILY, AND GROUP THERAPY: Interactive therapy provided on an individual, family, and/or group basis to assist in meeting the needs of the child and family.

CASE MANAGEMENT: These services may include telephone contact, transportation, coordination with other service providers, etc.

SUBSTANCE ABUSE SERVICES: These services may include individual/family therapy, educational and relapse prevention groups, and coordination with other agencies involved with the child and family.

INFANT MENTAL HEALTH SERVICES: These services are crucial in identifying and intervening with potential problems early on.

PSYCHIATRIC SERVICES: SEABHS provides psychiatric evaluations, medications, and medication monitoring when determined to be necessary as a part of the child's treatment.

CRISIS INTERVENTION SERVICES: Available 24 hours a day, 7 days a week.

RESPIRE CARE: Temporary, supervised services which may be used to provide rest and relief to the child and/or caregiver.

HOME-BASED SERVICES: Family therapy and case management services provided in the child and family's home.

SCHOOL-BASED SERVICES: Individual and group therapy, along with case management services provided in the school in coordination with the family and school personnel.

REHABILITATION SERVICES: Includes health promotion, family support, living skills training, and personal assistance.

PREVENTION: Prevention services are offered across all four counties by the SEABHS New Turf Staff. Services include the mentor program, youth advocate program (YA!), and many trainings.

WRAPAROUND FACILITATION: Staff are available to assist families and other community agencies train and develop strengths-based, child and family-centered wrap plans.

Project : Southwest Center for Community Health Promotion

Objectives :

Southwest Center will work side-by-side with community members to establish health promotion and disease prevention programs that will continue long after the grant has ended.

Expected Activities and Outcomes :

Operating under the theme, Promoting the Health of Multiethnic Communities in the Border Southwest, the Southwest Center for Community Health Promotion will: Help policy-makers and border communities identify, assess and address major public health concerns. Develop community-based health-promotion and disease-prevention research efforts that reflect the diversity and character of these communities.

Develop innovative methods to evaluate programs and disseminate information to support and promote health in the communities.

Target Population :

Community members borderwide.

Collaborators :

This major effort will involve an interdisciplinary team from the UA representing public health, behavioral sciences and outreach programs, such as the Cooperative Extension System, among other areas. The UA team will work closely with the Arizona Department of Health Services, which has been extremely supportive of this effort, as well as with county health departments, community health care professionals, community coalitions, and state and federal agencies (both in the United States and in Sonora, Mexico).

Project : Women's Breast and Cervical Cancer Screening

Objectives :

Detection of women's breast and cervical cancer for prevention.

Expected Activities and Outcomes :

Early detection of disease and treatment.

Project : Southwest Public Health Leadership Institute

Objectives :

The Southwest Public Health Leadership Institute (SPHLI) is a Centers for Disease Control and Prevention (CDC) funded program designed for public health personnel committed to developing their leadership skills.

Expected Activities and Outcomes :

A central mission of the AzGPPH since its inception has been the preparation of men and women for public health policy learning and leadership. In recent years, we have been intensifying our efforts. Now, with the creation of this Institute, we can carry our endeavors to a new level. Investment in this new intellectual area will illuminate some of the most important issues facing our global future – understanding what makes good leaders and training individuals to lead in an ever changing world.

Target Population :

Public Health Personnel of the southwest.

Contact Agency :

Mel and Enid Zuckerman, College of Public Health

Funding Source :

Generous in-kind support by Canyon Ranch (Tucson Health Promotion Initiative) and funding by CDC (Leadership Institutes) are enabling the

Project : Best Practices in Tobacco Control

Objectives :

To understand how tobacco control programs meet Best Practices.

Collaborators :

State and County Health Departments, community coalitions, and Non Governmental Organizations.

Project : CVD Comprehension Intervention Program

Objectives :

To reduce the impact of diseases and prevent development.

Expected Activities and Outcomes :

Reduction in the risk of diseases through nutrition and physical activity. Better management of existing disease.

Target Population :

Population of SE Cochise County

Contact Agency :

The University of Arizona , Mel and Enid Zuckerman Arizona, College of Public Health Centers for Disease Control (CDC)

Funding Source :

DHHS, USPHS, CDC

Collaborators :

State and county health departments, community coalitions, Non Governmental Organizations.

Project : Community Health Advancement Partnerships (CHAPS) Program

Objectives :

The Community Health Advancement Partnerships (CHAPS) team, a collaboration between the Arizona College of Public Health and the College of Agriculture and Life Sciences at the University of Arizona, recently was selected as both the National and the Western Regional winner of the 2002 Florence Hall Award from the National Extension Association of Family and Consumer Sciences. The CHAPS projects target health related issues identified by Arizona communities: Physical Activity Promotion , Nutrition for Health Promotion , Community Health Leadership Development.

Expected Activities and Outcomes :

Activities by CHAPS members encourage individuals, families and communities to lead healthier lives; strengthen community leadership and involvement in developing health-promotion strategies; and help tailor local health infrastructures to meet community health-promotion needs. These goals are achieved through the promotion of increased physical activity and better nutrition and the development of community health leadership. Created in 1997, the CHAPS initiative links the University campus and community outreach health-related education and research efforts, with both public- and private-sector organizations through cooperative extension offices throughout the state.

Target Population :

Individuals, families and communities of the southwest.

Collaborators :

The Community Health Advancement Partnerships (CHAPS) team, a collaboration between the Arizona College of Public Health and the College of Agriculture and Life Sciences at the University of Arizona, recently was selected as both the National and the Western Regional winner of the 2002 Florence Hall Award from the National Extension Association of Family and

Project : Mel and Enid Zuckerman , College of Public Health

Objectives :

The College of Public Health provides services to border communities throughout the southwest including the Rio Grande Valley and the Arizona Sonora Border. Research, community based services and having activities form the foundation of it's work.

Target Population :

Border communities

Pima County

Results

Pima County, the second largest of the four original counties was created in 1864, and included the majority of southern Arizona acquired from Mexico by the Gadsen Purchase¹. During the mid 18th century, gold and silver was discovered, with expansion of mining and ranching occurring in the later part of the century. Although its territory has been reduced (from original size), Pima County covers 9,184 square miles. The Native American reservations of the area (San Xavier, Pascua Yaqui and Tohono O'odham) account for over 42% ownership of land located in Pima County¹.

Pima County has a steadily increasing population, estimated at over 870,610, while having an unemployment rate of 3.5% , which remains lower than the Arizona state rate ¹.

A major contributor to the economy of Pima County is manufacturing. Growth in this economic sector is due to the increase of high-technology manufacturers locating and expanding to Pima County. Another major contributor is tourism. In the last year, tourism contributed over 2.3 billion to Pima County's economy and continues to play a major role¹.

Tucson, nicknamed the Old Pueblo is the major city in Pima County, and is Arizona's second largest and oldest city, consisting of a population estimated at over 507,000. Within the county there are large differences in unemployment rates, when stratifying by city/community. Tucson, for example, has an unemployment rate of 3.8% and Marana has a rate of 2.5%, while the Pasqua Yaqui Indian Reservation has an alarming rate of unemployment of 25%¹.

1 . Arizona Department of Commerce. Profile: Pima County, Arizona www.azcommerce.com

As per the HB-HG 2010 survey regarding the 25 Objectives, 83 border wide programs were found to be working towards the following objectives :

- 26.51% towards Access to Care.
- 25% Environmental Health
- 18% Maternal and child Health
- 11% Violence Prevention
- 8% Diabetes

When surveyed regarding which health areas Border wide and Pima health agencies addressed :

- 31% adolescent health
- 66% Health Education and Promotion
- 54% in Maternal and Child Health
- 32% in Women's Health
- 28% in Environmental Health
- 43% epidemiological studies
- 38% in Chronic and Degenerative Diseases

58% of the agencies surveyed in the city of Tucson had knowledge of the Healthy Gentle-Healthy Border 2010 Objectives!

El Rio Health Center

El Rio Programs

839 West Congress

South Tucson 85745 Arizona

Phone (520) 670-3909

Fax Unavailable

Website www.elrio.org

Mission

El Rio's mission is to be an accessible and affordable community health center that provides comprehensive quality health care in an atmosphere of respect and dignity for patient and staff, always sensitive to the cultural differences in the community. Further, through direct services, advocacy and education, the Center will strive to improve the health and well being of its patients and community.

Project : Special Needs Population

Objectives :

Provide health care for homeless persons of Pima County.

Expected Activities and Outcomes :

Proof of income and proof of residence, normal requirements for patients of Community Health Centers are difficult to come by if you are homeless. But since the primary focus of El Rio is the patient, not the "requirement", the qualifiers flex, and the patient is sought and welcomed. By referral, and engaging in active outreach at clinics and shelters, El Rio's Homeless Health Care Program has, since 1988, annually reached one out of two of the estimated number of homeless in Tucson each year with primary medical care, case management and alcohol treatments services. El Rio provided health care and case management for nearly 8,000 homeless clients through the program. An award-winning program for women living in shelters was a core part of that effort.

Contact Agency :

El Rio Programs Department

Project : The P.R.O.J.E.C.T

Objectives :

In 1988, The El Rio Health Center received a grant from the United States Public Health Service to provide health care to Tucson's homeless population. El Rio nurse practitioners visited shelters and soup lines to provide health services to the homeless.

Expected Activities and Outcomes :

Founded on the premise that early intervention can prevent future problems. The Health Education Project began in 1990 by serving five shelters. Talented and dedicated volunteers went to homeless shelters and other facilities to teach a variety of health and life-skill classes.

At the close of 1997, volunteer teachers taught approximately 500 classes to 4,550 students. In addition, forty volunteers supported T.H.E. PROJECT by coordinating activities, word processing, telephoning, fund-raising, grant writing, and writing articles for local publications.

In 1998, there were 60 volunteer teachers in 24 sites. Would you like to make a dream come true for at-risk individuals in the Tucson community? There are several ways you can help. For further information please call Gay Evans, RN, MS, FNP, director of the T.H.E. PROJECT, at El Rio Health Center at 670-3718.

Target Population :

Homeless persons of Pima County

Funding Source :

Public Health Services

Contact Agency :

El Rio Programs Department

Collaborators :

Homeless shelters and a variety of community volunteers.

Project : Sharing the Care

Objectives :

A major component in the fight against illness is the considered use of prescription pharmaceuticals. The medicines are often the result of years of applied research and major monetary investments by pharmaceutical firms. In the past, treatment of El Rio patients would require the purchase of such medicines from those firms, with a significant impact on already stretched budgets.

El Rio Health Center

Expected Activities and Outcomes :

Sharing the Care" makes available without charge prescribed medicines to eligible patients – those who cannot afford to pay and who are not covered by other programs across the United States. some 350-community prescriptions, serving nearly three-quarters of a million patients with pharmaceuticals valued in excess of \$100

Target Population :

Pima County residents unable to afford pharmaceutical drugs. Pfizer, Inc

Contact Agency :

El Rio Programs Department

Project : Immunization Services

Objectives :

El Rio entered into a pediatric immunization program in 1994 with a goal of immunizing at least 90% of our state's 2-year-olds by the year 2000

Expected Activities and Outcomes :

Such patients at El Rio are immunized for polio, diphtheria, tetanus, measles, mumps, rubella, haemophilus influenza type B, hepatitis B, Varicella, and hepatitis A. A spring 2000 audit of El Rio's 1,100 children showed an immunization completion rate of 91%, exceeding the rate achieved by the state, and CDC goal.

Target Population :

Pima county families and children

Contact Agency :

El Rio Programs Department

Funding Source :

Federal , State and local

Collaborators :

Arizona Department of Health Services and the Federal Centers for Disease Control and Prevention (CDC)

Project : Women's Health

Objectives :

To develop a Well Woman program to improve cervical and breast cancer screening and provide Obstetrical/Gynecological Services to Pima County women

Expected Activities and Outcomes :

El Rio's is a primary provider of obstetrical/gynecological services to patients on the west side of Tucson. There is an open-door policy for any woman needing prenatal care. The program has grown for 300 deliveries per year a decade ago to over 1,300 per year in the year 2000. One in ten new babies born in Pima County are delivered here, as many as 3 in 10 in our immediate service area. El Rio's six OB/GYN Associates are located on the St. Mary Hospital's campus. El Rio also has seven certified nurse midwives. Over 1,500 women receive prenatal care through El Rio. A Well Woman program to improve cervical and breast cancer screening has generate outstanding

Target Population :

Pima County Women and adolescent females

Contact Agency :

El Rio Program Department

Project : Teen Pregnancy Support

Objectives :

Provide pregnancy, parenting education and well baby care for students.

Expected Activities and Outcomes :

For over ten years, El Rio has also been involved in the Teenage Parent Program at Sunnyside High School. A nurse practitioner provides pregnancy, parenting education and well baby care for students who are either pregnant or have children up to two years of age. The program provides support for both the health of the baby and the mother, and provides skills, day care and motivation so that the mothers can complete high school. During the 1997-98 school year, 153 students were enrolled in the program.

Target Population :

Teens of Pima County

Contact Agency :

El Rio Programs Department

Collaborators :

Sunnyside School District

El Rio Health Center

Project : HIV Early Intervention Project

Objectives :

Since 1991, the HIV Early Intervention Project has provided primary medical care, case management and psychological counseling to over 1,200 clients, particularly those who do not qualify for public assistance and who do not have insurance.

Expected Activities and Outcomes :

El Rio is the largest provider of such services in Pima County, receiving referrals from private physicians, service organizations and other clinics. Anonymous HIV testing and counseling are provided to nearly 4,000 patients annually. Currently, El Rio has the largest AIDS practice in Tucson, with over 1,000 patients served.

Target Population :

Pima County residents victims of HIV/AIDS

Contact Agency :

El Rio Programs Department

Project : El Rio Services

Objectives :

.El Rio is an independent, community-based primary health care center in Pima County. We are available to all, but especially to those least able to access and afford health care services. We recognize and reward the abilities of our health care team to best serve the needs of a culturally diverse and medically under-served patient population. We are advocates for our patients, individually and as a group, and work diligently to attain full and complete

Expected Activities and Outcomes :

El Rio offers primary care services for your entire family. We hope to be the regular source of health care for you and all your family members. El Rio also offers the following services:

Behavioral Health Crisis and Short-term Counseling

- Dental Clinic
- HIV/AIDS
- Homeless Health Care Program
- Immunizations
- Laboratory and X-ray
- Nutrition Counseling
- Ob-GYN
- Optometry
- Physician Specialty Clinics
- Prescriptions

Preventative Health Services

150 West Congress

Tucson 85701 Arizona

Phone (520) 740-8315

Website www.pimahealth.org

Mission

Is to promote and protect the health of the people of

Pima County Arizona through: Prevention, intervention, and control of infectious and chronic diseases. Assessment of community health. Management of catastrophic emergencies and other threats to the well-being of the public.

Project : Family Planning

Objectives :

Assist women, including teenagers, in maintaining their reproductive health. The Family Planning mission is "to provide individuals with the information and means to exercise personal choice in determining the number and spacing of their children, regardless of race, gender, class, sexual orientation, age or physical ability."

Expected Activities and Outcomes :

This is accomplished by offering the following services through the Department's Neighborhood Offices:

- Birth control
- Pregnancy tests
- Pelvic exams
- Pap smear tests
- Sexually Transmitted Disease tests & treatment
- HIV (AIDS virus) counseling and testing
- Patient education
- Community education

Services are confidential and a sliding fee scale is utilized. Fees are based on family income and number in household but, **NO ONE IS REFUSED SERVICE BECAUSE OF AN INABILITY TO PAY.**

Colposcopy Clinic : Family Planning's colposcopy clinic provides further diagnosis and treatment of abnormal pap smears.

Community Education : Community education provides free presentations, and services through birth control/STD/sexuality classes and literature, community board membership, health and career fairs, and other special events. To request a presentation for any agency and age group, call (520) 887-0715.

Family Planning provides education and/or referrals for : Cervical Cap, Colposcopy (other than Family Planning) , Domestic Violence, Emotionally / Physically Disabled , Genetic Counseling , Hospitals , Infertility , Mammography , Natural Family Planning , Pregnancy Counseling: Termination & Adoption , Prenatal Care , Psychological Services , Physicians , Sterilization , Teens , Ultrasound , Pregnant & Parenting Teens , AIDS Resource List , AHCCCS , DES - Family Assistance.

Pima County Health Department

Project : Disease Control

Objectives :

Prevent the incidence of disease morbidity and mortality in Pima County.

Expected Activities and Outcomes :

Epidemiology : This section assists in identifying community health problems, compiling the Pima County Health Status Report, and developing appropriate intervention programs and strategies.

Disease Control : Surveillance , Investigation , Intervention HIV/AIDS : The goal of this section is to prevent the spread of HIV (human immunodeficiency virus) and the development of AIDS (acquired immunodeficiency syndrome) through surveillance, case reporting, partner notification, counseling, testing, referral and education. The major components of HIV/AIDS activity in Disease Control are: Investigation and Surveillance , Counseling and Testing , Health Education / Risk Reduction

Well Woman Program : Offers services to women who are 50 and older, who have a low income and do not have insurance. Free mammograms and pap tests are also available.

Immunizations:

This section focuses on prevention through immunizations, investigations, and the implementation of disease control measures for vaccine preventable disease (VPDs). The major components of immunization activity in support of Disease Control are: Monitoring progress towards the Year 2000 Goal of immunizing 90 percent of two-year old children in Pima County. Child Care and school immunization assessments.

Provider base clinic record assessments. Ordering, distributing and monitoring the public funded vaccine for Department clinics and community sites. Provide information on immunization schedules, administration techniques and vaccine management. Maintain a system for Department clinics to remind parents to return for their children's immunizations. Investigation of reported VPDs to confirm the problem case, determine the areas of risk, and implement appropriate control measures. Collaborate with the Southern Arizona Immunization Committee. Establish new mother education programs in Pima County hospitals. Maintain the HBgAg positive, perinatal Hepatitis B program.

Target Population :

All Pima County Residents

Contact Agency : Pima County Health

Funding Source :

Federal , state and local grants

Project : Community Nutrition

Objectives :

Promotes healthy living. This program provides nutrition information and counselin.

Expected Activities and Outcomes :

Provide a variety of nutritional health outreach programs to the public:

BEST (Breast-feeding Education Support Team) A breastfeeding support program funded by Pima County.

Service: Community Nutrition Staff develop and teach classes to pregnant women and provide individual counseling to breastfeeding moms in an effort to help low-income women reach their individual, personal breastfeeding goals.

FOOD Plus or CSFP (Commodity Supplemental Food Program) - A supplemental food program federally funded through USDA.

Service: Community Nutrition Staff screen potential clients for FOOD Plus eligibility. Thereafter, clients receive food through the Community Food Bank's FOOD Plus center. Clients include low income pregnant women, new mothers, children 1-6 years old and seniors at least 60 years old.

Heart Life: Heart disease prevention and education program federally funded through Preventive Health and Health Services Block Grant funding **Service:** Community Nutrition staff coordinate a public health campaign targeting low-income, minority 4th through 6th graders and their families, with physical activity programs. Staff

Pima County Health Department

work with teachers (through "train the trainer" programs) and students to incorporate 15-30 minutes of physical activity into the daily routine. Community promotions are also conducted. Information related to tobacco prevention is distributed at events. Heart life staff lead a community task force which coordinates cardiovascular disease prevention activities in Pima County.

WIC (Women, Infants & Children Program) : Special supplemental food program for women, infants and children. Family and children of Pima County. A supplemental food and nutrition program federally funded through USDA. Service: Community Nutrition staff group or individual appointments, and provide referrals to community agencies. Clients include low-income pregnant women, new mothers, infants and children up to 5 years old who have a health risk. Information for getting started with WIC & FOOD Plus.

Target Population :
All Women and Children

Cochise County

Update

The county of Cochise is located in the Southeast corner of the state. It is a county that is the size of the states, Rhode Island and Connecticut combined. Within this county, specialty crops and livestock play an important role in the local economy. This county is an important agricultural area. Cochise County has a growing population estimated at over 121,000 with an unemployment rate of 4.6%¹. Some of the cities that make up Cochise County are Benson, Bisbee, Douglas, Sierra Vista, Tombstone, and Wilcox.

The Arizona border sister city of Douglas was founded in 1901 as a site for a copper smelter. Earlier in its history, Douglas was an annual spot for ranchers, with ranching and agriculture remaining as important facets of the area's economy¹. Douglas has an estimated population of 16,585². Unemployment rate in the area is an estimated 9.4%³, a rate that has been decreasing since the mid to late 90's. This percentage of unemployment is the highest within Cochise County. Once solely dependent on mining and agriculture, Douglas has developed a manufacturing sector because of its proximity to the U.S.-Mexico border. Its location along the border has allowed international commerce to become an integral part of the local economy. Other significant contributors to Douglas' economy are tourism and retirement.

Other nearby towns of interest are Tombstone, Bisbee, the ghost towns of Charleston and Dos Cabezas as well as the Fort Huachuca base. Once mining towns, Tombstone and Bisbee are now mainly artist communities and tourist destinations.

- ¹. Arizona Department of Commerce. Profile: Cochise County, Arizona. www.azcommerce.com
- ². U.S. Census Bureau and Arizona Department of Economic Security, Population Statistics Unit
- ³. Arizona Dept. of Economic Security, 2001 Special Unemployment Report

As per the HB-HG 2010 survey regarding the 25 Objectives, 49 Cochise programs were found to be working towards the following objectives:

- 25% Access to Care
- 12% Mental Health
- 13% Substance Abuse
- 8% HIV
- 7% in Tobacco and Diabetes & Injury, Violence Prevention

When surveyed regarding which health areas Cochise County health agencies addressed :

- 64% adolescent health
- 57% Health Education and Promotion
- 41% in Maternal and Child Health
- 32% in Women's Health
- 12.5% in Environmental Health
- 5.36% are reported as conducting epidemiological studies

45% of the agencies surveyed had knowledge of the Healthy Gente-Healthy Border 2010 Objectives!

Mission:

To improve the health of people in the Americas with particular focus on the U.S-Mexico border by developing relationships that further knowledge, empower people and maximize the utilization of resources. Border Health Foundation programs seek to improve coordination and cooperation while respecting diversity.

Project: Strengthening Families

Objective

Increase the capacity of Neighborhood Liaisons to effectively conduct consensus building among targeted at-risk families. Increase the knowledge base of staff on science-based prevention models and how to apply these within the communities served by this agency. Ensure that all family strengthening efforts are culturally relevant and sensitive. Promote a sense of community ownership in the activities and programs being carried out; increase sustainability and empowerment. Strengthen local-level family protective factors for the purpose of promoting greater resiliency among target communities and families. Regularly conduct outcome evaluations for better monitoring project effectiveness. Determine the process and outcomes evaluations of Entre Familia, a proven science based program, as part of a cross site evaluation.

Expected Activities and Outcomes

Implement 3 waves of family strengthening classes for 30 participants and an evaluation process to determine whether EntreFamilia program is an effective family strengthening model in the target communities.

Target Population

120 families

Mission:

Mary's Mission was established as a community resource to provide community-based services to those individuals who are indigent and lack the resources for self-sufficiency. The agency seeks to serve children in the least restrictive environment by community support networks that will enhance the functioning of families.

Project: Mary's Mission and Developmental Center

Objective

Provide an opportunity for teens to be supported by skilled parents as they learn to assume primary responsibility for themselves. Enhance self-esteem of teens by building cultural awareness and exposing them to positive role models in the community. Provide access to a network of educational, vocational, social and supportive services in order to promote self-sufficiency. Empower teens to make decisions that will have a positive impact on them. All services are available in Spanish.

Expected Activities and Outcomes

Counseling : Individual, group and substance abuse counseling provided on site at 8360 South Highway 92. Each session is one hour long. All counseling sessions are offered one time per week.

Medication : Self administration of medications is supervised by behavioral health paraprofessionals according to the prescription as prescribed by an attending physician. Residents are authorized to self-administer their own medications with the staff member monitoring and checking for non-compliance.

Target Population

Female youth between the ages of 11-17.

The mission of Northern Cochise Community Hospital is to provide quality health care and promote an optimal level of wellness for the residents of its community. Through teamwork and sincere effort, the physicians, board members, and employees of NCCH will position their facility as a leader in the rapidly evolving health care environment.

Project: Social Services

Objective

NCCH social services meet the medically related social and emotional needs of patients.

Expected Activities and Outcomes

Associates from the Social Services Department:

Act as patient /resident and family advocates. They provide information and assistance with financial and entitlement programs. Information for living wills, medical power of attorney, advance directives is also provided through Social Services.

Target Population

All ages. Newborn to geriatric and primary geriatric.

Project: Youth and Family Services

Objective

SEABHS strives to provide youth and family services that are family-centered and strength-based. Services are delivered collaboratively, building on individual, family, and community assets.

Expected Activities and Outcomes

INTAKE/ASSESSMENT: Children and their families begin services with an interview with a clinician to determine what services may be available to assist the child and family.

Project: Youth and Family Services (continued)

South Eastern Behavioral Health Services

- **INDIVIDUAL, FAMILY, AND GROUP THERAPY:** Interactive therapy provided on an individual, family, and/or group basis to assist in meeting the needs of the child and family.
- **CASE MANAGEMENT:** These services may include telephone contact, transportation, coordination with other service providers, etc.
- **SUBSTANCE ABUSE SERVICES:** These services may include individual/family therapy, educational and relapse prevention groups, and coordination with other agencies involved with the child and family.
- **INFANT MENTAL HEALTH SERVICES:** These services are crucial in identifying and intervening with potential problems early on.
- **PSYCHIATRIC SERVICES:** SEABHS provides psychiatric evaluations, medications, and medication monitoring when determined to be necessary as a part of the child's treatment.
- **CRISIS INTERVENTION SERVICES:** Available 24 hours a day, 7 days a week.
- **RESPIRE CARE:** Temporary, supervised services which may be used to provide rest and relief to the child and/or caregiver.
- **HOME-BASED SERVICES:** Family therapy and case management services provided in the child and family's home.
- **SCHOOL-BASED SERVICES:** Individual and group therapy, along with case management services provided in the school in coordination with the family and school personnel.
- **REHABILITATION SERVICES:** Includes health promotion, family support, living skills training, and personal assistance.
- **PREVENTION:** Prevention services are offered across all four counties by the SEABHS New Turf Staff. Services include the mentor program, youth advocate program (YA!), and many trainings.
- **WRAPAROUND FACILITATION:** Staff are available to assist families and other community agencies train and develop strengths-based, child and family-centered wrap plans.

***Mental Health, Substance
Abuse***

Project: Chemical Dependency Services

Objective

SEABHS substance abuse treatment programs are committed to improving the quality of life for the people we serve in a respectful, caring and sensitive manner. Our programs are built around the belief that the problems created by the use of drugs and alcohol can be stopped through the development and implementation of personal plans of recovery.

Expected Activities and Outcomes

Substance Abuse Education: Group sessions focused on education about drugs of abuse and the effects on the individual and family.

Substance Abuse Education for Families: Education groups for family members offering age-appropriate information to parents, spouses and children from substance abuse affected families.

Intensive Outpatient Programs: This is designed for those people and families who need a higher level of support. It involves a minimum of 9 hours per week of group treatment in addition to other necessary services the family may need.

Outpatient Group: A three- hour per week group program with the goal of assisting the individual to develop a relapse prevention plan. People may be referred directly into this service or may be recommended to attend this group as a follow-up to the Intensive Outpatient Program.

Continuing Care Groups: Usually a follow up group to the Outpatient Group, the goal of the Continuing Care Group is to provide on-going support and counseling to individuals who are transitioning to life after the end of treatment.

Family Group: Throughout the course of treatment family group is offered. This is to help the entire family, spouses, parents and children, in making the changes needed for a substance-free life. Families receive support, education and counseling.

Individual Counseling: One- to- one sessions with the Substance Abuse or Mental Health Counselors is offered as an adjunct to the treatment program.

Family Counseling: This is an important component of the treatment program designed to assist families on an individual basis

South Eastern Behavioral Health Services

in making changes, improving communications and developing plans of recovery.

Detox services: Through its SEAPHF program SEABHS offers medically necessary detox. For other detox services SEABHS counselors assist in finding placement.

Residential Treatment: SEABHS believes it is important for people to remain in their communities, families and jobs during the treatment process. However there are times when a person is unable to succeed in the outpatient setting. For those individuals SEABHS counselors assist in finding residential placement through insurance, SEABHS contracts or other public programs. Upon discharge from the residential setting, individuals are encouraged to enroll in the outpatient programs.

DUI Services: SEABHS is a provider for DUI screening, DUI Education and DUI Treatment

In addition to these programs, specialty groups are available through SEABHS or by referral to other agencies. These include Anger Management groups, gender specific groups like Women's Groups, groups for Pregnant and Parenting Women, Parenting Programs, and Psychiatric services.

Santa Cruz County

Update

Santa Cruz County, the smallest of all counties in Arizona was founded back in the late 19th century, and was named after the Santa Cruz River that flows from Arizona into Mexico ¹.

Communities in Santa Cruz County are Rio Rico, Tubac, Patagonia, and of course, Nogales. Nogales, Arizona, and its sister city Nogales, Sonora are located on the international border between Mexico and the United States. These sister cities are generally referred to as “Ambos Nogales”.

The city of Nogales is by far Santa Cruz County’s largest city with an estimated population of nearly 20,878, and an annual population increase of 3% ¹. Nogales and Santa Cruz County are 93% and 83% respectively, of Hispanic ethnicity. With an unemployment rate for the county of 13.7% (3.7% for the state of Arizona), 54% of the population live below the 200% poverty line, compared to 33.5% of all Arizona residents.

Nogales is the largest port of entry of fresh produce into the United States, with over four billion pounds of fruits and vegetables crossing the border each year. In addition to being a large port of entry for food products, Nogales has a large and constant flow of people crossing its border. By both vehicle and foot, the border that separates Ambos Nogales features people crossing in either direction. Being so close to large cities such as Tucson and Phoenix, people find the border of Nogales a convenient route to take when crossing into the United States. An integral part of business in this region is the “Maquiladora” industry. Nogales is one of the largest “Maquila” sites in the United States, with over 100 “maquiladoras” in the region, employing over 32,000 workers.

¹: Arizona Department of Commerce. Profile: Santa Cruz County, Arizona. www.azcommerce.com

As per the HB-HG 2010 survey regarding the 25 Objectives, 45 Santa Cruz programs were found to be working towards the following objectives:

- 15% Access to Care.
- 13% in Tobacco
- 17% in Nutrition
- 11% in Diabetes
- 8% in HIV, Injury and Violence Prevention
- 6% in Cancer
- 3 % Infant, Maternal and Child Health

When surveyed regarding which health areas Santa Cruz County health agencies addressed :

- 63% adolescent health
- 89% Health Education and Promotion
- 41% in Maternal and Child Health
- 48% in Women’s Health
- 30.13% in Environmental Health
- 24% are reported as conducting epidemiological studies
- 41% in Chronic and Degenerative Diseases

17 % of the surveyed agencies had knowledge of HG 2010.

Nogales, Arizona 85621

Phone: (520) 285-3000

Email: comments@carondelet.org.

Website: carondelet.org

Mission:

Our mission is simple: to provide for the health care needs of our community; to embrace the whole person, in mind, body and spirit; and to serve all people equally. Carondelet Health Network offers a comprehensive array of services for you and your family.

Project : Services

Holy Cross offers a variety of direct health services as well as a range of health education classes and programs. Patient education classes include: Childbirth, Diabetes, Hospice, Natural Family Planning, Youth Sexuality, Rehabilitation. Although all programs will not be listed in detail in this resource guide, please feel free to visit Carondelet website for new and upcoming additions and schedules.

Carondelet Health Network: Holy Cross

Project : Childbirth Classes

Expected Activities:

Preparation for Childbirth

This series of classes is designed for the last three months of pregnancy. During the five-week course you will learn what to expect during labor and delivery and practice relaxation and breathing techniques that will help during the birth. Classes fill quickly - we recommend that you register for classes at the end of your first trimester. *Fee: \$60*

Preparation for Childbirth in Spanish

This is a series of three classes for those who speak Spanish only or are bilingual and prefer a class taught in Spanish. The course will cover pregnancy, labor and birth. Instruction will also include breathing and relaxation techniques and a review of medication and anesthesia. This course is culturally sensitive. These classes will be available at St. Joseph's Hospital and other locations. Ask about these locations. Call 873-6777 for information. *Free*

Clases de Preparacion Para en Español

Una serie de tres clases en español. La información que usted necesita acerca del embarazo, el parto y el nacimiento de su bebé. Hablamos de medicamentos, anestésicos, técnicas de respiraciones y relajamiento. Llame 873-6777. *Free*

Childbirth - Refresher

Refresh your memory about the labor and delivery process, including breathing and relaxation techniques, by attending this two-session class. You will also learn how to welcome the new baby into the family. *Fee: \$40 per family*

Breastfeeding

This two-week class, taught by certified breast feeding specialists, covers the basics of breast feeding and includes a discussion of common concerns and an overview of breast pumps. *Fee: \$25*

Breathing Techniques & Comfort Measures for Labor

This course will teach you breathing and relaxation techniques for labor, along with comfort measures and coaching skills. You will be instructed on the use of labor aids, such as the squatting bar and the birthing ball. Bring your pillows and blankets to class to enjoy learning the various non-medicated ways to alleviate the discomforts of labor. (2-class series) *Fee: \$25*

Care of the Newborn

In this two-hour class you will increase your knowledge of baby care and come away with helpful hints that will make your first few months with your newborn easier. *Fee: \$15 per family*

Siblings

Your children learn how their role in the family may change with the arrival of the baby and how babies are born. Brothers- and sisters-to-be also tour the Maternal/Newborn Unit and make a stop at the window of the Newborn Nursery. It's a great way to help reduce a child's anxiety about the coming event. Recommended for children ages 3 and up. *Fee: \$10 per family*

Infant CPR and Safety

Learn first aid techniques, infant cardio-pulmonary resuscitation and how to avoid accidents in this two-hour class for new parents. *Fee: \$15 per family*

Infant Car Seat Safety

This 2-hour class will include an overview of car seat laws and safety. You will learn how to choose the correct car seat for your child at different ages, the proper installation of the car seat in your car and how to position your child correctly in the car seat. This class is taught by a certified child passenger safety technician. *Fee: \$15 per family*

Target Population:

All families preparing for birth.

Project: Tobacco Prevention

Objective

Provides education about the consequences of smoking or chewing tobacco. This program is aimed at primarily preventing children from starting tobacco use, the program teaches children how to develop effective refusal skills.

Expected Activities and Outcomes

Media literacy will be used to help child identify media messages and strategies tobacco companies use to initiate children to use tobacco. Pregnant youth will learn of the effects tobacco smoke has on their unborn children and the consequences for the health and development of children who grow up with environmental smoke. Support groups are also offered to youth and adults who wish to quite smoking. Children learn about the chemical contained in tobacco and their effects on the body. Children also learn how second hand smoke effects those who do not smoke.

Target Population

Children and youth, pregnant youth and adults

Yuma County

Update

Yuma County, located in the Southwest portion of the state, is one of the original four counties of Arizona. Yuma county has a population of over 165,000, with a large portion being of Hispanic heritage¹. Some of the cities in Yuma County are San Luis, Somerton, Wellton, and of course the City of Yuma, with an estimated population of over 70,000.

Yuma County has a very high unemployment rate, near 25% , of which 66% occurring in San Luis and 44% in Somerton. This rate continues to increase and when compared to the Arizona unemployment rate of 4.7%, the disparity in employment is quite apparent. The unemployment rate is partly related to the seasonality of many of the jobs available in the area of fresh produce.

Much of Yuma County (5,522 miles) is desert land surrounded by rugged mountains. Despite the desert-like conditions, the valley regions contain an abundance of arable land, which is irrigated using water from the Colorado River¹. The county's principal industries are agriculture followed by tourism and the military. During winter months, the population of Yuma County grows significantly with the influx of part-time residents and workers.

Yuma, similar to many of the other border cities, has a large flow of people crossing its border. Many border residents prefer to obtain services "on the other side" rather than obtaining them on the U.S. side of the border. The consumers make decisions about where to acquire health services based on various criteria, such as cost of services, quality, availability, and the environment (how their cultural needs are met and the treatment of the consumers). And like other border cities/counties, over half of the population (50.5%) is of Hispanic heritage ².

As per the HB-HG 2010 survey regarding the 25 Objectives, 69 Yuma programs were found to be working towards the following objectives:

- 37% were recognized as working towards HG2010 Objective of Access to Care.
- 7% Tobacco
- 20% Nutrition
- 13% HIV
- 19% Mental Health
- 10% Maternal and Child Health

When surveyed regarding which health areas Yuma County health agencies addressed :

- 21% Adolescent health
- 60% Health Education and Promotion
- 18% in Maternal and Child Health
- 28% in Women's Health
- 9.86% in Environmental Health
- 6% are reported as conducting epidemiological studies
- 8% in Chronic and Degenerative Disease

45 % of the surveyed agencies had knowledge of HG 2010.

Mission:

Improve access to quality healthcare for Arizona's rural and underserved communities through the improvement of the recruitment, retention and distribution of healthcare providers across the state.

Project: WAHEC-Regional Center for Border Health

Objective

The April 6, 2001 ground-breaking ceremony for the Regional Center for Border Health marked the success of a dream for WAHEC to establish a comprehensive center for primary care, community outreach and health education in the City of San Luis. The center was open in May 17, 2002 and is designed to improve the effectiveness of medical services in San Luis, Arizona. The partnership with Women's Health Specialists and Yuma Pediatric Associates have allowed WAHEC to bring medical services to this very isolated and underserved community.

Access to Care, Cancer

Project: National Community Health Workers/Promotoras Conference

Objective

For 10 years, WAHEC has sponsored and coordinated the National Health Workers/Promotoras Conference. These conferences began to attract lay health workers/promotores from all over the United States and Mexico. In 1998, the Lay Health Workers/Promotores Conference became national and brought together more than 350 promotores. Last year the conference was held in San Antonio, Texas and reflected more than just a deeper understanding of health: it was an appreciation and celebration of health and diversity. Over 400 lay health workers from all corners of the United States and Mexico enjoyed the three days of Train-the-Trainers and Workshops sessions presented.

Project: Tobacco Use Prevention

Objective

Reduce the use of tobacco through education and intervention.

Expected Activities and Outcomes

The Yuma County Tobacco Program works to increase awareness and understanding of the harmful effects of tobacco and to change attitudes and perceptions regarding tobacco use issues. A worksite wellness package that includes tobacco information and assistance with creating job specific tobacco policy is available through our partnership with The American Cancer Society. School children are reached through age appropriate presentations that include puppet shows as well as peer leadership training in selected schools. Community events such as the Farm Workers Health Fair, The Great American Smoke out, and Kick Butts Day, are examples of the many events that serve as opportunities to raise awareness and to counter advertise. Anyone residing in Yuma County is eligible for free cessation classes taught in English or Spanish. Nicotine replacement therapy (patches, gum, nasal spray, or Rx medication) is available at a 50% discount by using a voucher system administered through the cessation classes. Community members can access free prevention literature in many local doctor's offices, at local agency sponsored health fairs, and by calling or stopping by the Tobacco Program office at the Health Department.

Tobacco Use

Yuma County Department of Public Health

Project: Injury Prevention Program

Objective

To reduce the number of child motor vehicle deaths and injuries.

Injury Prevention Programs include :

- K.I.S.S. (Kids In Safety Seats) - Child occupant protection program
- SAFE KIDS Coalition (find out more or become involved)
- Bike Helmets & Bike Safety

Expected Activities and Outcomes

K.I.S.S. Program: (Kids In Safety Seats)

This program provides families the way to purchase child safety seats, by allowing them to purchase them at a substantial discount. Infant-only seats sell for \$20-25 depending on model. Convertible seats (work as infant and toddler seat) and high-back booster seats sell for \$25. Families must attend a 1-hour training class before receiving their seat.

Yuma County SAFE KIDS Coalition was started in 1992. We are affiliated with the National SAFE KIDS Campaign out of Washington, DC. The coalition is made up of all kinds of people; parents, business people, people in health care, law enforcement, EMS (Emergency Medical Services), educators, nurses, various agencies and organizations... and we are always looking for others. We deal with a wide-range of preventable injuries including: Drowning, poisoning, falls, burns (electrical, fires, & scalds), choking, and vehicular (motor vehicle, pedestrian and bicycle). Our motto is "Safe Kids is No Accident". Yuma County SAFE KIDS has programs involving various unintentional injury areas including; motor vehicle safety "car seats", bicycle safety, water safety, burn and fire prevention, child abduction, falls and choking prevention. Yuma County

SAFE KIDS initiated the current bicycle helmet ordinance in the City of Yuma requiring all kids under age 18 to wear a bicycle helmet when riding their bicycles in Yuma. SAFE KIDS members help at: Car seat checkups, health fairs, clubs, other exhibits and at other organizations as requested

Bicycle Safety & Helmets

HELMETS: The Program offers helmets to the public at a substantial discount (\$10) in sizes from infant to adult. All helmets are SNELL Foundation or ANSI approved for safety, and come in a variety of colors and styles. Presently all bike helmets are only \$10.00 regardless of size. We carry helmets from toddler to adult (allowing mom and dad to be good role models and wear their helmets too).

Target Population

All, but specialize on minority and low-income families.

Contact Agency

Project: Sexually Transmitted Disease (STD) Program

Objective

This program deals with disease intervention activities to prevent disease transmission through education and by assuring that people who have a treatable STD or those that have been exposed to STD are, by referral, promptly examined and adequately treated

Expected Activities and Outcomes

STD prevention presentations, with power point, are provided to groups of 12 or more people and are available in English and Spanish as time permits. The STD program, by referral, promotes health and disease management as well as provide support and contact follow-up to insure that clients are screened, examined and treated properly.

Project: HIV Outpatient Program

Objective

The mission of the office of HIV Services is to prevent further transmission of HIV and to increase the quality of life among those already infected through education, prevention, monitoring, treatment and services. HIV Services are located within the Yuma County Health Department, Health Promotions Division. The program has three staff members and is organized into three divisions: COMMUNITY OUTREACH AND PREVENTION; CARE AND SERVICES; AND SURVEILLANCE AND RESEARCH.

Expected Activities and Outcomes

Community Outreach and Prevention – Provides resources to prevent further transmission of HIV infection and delay the onset of symptoms in persons already infected. Services include targeted HIV prevention educational programs, counseling and testing services, workshops, and training. Contact the Health Educator Monday through Friday from 8 a.m. to 5 p.m. Some evening can be accommodated.

Yuma County Department of Public Health

Project: HIV Outpatient Program (continued)

Expected Activities and Outcomes

HIV Care and Services – Provides HIV care and support services throughout Yuma and La Paz Counties to persons living with HIV disease. These services are in the areas of medical, AIDS Drug Assistance Program (ADAP), health and social support. The Partner Services Unit can assist HIV positive individuals with informing their sex partners or train providers to perform counseling and referral services for patients.

Surveillance and Research – Tracks the number of individuals infected with HIV in order to watch the trends of the epidemic. This information is used to target prevention activities, HIV care, and support services. HIV/AIDS data for the state of Arizona is available through the Arizona Department of Health Services (ADHS).

Target Population

Services for individual living with HIV/AIDS and their families.

Project: Health Start

Objective

Provide referral service for pregnant women and follow-up after birth and give them the best chance for success as the child grows and develops.

Expected Activities and Outcomes

HEALTH START / Comienzo Sano Program provides outreach prenatal education, referral services to pregnant through home visits and prenatal classes. Prenatal classes are held in Yuma, Somerton and San Luis and are bi-lingual and free of charge. Continuing services throughout the course of their pregnancy and follow-up services once the child is born for a period of two years. Low income women living in Yuma, Somerton, San Luis, Wellton and Eastern Yuma County who, wish help with referrals or want education through classes and home visits, are targeted. The purpose of the follow-up visits is to educate the family on: Breastfeeding, family planning, monitoring and referral for immunizations, etc. Also see section on Pregnancy Testing.

Target Population

Pregnant women and recent mothers.

Project: Physical Activity

Objective

Increase physical activity among children and adults of Yuma County.

Expected Activities and Outcomes

Provides programs for children (in schools for 4-8 grade) and adults that promote physical activity. The children's program is known as the PLAY (promoting lifetime activity in youth) program and is offered to teachers in all schools from grades 4th through 8th. It is a 12 week, 3 step program that gets children to realize that they can get sixty minutes of physical activity every day by doing every day things and also by keeping a log of their activities for 8-11 weeks. The adult programs are known as the YTCC (Yuma Take Charge Challenge) and the W.E.L.L. AZ (Walk Everyday Live Longer) program. The YTCC is offered to all ages and focuses on businesses, homes, churches, friends, etc. getting teams of ten together to provide support for each other while setting a personal goal to increase their physical activity level for 12 weeks. The W.E.L.L. Arizona program focuses on adults ages 50 -64 and lasts for 4 weeks. All programs are free of charge to participants.

45. **Office of Justice Programs (Office on Violence Against Women)**: The Office on Violence Against Women administers the Department of Justice's formula and discretionary grant programs authorized by the Violence Against Women Act of 1994. The program assists the nation's criminal justice system in responding to the needs and concerns of women who have been, or potentially could be, victimized by violence. Grant programs emphasize enhanced delivery of services to women victimized by violence; strengthen outreach efforts to minorities and disabled women; and provide Indian tribal governments with funds to develop and strengthen the tribal justice system's response to violent crimes committed against Native American women through a discretionary grant program. In addition, the office provides technical assistance to state and tribal government officials in planning innovative and effective criminal justice responses to violent crimes committed against women. www.ojp.usdoj.gov/vawo/applicationkits.htm
 46. **Office of Juvenile Justice and Delinquency Prevention**: OJJDP provides funding to States, territories, localities, and private organizations, including faith-based institutions, through block grants and discretionary funding. Block funding, through regular Formula Grants and State Challenge and Prevention money, goes to States and territories. Juvenile Justice Specialists administer funding through sub grants to States and localities. Discretionary funding is awarded through competitive peer review. OJJDP follows a planning process to assist with decisions for program priorities and funding opportunities. <http://ojjdp.ncjrs.org/grants/about.html>
 47. **Office of National Drug Control Policy (ONDCP)** : Offers drug-related funding opportunities, training and technical assistance, equipment procurement programs, and other resources from public- and private organizations are available in variety of areas including treatment and prevention. www.whitehousedrugpolicy.gov
 48. **OHS** : The White House : Office of Homeland Security www.whitehouse.gov/homeland
 49. **OSSA** : Oficina de Salud Publica Sonora-Arizona (Office of Public Health of Sonora and Arizona)

Glossary of Terms and Acronyms

P

50. **PAHO : Pan-American Health Organization's** mission is to strengthen national and local health systems and improve the health of the peoples of the Americas, in collaboration with Ministries of Health, other government and international agencies, nongovernmental organizations, universities, social security agencies, community groups, and many others. www.paho.org/
51. **Proposition 204 Tobacco Settlement Funds :** In 1998, the attorneys general of 46 states, including Arizona, agreed to settle a lawsuit they had filed against the manufacturers of tobacco products. As a result, the tobacco manufacturers must pay each of those states a portion of the estimated \$206 billion settlement each year over the next 25 years. Arizona's share is estimated to total approximately \$3.2 billion. The settlement agreement allows each state to determine how it will spend its share of the settlement.

R

52. **Robert Wood Johnson Foundation :** Supports training, education, research (excluding biomedical research), and projects that demonstrate the effective delivery of health care services. Rather than paying for individual care, we concentrate on health care systems and the conditions that promote better health. Grants are available for the following groups : hospitals; medical, nursing, and public schools; hospices; professional associations; research organizations; state and local government agencies; and community groups. www.rwjf.org/index.jsp
53. **Rural Health Outreach Grant through Health Resources and Services Administration, Rural Health Policy:** The Office of Rural Health Policy's Outreach Grant Program is designed to encourage the development of new and innovative health care delivery systems in rural communities that lack essential health care services. The emphasis of this grant program is on service delivery through creative strategies requiring the grantee to form a network with at least two additional partners. www.ruralhealth.hrsa.gov/funding/outreach.htm

S

54. **SAMHSA : Substance Abuse and Mental Health Services** The Substance Abuse and Mental Health Services Administration (SAMHSA), an agency of the U.S. Department of Health and Human Services, was established by Congress in 1992 under Public Law 102-321 and reauthorized in 2000, under Public Law 106-310. The Agency works to strengthen the capacity of the Nation's health care delivery system to provide substance abuse prevention, addiction treatment and mental health services for people at risk for or experiencing substance abuse or mental illnesses. SAMHSA builds partnerships with states, communities and private organizations to address the needs of individuals with substance abuse and mental illnesses and to identify and respond to the community risk factors that contribute to these illnesses. In Fiscal Year 2001, SAMHSA's budget was just under \$3 billion; the FY 2002 budget is \$3.15 billion. The Agency employs nearly 520 staff members. www.samhsa.gov/index.html

59. **Susan Komen Foundation :**

Glossary of Terms and Acronyms

T

60. **Title V Maternal and Child Health (MCH) Block Grant** : Authorized under Title V of the 1935 Social Security Act, the Title V MCH Block Grant is the only federal program devoted to improving the health of all women, children, youth and families. Title V grants to state health agencies are used to meet locally determined needs, consistent with national health objectives. These aims include preventing death, disease and disability; assuring access to quality health care; and providing family-centered, community-based services for children with special health care needs. Additionally, funds set aside at the federal level are used to improve and support community and state service systems through training, research, special projects of regional and national significance (SPRANS) and community-integrated service systems (CISS) projects. Title V is a partnership that includes Federal, State, and local governments. The Federal-State Title V Block Grant Partnership Budget is composed of Federal funds, State matching funds, local maternal and child health (MCH) funds, other funds, and program income. For every \$4 of Federal funds, at least \$3 must be matched with State and local funds. www.performance.hrsa.gov/mchb/mchreports/search/financial/finsch01_result.asp
61. **TMC : Tucson Medical Center** is Tucson's non-profit community hospital, TMC's mission is to improve the health of the entire community. www.tmcaz.com

U

62. **UMC: University Medical Center** is located in Tucson, Arizona. It's mission is : Patient Care, Education, Research and Community Service UMC is a private, nonprofit hospital located at the Arizona Health Sciences Center, adjacent to The University of Arizona in Tucson, Arizona. AHSC includes the colleges of Medicine, Nursing, Pharmacy, Public Health, and the School of Health-Related Professions as well as the University Physicians medical group. Arizona-Sonora Health Inventory and Resource Guide
March 12, 2004: 10am – 11am
ADHS – Office of Border Health

Samantha Sabo : Returned Peace Corps Volunteer Fellow for Office of Border Health – Arizona Sonora Health Resource Guide Coordinator

Ana Nevares: Outreach Coordinator -Arizona Delegation, USMBHC

Participants:

Robert Guerrero – Tucson Hispanic Coalition, Doctor for the Hispanic population at TMC, and technical support for United States-Mexico Border Health Commission

Victor Flores – Cultural Diversity Specialist at Community Partnership of Southern Arizona, 18 years of experience in criminal justice and mental health

Cecilia Rosales – Chief, Office of Border Health

Power Point Presentation: Samantha Sabo

- Project of ADHS-Office of Border Health, Arizona Delegation-US Mexico and Border Health Commission
- Collaboration: Vertical and Horizontal
- Health Resource Guide Background
- Limitations of the questionnaire
- Future goals for the resource guide

Group Discussion:

- **How do you anticipate the guide will be used?**
 - ✓ Within the hospital the discharge planners will be able answer the questions of where to find resources
 - ✓ CDROM would also be useful within the hospital and small agencies with limited numbers of computers. Updating the information on the CDROM would also be easier and the CDROM can be down loaded on a number of computers so that multiple users can access instead of waiting for the resource guide
- **How will clients or community members use the guide?**
 - ✓ Social workers will use the resource guide to provide clients and community members with information
 - ✓ Suggestions to have in a community setting, so that community members have access to it: public libraries
 - ✓ Make it available on the website (PDF was also a suggestion) so that community members can access it at a public library

What sections did you feel were most important and what sections did you feel were not complete and needed additional information?

- ✓ Expansion on the programs within one agency

- ✓ INR should have been interfaced within the whole resource guide (the difference between the Information Network Resources and the Health Resource Guide is the Resource Guide augments the Border counties and reflects the Healthy Gente 2010 Objectives).
 - ✓ Centro Juvenile is a child serving agency that deals with the border cities but is housed in Mexico City
 - ✓ Expand the information provided within the target population
 - ✓ Add whether the agency is bilingual
 - ✓ Specify if the agency charges a flat fee, sliding scale, or accepts health care plans such as ACCCHS
 - ✓ It would also be useful to have it translated both in Spanish and English: flip side for each section
 - ✓ Wing Span is the group which captures all gay and lesbian groups...maybe use that as a main source and the rest will fall under
 - ✓ CPSA offices encompass state and county agencies for mental health services
- **How do you feel about the contact information?**
 - ✓ People change positions regularly, so it is better to only list a general phone number and email address for the agency.

Geo Mapping

- How would it enhance the resource guide and what information is needed to complete the geo mapping?
 - ✓ Use of demographic maps broken down by census
 - ✓ Use when talking about areas of need, penetration rate: all information is obtained out of rural areas
 - ✓ One would be able to enhance the representation of disease rates and help those who are more visual, which gives people a general idea or snap shot
 - ✓ No experience needed all one has to do is to type all information into the web database and get all of the census information
 - ✓ Geo-mapping to include: 1.) Health program location 2) Demographics and 3.) Disease rates (morbidity or mortality)
- Health agency promotion:
 - ✓ Use engagement strategies/incorporate populations not always used
 - ✓ Use of geo mapping with help agency staff visually locate for the community member where the resources are
- Use of maps that connect who is working with who?
 - ✓ People can become territorial and may not want to use it to help out
 - ✓ Binational - it would be more helpful to use geo mapping
 - ✓ There has been use of promotoras in binational settings
 - ✓ Recognition of informal relationships

Yvette M. Corral
BIDS Coordinator

Arizona-Sonora Health Inventory and Resource Guide
March 15, 2004: 1pm – 3pm
SEAHEC

Samantha Sabo: Returned Peace Corps Volunteer Fellow for Office of Border Health – Arizona
Sonora Health Resource Guide Coordinator

Ana Nevares: Outreach Coordinator -Arizona Delegation, USMBHC

Participants:

Esthela Navarro: Child and Family Resources, Inc. Healthy Families Program Director

Rosie Simpson: Platicamos Salud, Case Monitor

Karen Halverson: SEAHEC, Director

Jesus Kataura: SEAHEC, Program Coordinator

Ben Stepleton: Santa Cruz County Health Department, Environmental Health Director

Power Point Presentation: Samantha Sabo

- Project of ADHS-Office of Border Health, Arizona Delegation-US Mexico and Border Health Commission
- Collaboration: Vertical and Horizontal
- Health Resource Guide Background
- Limitations of the questionnaire
- Future goals for the resource guide

For your county, are the following sections organized in an easy to understand and/or logical manner?

A. Health Programs Description *Average rating = 7 (on a scale of 1-10)*

Comments:

- ✓ Health Programs should be listed by disease category instead of Program name
- ✓ Good description of services
- ✓ Too much information, repeated
- ✓ Fluidity, keeping it up to date, compared to INR book,
- ✓ Printed document may be intimidating

B. Glossary: *Average Rating= 7*

Comments

- ✓ Move the heading letters farther left
- ✓ Good information

C. Health Programs Index: *Average Rating =5*

Comments:

- ✓ Programs and phone numbers are repeated (mainly in miscellaneous section)
- ✓ List agency within specific category, then under agency list ALL programs and one phone number (This section was modified according to suggestions from focus group)

- ✓ CD-Rom: Cross-reference index information within document as to link the index with the specific agency. (This is now available as a feature in the CD-Rom version)

Language: is considered appropriate for agency, but is unclear as to how appropriate the language is for community members. Document is considered by one participant as not appropriate for both groups unless it is bilingual.

Group Discussion

How do you anticipate the guide will be used?

- ✓ Referencing Sonoran agencies for client referral
- ✓ Referring Snowbirds
- ✓ CD-Rom to be put on Local libraries, schools for community members

Which sections were most useful to your agency?

- ✓ Collaboration and funding not useful
- ✓ Sonoran contact information useful.

Which sections were most useful to your community?

- ✓ Bi-lingual sections
- ✓ Include sliding fee scale, free services (not available in this First Edition)
- ✓ Include services which are offered in Spanish

List agencies in your area, which are not included, but in your opinion should be?

1. Hospital
2. Human Resource Council
3. WIC
4. Borderland Food Banks
5. Senior Centers and food services for elderly
6. Volunteer Organizations
7. Medical Clinics
8. Friends of the Santa Cruz River
9. Santa Cruz Valley USD #35- STEPS along the Border and Abstinence Program
10. Tubac Medical Clinic
11. Nogales Medical Clinic
12. Bio Terrorism

Arizona-Sonora Health Inventory and Resource Guide
Community Focus Group
March 22, 2004: 1pm – 3pm
Café Molino

Samantha Sabo: Returned Peace Corps Volunteer Fellow for Office of Border Health – Arizona Sonora Health Resource Guide Coordinator

Ana Nevares: Outreach Coordinator -Arizona Delegation, USMBHC

Community Members: Included 12 men and women of various age groups, including the age ranges of; 20-30s, 40-50s and over 60. Participants were long time residents of the Ambos Nogales area. The focus group was conducted in Spanish at a local restaurant, providing a comfortable atmosphere for both the community members and interviewer. Community members were broken up into small groups according to their estimated age range. They were each given a copy of the Ambos Nogales section of the Health Resource Guide. The Ambos Nogales section includes, Nogales Arizona health resources and Nogales, Sonora health resources.

Participants were asked to review each section and indicate the following: 1) If they had heard of the service but never used it 2) If they or their family/friend had used the service. Or 3.) If they had never heard or seen any advertisement about the health service.

Community Groups were asked about the following health agencies servicing the Santa Cruz County:

- ✓ Boys and Girls Club
- ✓ Carondelet Health Network
- ✓ Department of Economic Security (CPS)
- ✓ Mariposa Community Health Center-Platicamos Salud
- ✓ Nogales Unified Public School District
- ✓ Santa Cruz County Department of Community Services
- ✓ SEAHEC
- ✓ St. Andrews Clinic
- ✓ The Way of the Heart: The Promotora Institute
- ✓ US Department of Agriculture

Results: Most community participants were unaware of many of the specific programs offered by local health and social service agencies. Although most participants had heard of the above-mentioned health agencies, many were surprised to know that these agencies offered many different types of health education promotion services. The most widely used health agencies were the programs offered by *Platicamos Salud* (Mariposa Community Health Center) and the Boys and Girls Club. Many participants wanted to keep the Ambos Nogales health resource section as to encourage friends and family members in both Sonora and Arizona to make contact with the available specific programs offered. Community participants were very excited to know that this resource guide would soon be available to them, as they feel that the local news, radio and printed news media has not been the most effective method of promoting these specific programs they felt they would use in the future.

How did you know about these programs or hear about them?

- Clinic referrals
- Family and friends who had used the service

Which programs or health topics are not represented in the Resource Guide, which you would like to know more about?

Health Topics

- Osteoporosis
- Arthritis
- Lupus
- Cancer (skin, colon)
- Screening
- Teen Pregnancy
- Depression/Mental Health
- Scholarships for college
- Anger Management

Health Programs

- SEABHS (in Santa Cruz County)
- Crossroads Mission
- Neurotics Anonymous
- CREDA Substance Abuse
- Gear Up Program
- Services Clubs (KIWANIS, Lions, Rotary)

How should the Health Resource Guide be made available to the general public?

- Public Library (hard copy and the CD-Rom version available on a Public Computer)
- Post Office (hard copy)
- Churches (hard copy and if a youth program with computer put CD-Rom on the Computer)
- Schools: School boards, School Counselors, Nursing
- Chamber of Commerce
- Services Clubs (KIWANIS, Lions, Rotary)

Arizona-Sonora Health Inventory and Resource Guide
March 18, 2004: 10pm – 12pm
Oficina de Salud Fronteriza CISAL

Samantha Sabo : Returned Peace Corps Volunteer Fellow for Office of Border Health – Arizona Sonora Health Resource Guide Coordinator

Ana Nevares: Outreach Coordinator -Arizona Delegation, USMBHC

Participants: A mix of 20 community and agency members with long time residence in Nogales Sonora. Governmental and non-governmental agencies were represented in the focus group. Apart from 3 community members, many long time government community health workers were also present.

Power Point Presentation (Spanish Version): Samantha Sabo

- Project of ADHS-Office of Border Health, Arizona Delegation-US Mexico and Border Health Commission History
- Collaboration: Vertical and Horizontal
- Health Resource Guide Background
- Limitations of the questionnaire
- Future goals for the resource guide

Focus Group Questions

How do you anticipate using the Health Resource Guide?

- Share experiences with other agencies and know more about what other agencies are doing.
- Refer and share information with community members
- It weighs to much
- Refer people across the line to services
- Help to organize Sonoran agencies. Through the resource guide agencies will become more accessible to agencies and the public they serve.

Which areas of the Health Resource Guide are the most useful to your agency?

- Need to know prices of services (this is not included in this First Version)
- Need to represent formal and informal community groups in the community as to increase contact and access to target populations.
- Spanish sections
- Would like to know the Community Groups formed already in the Colonias... names, cell phones or addresses of these community leaders of organized community members to help identify groups in the Colonia who are ready and willing to participate with Programs.

Which format would be the easiest to access the directory?

For your agency?

- ✓ CD-Rom for those that do not have access to internet
- ✓ Harcopy for those that do not have a computer
- ✓ CD-Rom can be put on a central computer to enable it's use
- ✓ Spanish is necessary

For your community members?

- ✓ Hard copy, but small hand held easily transportable
- ✓ This printed version is too big, needs to be smaller with information only, no need for project description
- ✓ Community Groups telephone numbers, address and/or names of leaders
- ✓ Spanish is necessary
- ✓ This will help us to know who exactly to talk with and what programs the agency can help with

Which health agencies or health programs are not included in the Resource Guide but should be?

- ✓ Civil Institutions
- ✓ Homeless Shelters
- ✓ Violence Against Women Centers
- ✓ Governmental and Non-governmental organizations
- ✓ Adolescent Health
- ✓ Service Organizations
- ✓ Asilos/Albergues

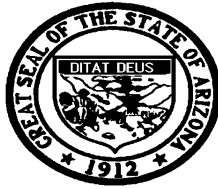

Acknowledgments

Publication of the Arizona-Sonora Health Resource Guide would not have been possible without the contributions of staff from the Arizona Department of Health Services –Office of Border Health, the Oficina de Salud Publica de la Frontera Sonora-Arizona and the U.S.- Mexico Border Health Commission Arizona Delegation.

Special thanks to the University of Arizona Mel & Enid Zuckerman College of Public Health Student interns, Samantha Sabo (Returned Peace Corps Fellow) and Carlos Moll; Cristina Mendoza and Yadira Noriega of the Oficina de Salud Pública de la Frontera Sonora-Arizona; Joseph Edelstein, Guadalupe Villaescusa, Nolvía Cortez and Melissa Murrieta.
