

## **AZ-PIERS Version 3**

### **Elite Platform System Requirements (client-side access) (version 3 compliant)**

#### **Supported Devices**

Desktop and laptop computers (see supported operating systems)

*Note: Any computer that currently runs ImageTrend EMS Field Bridge (as long as the software requirements are met), will support Elite. We recommend at least 4GB of RAM in this case.*

Apple/Android tablet devices:

iPad 3 - 9.7"

iPad 4 - 9.7"

iPad Air - 9.7"

iPad Air 2

iPad Mini – 7.9"

iPad Mini HD - 7.9"

Galaxy Tab Pro - 8.4"

Nexus 7 (2013)

Nexus 10

*Not supported: Kindle devices (software has security and functionality issues)*

Windows-based tablet devices:

Microsoft Surface

Motion R12

Panasonic Toughpad® FZ-G1

#### **Operating Systems Supported**

Android 4.0 or greater

Apple iOS7 or greater

Mac OS X

Windows 7 or greater

Windows 7 (all versions)

Windows RT

Windows 8/8.1 Standard

Windows 8/8.1 Pro

Windows 8/8.1 Enterprise

*See additional specific operating system capabilities below.*

#### **Operating Systems with Ability to Support EKG/Monitor Import Wizard**

*Note that these limitations are based upon limitations by the cardiac monitor software packages.*

Windows 7 (all versions)

Windows 8/8.1 Standard

Windows 8/8.1 Pro

Windows 8/8.1 Enterprise

#### **Supported Web Browsers**

Latest Chrome, Chrome Mobile, Safari, or Firefox browsers

IE 10 or greater (for mobile/field version)

IE 9 for Elite online EMS and Fire

*Not supported: IE 8 or lower*

#### **Printing Supported from Devices**

Tablets: The ability to print using a tablet device depends on whether the hardware (tablet) supports both the ability to display a PDF and print. There will be a print button in Elite Field, but it remains to be seen how/if an iPad or other devices can or will display a PDF that has the ability to print.

Windows-based computers and laptops will have the capability to print.
