**JUNE 2013
COCHISE COUNTY REPORT
ASTR 2011**

Prepared by:

Maureen Brophy, MPH

Vatsal Chikani, MPH

Rogelio Martinez, MPH

Data and Quality Assurance

Purpose:

The purpose of this report is to describe the incidence of trauma in Cochise County using the Arizona State Trauma Registry (ASTR). This information can be used to assist in the development and strengthening of injury prevention programs at the county level.

Methods:

In 2011, the Arizona State Trauma Registry (ASTR) received data from 23 state-designated trauma centers. Four additional healthcare institutions participated in the registry but were not designated. The Arizona EMS and Trauma System has eight Level I trauma centers - six located in the central county of Maricopa with 60 percent of the state's population; the remaining two Level I trauma centers are respectively located in the northern-most county of Coconino and the southern county of Pima. For the 2011 reporting year, there were 15 designated Level IV trauma centers dispersed primarily in the rural areas of the state. There are a total of 29,877 records in the ASTR for 2011.

Limitations:

Data is limited to participating agencies in the state. Information on patients that are transported out of Arizona will be missed as well as those seen at hospitals that are not participating. Injuries included in this registry are those which fit the [ASTR inclusion criteria](#). As such, injuries reported are more severe injuries, and therefore not a complete picture of injury in Cochise County.

Geo-Population:

Arizona is 400 miles long and 310 miles wide for a total area of 114,006 square miles. The topography of the state is 364 square miles of water and a blend of deserts, mountains, and plateaus. Arizona shares contiguous borders with the states of California, Colorado, Nevada, New Mexico, and Utah. Internationally, the Mexican states of Sonora, Chihuahua, and Baja California Norte share a border with Arizona.

The total reported population in 2011 was 6,438,178; this was up from the 2010 reported number of 6,392,017 residents ¹. In 2011, 84.1 percent of the population lived in urban counties (Maricopa, Pima, Pinal, and Yuma). The remaining counties (Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Santa Cruz, and Yavapai) were home to 15.9 percent of the population.

Additionally, Arizona has within its borders twenty-two (22) federally recognized American Indian tribes, comprising a 2011 collective population of 296,529, of which 162,119 (55 percent) reside on reservations and tribal lands.

Missing = 529

Statewide, there were 29,877 traumatic injuries seen at state designated trauma centers– a rate of 456 per 100,000 Arizona residents.

Cochise County makes up about two percent of the total population of Arizona. Injuries occurring in the county make up about 3.4 percent of the trauma cases from state designated trauma centers. The county-specific trauma rate, 773 per 100,000 county residents, is higher than the state average (Figure 3).

FIGURE 3: County-specific trauma rates per 100,000 residents

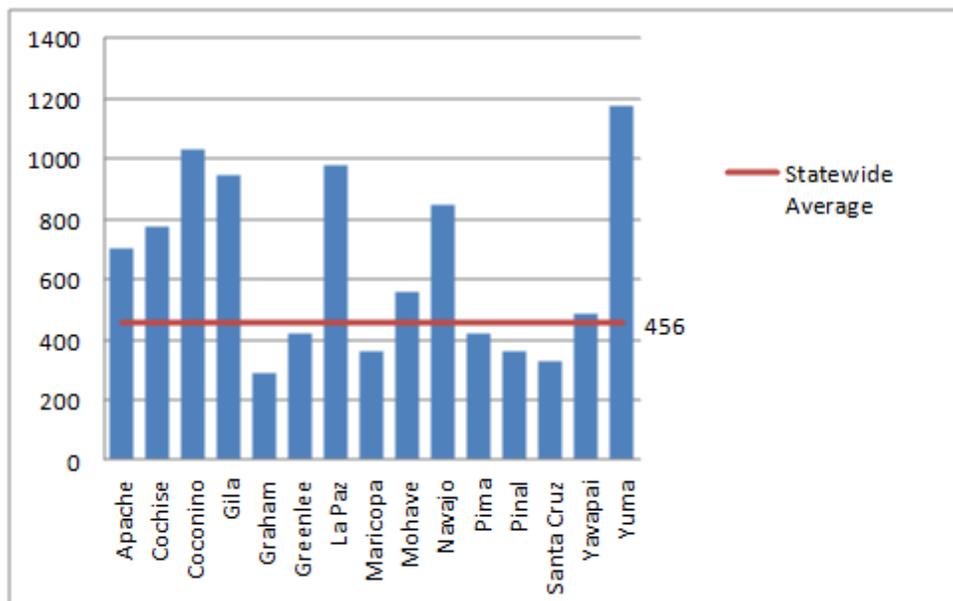

FIGURE 4: Frequency and rate of trauma by age, race/ethnicity, and gender in Cochise County

Group		Count	Percent	Rate per 100,000
Age	<1	*	*	*
	1-4	22	2.2%	324
	5-9	27	2.7%	332
	10-14	33	3.3%	403

	American Indian or Alaska Native	*	*	*
	Black or African American	18	1.8%	314
	Asian Pacific Islander	*	*	*
	Other	14	1.4%	.
Total		1,009	100	773

* 10 or fewer observations

The trauma rate is higher in Cochise County for all age groups except the 1-4 (Figure 4), as compared to the rest of the state. The highest trauma rate is among the >85 age group (3,114 traumatic injuries per 100,000 county residents).

FIGURE 5: Trauma rate per 100,000 residents by age

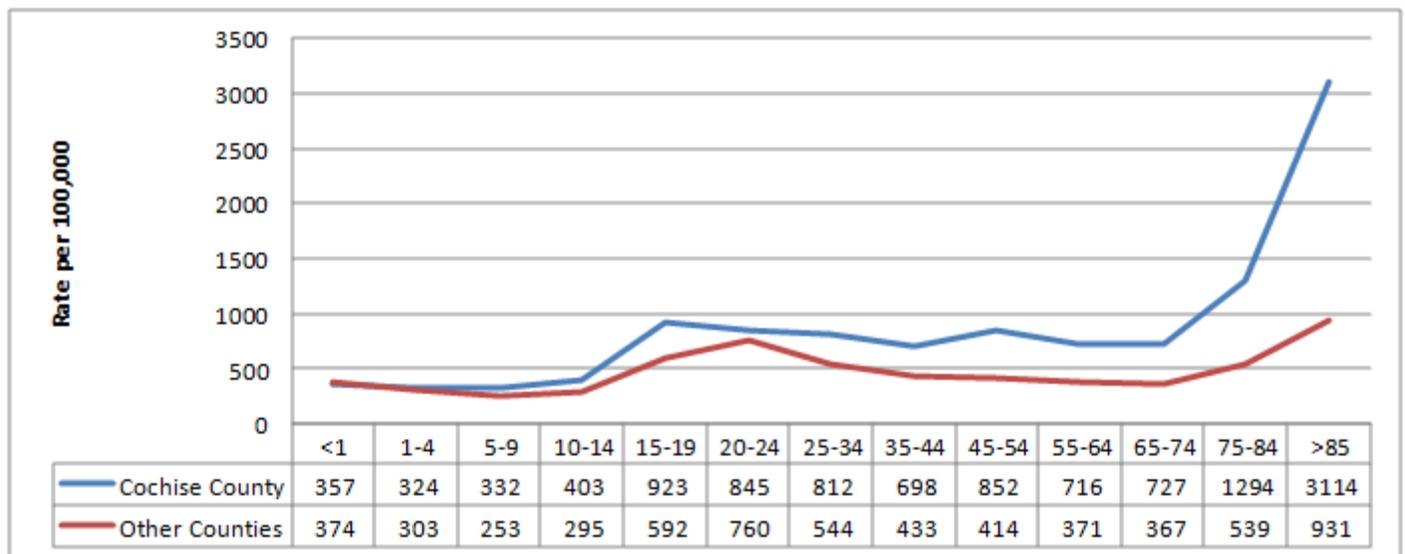

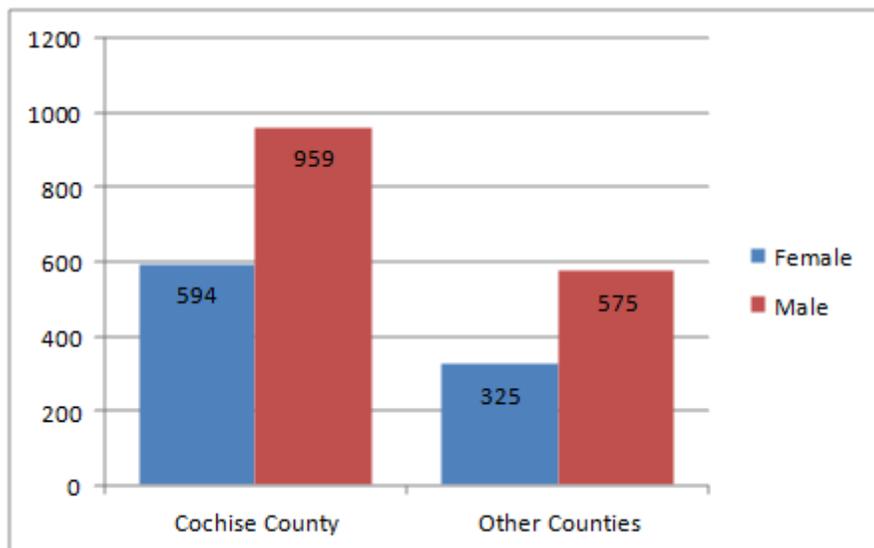

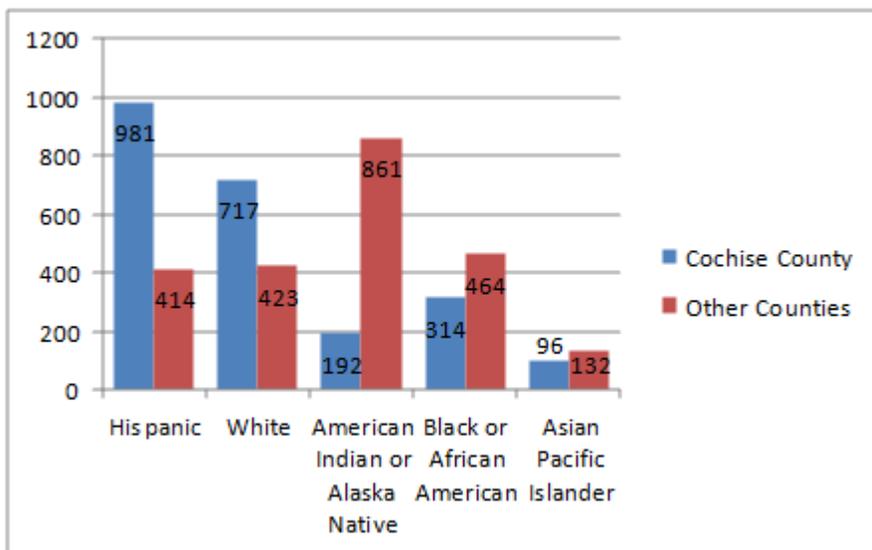

FIGURE 6: Trauma rate per 100,000 residents by gender

Both males and females in Cochise County have a higher rate of trauma than their counterparts in other counties (Figure 6).

FIGURE 7: Trauma rate per 100,000 residents by race/ethnicity

Hispanics and Whites in Cochise County have a higher trauma rate than in other counties (Figure 7).

FIGURE 8: Frequency of top causes of trauma in Cochise County

Cause	Count	Percent
Falls	372	36.9%
Motor Vehicle Traffic	296	29.3%
Struck by/Against	90	8.9%
Transport, other	68	6.7%
Cut/Pierce	37	3.7%
Other Trauma	146	14.5%
Total	1,009	100%

FIGURE 9: Top causes of trauma, rates per 100,000 residents

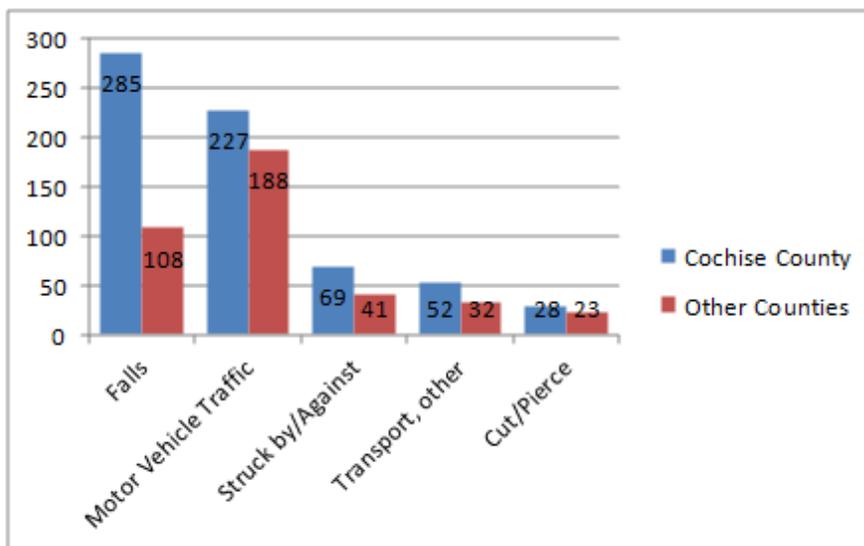

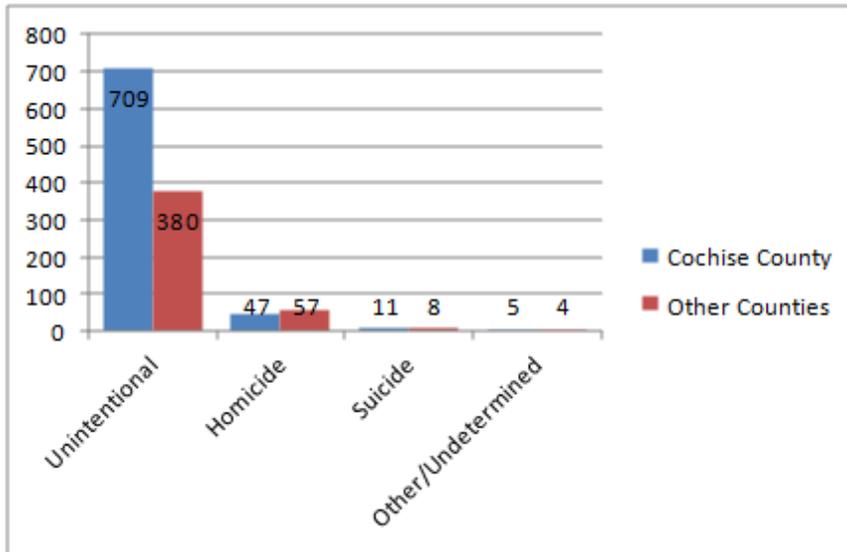

Figure 9 shows the top causes of traumatic injury in Cochise County, as compared with other counties (rates per 100,000).

FIGURE 10: Intention of trauma, rate per 100,000 residents

The rate of unintentional injuries in Cochise County are higher than in other Arizona counties (Figure 10).

FIGURE 11: Substance use in traumatic injuries in Cochise County

Documented alcohol and drug use was present in 6.4% and 4.2% of traumatic injuries in Cochise County, respectively (Figure 11).

Due to the large amount of missing data on drug and alcohol use, results on the proportion of traumatic injuries involving substance use are not conclusive.

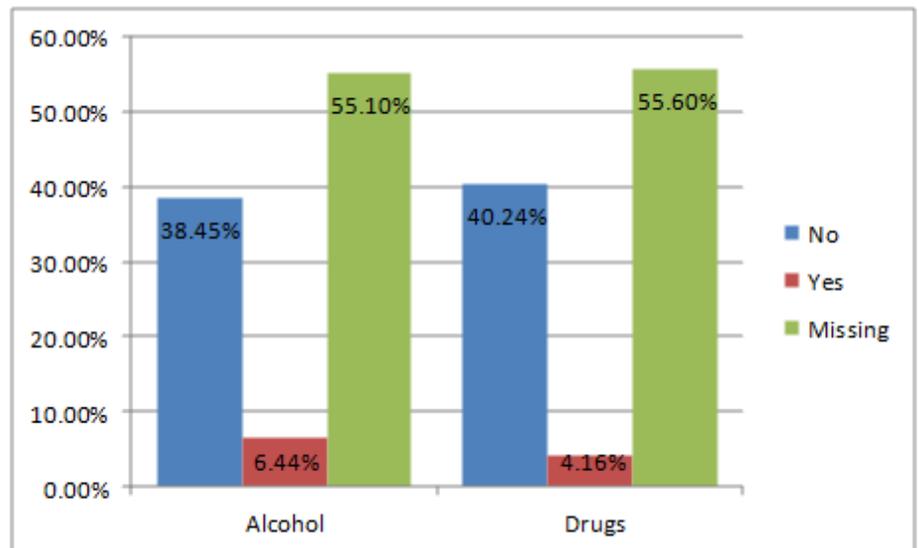

FIGURE 12: Frequency of substance use in traumatic injuries in Cochise County

Substance Use		Frequency	Percent
Alcohol	No	388	38.5%
	Yes	65	6.4%
	Missing	556	55.1%
	Total	1,009	100%
Drugs	No	406	40.2%
	Yes	42	4.2%
	Missing	561	55.6%
	Total	1,009	100%

FIGURE 13: Proportion of ground and air ambulance transports in Cochise County

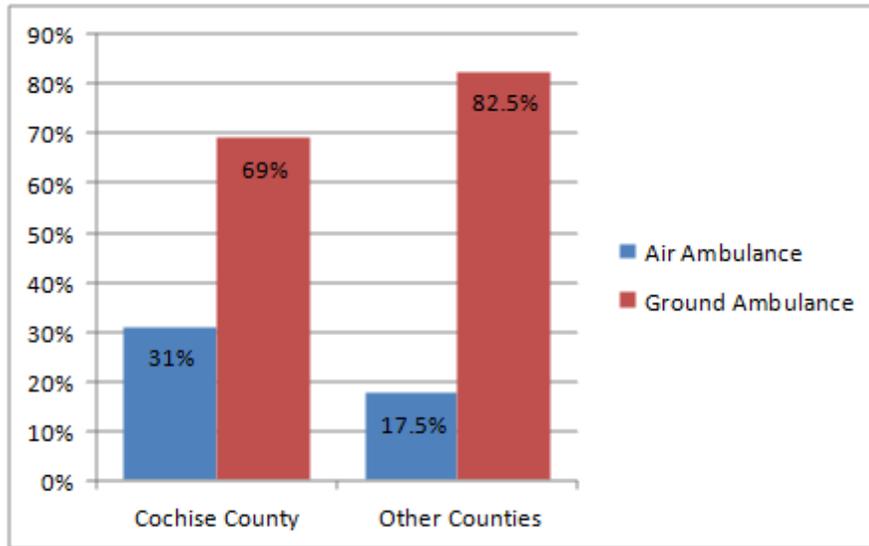

FIGURE 14: Count of ground and air ambulance transports

	Air	Ground	Other	Missing
Cochise County	261	580	166	2
Other Counties	4,312	20,263	3,651	642

FIGURE 15: Golden hour by transport type

The term “golden hour” refers to the hour immediately following traumatic injury. Theoretically, the chance of survival is highest when medical treatment to prevent irreversible internal damage is obtained within this time period.

Due to the large amount of missing data on golden hour, results on the proportion of patients arriving at the hospital within 1 hour are not conclusive.

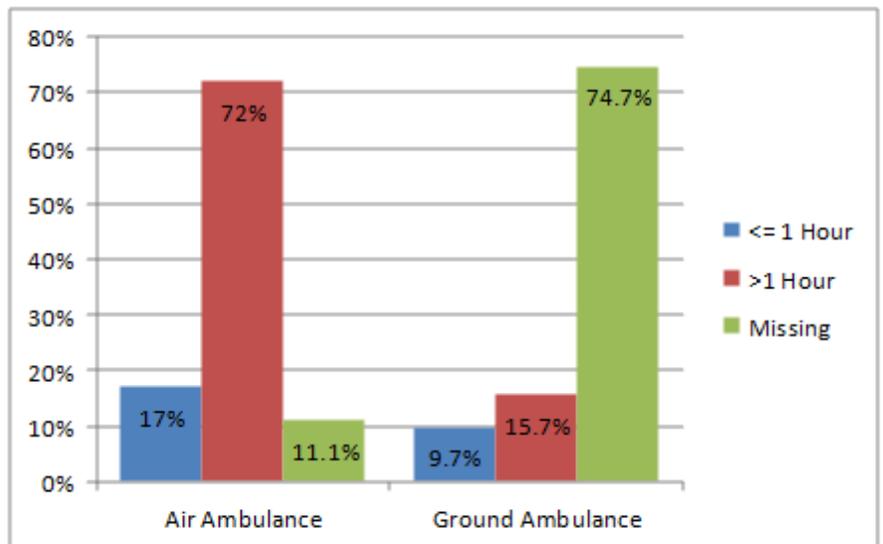

FIGURE 16: Count of golden hour by transport type to trauma center

Golden Hour	Air Ambulance		Ground Ambulance		Total	
	Count	Percent	Count	Percent	Count	Percent
<= 1 Hour	44	16.9%	56	9.7%	100	11.9%
> 1 Hour	188	72.0%	91	15.7%	279	33.2%
Missing	29	11.1%	433	74.6%	462	54.9%
Total	261	100%	580	100%	841	100%

FIGURE 17: Primary payer in Cochise County

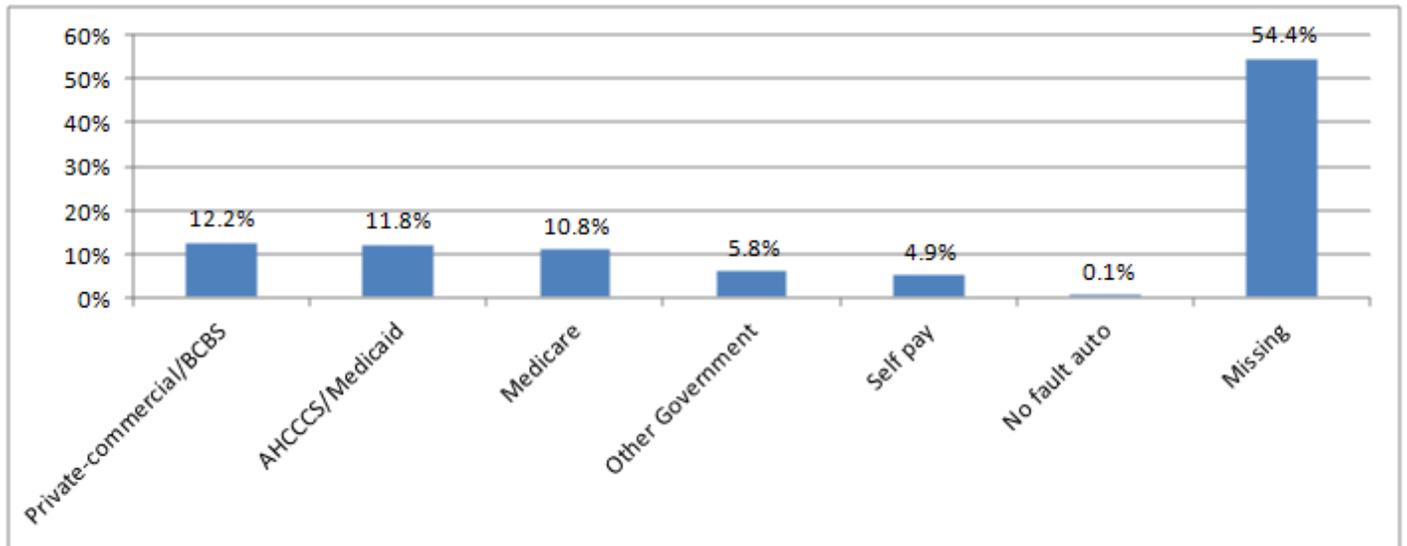

FIGURE 18: Count of primary payer in Cochise County

Primary Payer	Frequency	Percent
Private-commercial/BCBS	123	12.2%
AHCCCS/Medicaid	119	11.8%
Medicare	109	10.8%
Other Government	59	5.8%
Self pay	49	4.9%
No fault auto	1	0.1%
Missing	549	54.4%

Private-commercial/BCBS is the primary payment source for trauma-related hospital visits in Cochise County (Figures 17 & 18).

The median charge in Cochise County in 2011 was \$22,321 (Figure 19).

FIGURE 19: Charges & reimbursement by primary payer in Cochise County

Primary Payer	Total Charges	Median Charges	Total Reimbursement
Private-commercial/BCBS	\$5,277,341	\$22,640	\$861,739
AHCCCS/Medicaid	\$4,638,395	\$16,938	\$246,950
Medicare	\$5,042,147	\$26,720	\$935,345
Other Government	\$2,908,969	\$25,117	\$116,516
Self pay	\$2,041,162	\$18,616	\$15,666
No fault auto	\$82,919	\$82,919	\$0
Total	\$19,990,933	\$22,321	\$2,176,216
