

**ARIZONA DEPARTMENT OF HEALTH SERVICES  
BUREAU OF EMERGENCY MEDICAL SERVICES AND TRAUMA SYSTEM**

**JUNE 2013  
MOHAVE COUNTY REPORT  
ASTR 2011**

**Prepared by:  
Maureen Brophy, MPH  
Vatsal Chikani, MPH  
Rogelio Martinez, MPH**

**Data and Quality Assurance**

**Purpose:**

The purpose of this report is to describe the incidence of trauma in Mohave County using the Arizona State Trauma Registry (ASTR). This information can be used to assist in the development and strengthening of injury prevention programs at the county level.

**Methods:**

In 2011, the Arizona State Trauma Registry (ASTR) received data from 23 state-designated trauma centers. Four additional healthcare institutions participated in the registry but were not designated. The Arizona EMS and Trauma System has eight Level I trauma centers - six located in the central county of Maricopa with 60 percent of the state's population; the remaining two Level I trauma centers are respectively located in the northern-most county of Coconino and the southern county of Pima. For the 2011 reporting year, there were 15 designated Level IV trauma centers dispersed primarily in the rural areas of the state. There are a total of 29,877 records in the ASTR for 2011.

**Limitations:**

Data is limited to participating agencies in the state. Information on patients that are transported out of Arizona will be missed as well as those seen at hospitals that are not participating. Injuries included in this registry are those which fit the [ASTR inclusion criteria](#). As such, injuries reported are more severe injuries, and therefore not a complete picture of injury in Mohave County.

**Geo-Population:**

Arizona is 400 miles long and 310 miles wide for a total area of 114,006 square miles. The topography of the state is 364 square miles of water and a blend of deserts, mountains, and plateaus. Arizona shares contiguous borders with the states of California, Colorado, Nevada, New Mexico, and Utah. Internationally, the Mexican states of Sonora, Chihuahua, and Baja California Norte share a border with Arizona.

The total reported population in 2011 was 6,438,178; this was up from the 2010 reported number of 6,392,017 residents <sup>1</sup>. In 2011, 84.1 percent of the population lived in urban counties (Maricopa, Pima, Pinal, and Yuma). The remaining counties (Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Santa Cruz, and Yavapai) were home to 15.9 percent of the population.

Additionally, Arizona has within its borders twenty-two (22) federally recognized American Indian tribes, comprising a 2011 collective population of 296,529, of which 162,119 (55 percent) reside on reservations and tribal lands.

*Missing = 529*

Statewide, there were 29,877 traumatic injuries seen at state designated trauma centers– a rate of 456 per 100,000 Arizona residents.

Mohave County makes up about 3.1 percent of the total population of Arizona. Injuries occurring in the county make up 3.8 percent of the trauma cases from state designated trauma centers. The county-specific trauma rate, 561 per 100,000 county residents, is higher than the state average (Figure 3).

**FIGURE 3: County-specific trauma rates per 100,000 residents**

**FIGURE 4: Frequency and rate of trauma by age, race/ethnicity, and gender in Mohave County**

Group		Count	Percent	Rate per 100,000

	Other	28	2.5%	.
	<b>Total</b>	<b>1,124</b>	<b>100%</b>	<b>561</b>

\*10 or fewer observations

The trauma rate is higher in Mohave County for all age groups above 5 years (Figure 4), as compared to the rest of the state. The highest trauma rate is among the 85+ age group (1,835 traumatic injuries per 100,000 county residents).

**FIGURE 5: Trauma rate per 100,000 residents by age**

**FIGURE 6: Trauma rate per 100,000 residents by gender**

Both males and females in Mohave County have lower trauma rates than their counterparts in other counties (Figure 6).

**FIGURE 7: Trauma rate per 100,000 residents by race/ethnicity**

The trauma rate for White and Asian/Pacific Islander race/ethnicities is higher in Mohave County than in other counties (Figure 7).

**FIGURE 8: Frequency of top causes of trauma in Mohave County**

Cause	Count	Percent
Motor Vehicle Traffic	454	40.4%
Falls	362	32.2%
Transport, other	103	9.2%
Struck by/Against	69	6.1%
Cut/Pierce	23	2.0%
Other Trauma	113	10.1%
<b>Total</b>	<b>1,124</b>	<b>100%</b>

**FIGURE 9: Top causes of trauma, rates per 100,000 residents**

Figure 9 shows the top causes of traumatic injury in Mohave County, as compared with other counties (rates per 100,000).

**FIGURE 10: Intention of trauma, rate per 100,000 residents**

The rate of unintentional trauma is higher in Mohave County than in other Arizona counties (Figure 10).

Documented alcohol and drug use was present in 3.4% and 1.4% of traumatic injuries in Mohave County, respectively (Figure 11).

Due to the large amount of missing data on drug and alcohol use, results on the proportion of traumatic injuries involving substance use are not conclusive.

**FIGURE 11: Substance use in traumatic injuries in Mohave County**

**FIGURE 12: Frequency of substance use in traumatic injuries in Mohave County**

Substance Use		Frequency	Percent
Alcohol	No	408	36.3%
	Yes	38	3.4%
	Missing	678	60.3%
	Total	1,124	100%
Drugs	No	430	38.3%
	Yes	16	1.4%
	Missing	678	60.3%
	Total	1,124	100%

**FIGURE 13: Proportion of ground and air ambulance transports in Mohave County**

**FIGURE 14: Count of ground and air ambulance transports**

	Air	Ground	Other	Missing
Mohave County	28	731	365	0
Other Counties	4,545	20,112	3,452	115

The term “golden hour” refers to the hour immediately following traumatic injury. Theoretically, the chance of survival is highest when medical treatment to prevent irreversible internal damage is obtained within this time period.

Due to the large amount of missing data on golden hour, results on the proportion of patients arriving at the hospital within one hour are not conclusive.

**FIGURE 15: Golden hour by transport type**

**FIGURE 16: Count of golden hour by transport type to trauma center**

Golden Hour	Air Ambulance		Ground Ambulance		Total	
	Count	Percent	Count	Percent	Count	Percent
<= 1 Hour	0	0.0%	87	11.9%	87	11.5%
> 1 Hour	16	57.1%	293	40.1%	309	40.7%
Missing	12	42.9%	351	48.0%	363	47.8%
Total	28	100%	731	100%	759	100%

**FIGURE 17: Primary payer in Mohave County**

**FIGURE 18: Count of primary payer in Mohave County**

Primary Payer	Count	Percent
AHCCCS/Medicaid	112	10.0%
Private-commercial/BCBS	109	9.7%
No fault auto	107	9.5%
Self pay	51	4.5%
Medicare	45	4.0%
Workers Comp	17	1.5%
Other	2	0.2%
Missing	681	60.6%

AHCCCS/Medicaid is the primary payment source for trauma-related hospital visits in Mohave County (Figures 17 & 18).

Due to the large amount of missing data on primary payer, results are not conclusive.

The median charge in Mohave County in 2011 was \$9,853 (Figure 19).

**FIGURE 19: Charges & reimbursement by primary payer in Mohave County**

Primary Payer	Total Charges	Median Charges	Total Reimbursement
Self pay	\$549,405	\$10,106	\$2,805
AHCCCS/Medicaid	\$2,281,857	\$12,881	\$100,943
Private-commercial/BCBS	\$3,398,683	\$10,094	\$399,886
Medicare	\$1,001,629	\$17,655	\$71,742
Other	\$93,385	\$46,692	\$36,852
Workers Comp	\$524,726	\$4,996	\$22,604
No fault auto	\$1,743,703	\$7,438	\$147,395
<b>Total</b>	<b>\$9,593,388</b>	<b>\$9,853</b>	<b>\$782,228</b>
