Notes: Non-resident cases have been excluded. Only incident cases are reported. *E. coli* includes both *E. coli* O157:H7 and other Shiga-toxin positive *E. coli*. *Haemophilus influenzae* includes all invasive *H. influenzae*, not just meningitis, as of 1995. Cases reported with an unknown sex or unknown age were included in the total for each morbidity. Rates calculated for Streptococcus-Group B (invasive disease in infants <90 days old) represent the number of cases per 1000 live births; all other morbidities are per 100,000 Arizona residents in appropriate county, sex, race/ethnicity or age group. The denominators are based on 2009 population estimates as finalized 5-year age group by county census data is not yet available. In mid-2009, a large laboratory changed its reporting practices for coccidioidomycosis; reported coccidioidomycosis has been elevated since then.

*All cases of malaria were imported. There was no local transmission
