

# Reporting Administered Immunizations

Administered vaccinations are vaccinations that were administered by your practice. Vaccinations administered by your practice **must** be entered into ASIIS as an administered dose. This process will ensure that lot numbers are decremented from your inventory in ASIIS. To view, edit and add an administered vaccination, after selecting a patient, select **View/Add** from the **Vaccinations** tab located in the navigation bar.

To attach the administered vaccine information to the patient record click in the 'Manufacturer' text box or on the 'click to select' link to enter manufacturer information. This process will ensure that the Lot number is decremented from your inventory in ASIIS. The 'Select Lot Number' box will appear. The box will display all of the lot numbers that are listed in your ASIIS inventory for that particular vaccine. To attach the lot number to the patient, click the arrow next to the vaccine that was administered. If your inventory is not stored in ASIIS, the Select Lot Number pop-up box will be empty.

**VFC providers are required to attach the administered lot number information to the patient record.**
