DOUGLAS A. DUCEY, GOVERNOR
CARA M. CHRIST, MD, DIRECTOR

December 15, 2015

Dear VFC Provider,

As of December 15, 2015 the **Arizona VFC program is out of Fluzone® 1-dose 0.5mL syringes**. In addition, **Arizona VFC is almost out of FluLaval® 5.0 mL 10-dose vials**. The table below lists the influenza vaccine presentations (all quadrivalent) still available for AZ VFC providers to order through ASIIS:

Brandname	Age Range	Manufacturer	Packaging	NDC
Fluarix®	3 years through 18 years	GSK	10 pack - 1 dose 0.5mL syringes	58160-0903-52
FluLaval®	3 years through 18 years	GSK	5.0mL - 10 dose vial	19515-0898-11
FluMist®	2 years through 18 years	MedImmune	10 pack - 1 dose sprayer (Intranasal)	66019-0302-10
Fluzone®	3 years through 18 years	Sanofi	10 pack - 1 dose 0.5mL vials	49281-0415-10
Fluzone®	6 months through 18 years	Sanofi	5.0mL 10 dose vials	49281-0623-15
Fluzone®	6 months through 35 months	Sanofi	10 pack - 1 dose 0.25mL syringes	49281-0515-25

Please continue to place orders as needed for influenza vaccines. As always, prior to placing a vaccine order, temperature logs must be submitted to the Vaccine Center up to the day before the order is placed, and current VFC vaccine inventory must be reconciled in ASIIS.

As VFC inventory of influenza vaccines decreases the AZ Vaccine Center might need to implement the Arizona VFC Vaccine Choice Policy. This policy states that the AZ Vaccine Center will make every attempt to honor provider vaccine choice, but if a brand chosen by the provider is not available, AZ Vaccine Center staff may ship an alternative (but equivalent) vaccine. If no equivalent is available AZ Vaccine Center staff will contact your office. Please review the attached document for a more detailed description of the policy.

Please contact the Arizona Vaccine Center at 602-364-3642 if you have any questions.

Sincerely,

Lisa Underhill, MPA
Vaccine Center Manager
