

1. Users can now select Assessment History dates properly from the drop down list in the Assessment screen to view the data. Previously the Assessment History date in the Drop Down used to disappear and the user could not switch between assessment records.

2. High Risk Icon on the Care Plan tab is displaying correctly for clients that change categories.

3. Multiples food packages are displaying properly.
4. Breast pump icon is now working correctly.
5. Breast Pump Inventory History Page is sorted in descending order (most recent at the top) by Issue Date.

6. Other minor problems that do not affect your daily operations have been fixed.

Tips and Tricks:

The following Tips and Tricks will be added to the HANDS Landing page next week.

“For converted records, if a client is High Risk and there is no Nutritionist Referral, users may need to add a Nutritionist Referral in order to print checks. In this situation the error message is not very specific.”

“Currently the Food Instrument Issuance Report takes long time to load data. When running this Report, users should try to limit their search parameters to no more than a 7 day range.”
