Scene safety
Move patient to safe area

Establish adequate airway
C-spine precautions if indicated
High flow oxygen

Remove clothing
Prevent hypothermia

Cool the burn
Tepid water irrigation

Cover with dry dressing

BLS

Follow BLS Standards
Aggressive airway management if airway involved

IV Fluids
- LR 20 ml/kg bolus
  Repeat X2 for hypotension (SBP < 70+2X age in years)

Cardiac monitor

Consider analgesia
Morphine 0.05-0.1 mg/Kg IV

Transport to Burn Center

ALs

ABCD Assessment

Pediatric Burn Injury
