

Love and care
after shots

Your child has received a vaccine which may cause fever.

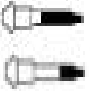

To prevent fever in your child:

- ♥ Give the recommended dose of Tylenol or acetaminophen every 4 to 6 hours. (see back side)
- ♥ It's **IMPORTANT** that you give extra fluids for the next 2 days:
 - ◆ Infants (bottle, breast milk)
 - ◆ Older children (water, juice, etc.)
- ♥ For additional information, refer to the individual vaccine sheets that you received during your clinic visit.

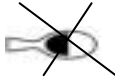

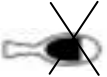

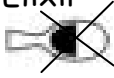

How much fever-reducing medicine (Tylenol, acetaminophen) should I give my child?

Dose of Acetaminophen is to be given every 4-6 hours by age or by weight.

<p>1-3 months 6-11 lbs. $\frac{1}{2}$ dropper infant drops</p> 	<p>4-11 months 12-17 lbs. 1 dropper infant drops</p> 	<p>12-23 months 18-23 lbs $1 \frac{1}{2}$ dropper infant drops or</p> 	<p>2-3 years 24-35 lbs. 2 chewable tablets (80 mg)</p> 	<p>4-5 years 36-47 lbs. 3 chewable tablets (80 mg)</p> 
	<p>$\frac{1}{2}$ teaspoon children's liquid</p> 	<p>$\frac{3}{4}$ teaspoon children's liquid</p> 	<p>1 teaspoon children's liquid</p> 	<p>$1 \frac{1}{2}$ teaspoon children's liquid</p> 

How much fever-reducing medicine (Motrin, ibuprofen) should I give my child?

Dose of ibuprofen is to be given every 6-8 hours by age or by weight.
