

Refrigerator/Freezer Temperature Log

Month/Year _____

Provider Name: _____

VFC Pin #: _____

Contact Person: _____

Telephone#: _____

Fax #: _____

Varicella in Freezer?: Yes No

Refrigerator needs to be +35° to 46° F (2° to 8° C). +40° F is the ideal temperature.
Freezer needs to be +5° F (-15° C) or colder for Varicella vaccine. 0° F or colder is ideal.

Time, Temperatures & Initials are to be recorded twice a day every business day. Once in the morning when you arrive, and again at the end of the day before you leave. Make sure you specify and circle below whether temperatures were taken in Fahrenheit or Celsius

* Diluent should not be stored in the refrigerator in case of freezing temperatures Store diluent in a drawer or shelf.

Call the Phoenix Office Immediately (602) 364-3642 If The Following Should Occur:

- If temperatures are out of range call for instructions.
- If you have a power failure, do not open refrigerator/freezer, call for instructions.
- You must give 3 months prior notice for vaccines which are about to expire, if not you will be billed.

Fax: (602) 364-3276
 Back Up Fax: (602) 364-3232

+++++If your office will be closed for more than 5 calendar days you will need to have someone be responsible for recording the temperatures or transfer the vaccines to another facility. +++++

TEMPERATURE LOGS MUST BE FAXED TO VACCINE CENTER MONTHLY – DO NOT MAIL
