Introduction

Welcome to Children's Rehabilitative Services (CRS). We are happy to serve you and your family. This *CRS Member Handbook* will help you learn how to get and use CRS services. It tells you what services are covered and what services are not covered. Please read this book carefully. It will help you to get the most out of your child/youth's CRS benefits. You may be a young person getting care, but since most people reading this are parents, we call the person receiving care your child/youth.

Language and Cultural Services

We want you and your child/youth to be happy with the CRS program. CRS wants you to understand the information given to you. If you:

- need help understanding English
- need a foreign language interpreter (a person who speaks other languages) to explain or restate your words
- need someone to sign for you
- are unable to hear clearly
- are unable to see very well
- are unable to read

If you want to know how to obtain this *CRS Member Handbook* or CRS information in:

- a different format or language
- if you need an interpreter
- if you need someone to read this book or other things to you,

please contact your CRS clinic or the CRSA Office (602) 542-1860 or 1 (800) 232-1676 at the Children's Information Center Hotline (*Ask for the CRS Program*) for help.

General Description of the CRS Program

“The mission of CRS is to improve the quality of life for children and youth by providing family-centered medical treatment, rehabilitation, and related support services to enrolled individuals who have certain medical, handicapping, or potentially handicapping conditions.”

CRS is a managed care program. The CRS program uses doctors, nurses and other healthcare people. These people are very skilled in caring for special health care needs. The CRS Clinics, doctors, and hospitals need to be used for CRS to pay. To join the program the child/youth must:

- have certain medical conditions or,
- have what could be disabling conditions,
- must meet age requirements,
- must be a U. S. citizen and a resident of Arizona.

People getting CRS services may have other medical insurance. It may be called Arizona Health Care Cost Containment System (AHCCCS). It may be with another health insurance plan. If your child/youth has other insurance, it will take care of your child/youth's basic health care needs. This basic care could include shots, colds, flu, earaches, sprains, etc. CRS will take care of your child/youth's CRS condition only. The CRS doctors and staff will talk with your child/youth's Primary Care Physician (PCP). This is to help your child/youth get all the things he or she needs. It is helpful if you talk to the PCP and the CRS Clinic when you need to find medical care.

Tips for Using Your CRS Program

One of the best things about CRS is that most of your child/youth's special care is given at one place. At the clinic there is a CRS health care team. It is made up of different types of people. The people on a team can be:

- you
- your child/youth
- doctors
- nurses
- social workers
- hearing specialists
- teachers
- physical therapists
- occupational therapists
- speech therapists
- child life specialist
- patient advocate
- students (in training)

Exactly who will be on your child/youth's team depends on their health needs. It is good for you to know who is on your child/youth's team. When you know who they are, you can call them at your CRS Clinic. If you want other people on the team they are welcome. This could be a social worker, a friend, or a Patient Advocate. This can be anyone that can help you get the care needed for your child/youth.

Your CRS Clinic has many doctors, nurses, and staff who speak other languages than English. The clinic locations and doctors are in a Provider Directory. This also is an address and phone book. You get this at your first clinic visit or any time you want a new one. It will show if a doctor speaks your language. If the doctor does not speak your language, the CRS Clinic can get a person called an interpreter for you. This can be for visits and on the phone. The directory of providers is free for anyone who wants one. You can get a directory at any time; just ask for one when you are at CRS. You can also call the CRS Clinic near you and ask them to mail you a provider directory. You can also get more information on the CRS webpage:

http://www.azdhs.gov/phs/ocshcn/crs/crs_az.htm

Please keep the clinic up to date on your address and phone number. If we do not have your correct address, you may not get important information from us. You can call the clinic if your address changes. If you move to another area of the state you may change your CRS Clinic. You can do this by talking to your Regional CRS Clinic (Phone and Addresses listed on page 2).

Fill out the “Important Information for my Child/Youth’s Care” form in the back of this Handbook. You can keep information about who is caring for your child/youth at the clinic.

How To Apply for CRS Services

Your child/youth’s regular doctor (PCP) needs to fill out a form. Copies of tests must come with the form. A medical health diagnosis must be on the form. CRS can also help you with filling it in. Anyone can send a child/youth to CRS. You can call the CRS Clinic near you (listed on page 2 of this handbook). You can also get a form at: http://www.azdhs.gov/pbs/ocshen/crs/crs_az.htm.

What is Covered

CRS provides and pays for the care of many health problems that are related to the CRS condition. Some of them may be:

- club feet
- birth defects
- some seizures
- some heart conditions
- hearing problems
- cerebral palsy
- cystic fibrosis
- spina bifida
- sickle cell anemia
- cleft lip and palate
- arthritis

Program Services

- wheelchairs without motors
- medical supplies
- home health services
- medicine
- therapy to help your child/youth use his/her legs and arms
- speech therapy to help your child/youth talk better
- treatment for eyes and ears (including corneal transplants)
- durable medical equipment (DME)
- hospital services
- only for some special conditions, dental and orthodontia (straightening teeth) services may be given
- some services may need to be given the ok to care for the CRS condition

Clinic Specialties:

Surgical

General pediatric surgery
Cardiovascular and thoracic
Ear, Nose and Throat (ENT)
Neurosurgery
Ophthalmology
Orthopedic (general, hand, scoliosis, amputee)
Plastic surgery

Dental

Dentistry
Orthodontia

Medical

Cardiology
Cystic Fibrosis
Neurology
Rheumatology
General Pediatrics
Genetics
Urology
Metabolic
Spinal Bifida
Cerebral Palsy
Neurofibromatosis

Services CRS Does Not Pay For

The CRS Program does not provide or pay for:

- new parts for your child/youth's inner ear
- services not for the CRS condition
- equipment to use only at school
- mobilizer walkers
- wheelchairs or scooters with motors

Money

Before your first visit, you need to talk to a CRS person called an "Enrollment Coordinator". They will tell you if you will have to pay. This will be done at the CRS Clinic. If you have health insurance(s), you will need to tell them and bring your cards to the appointments.

AHCCCS Members: If your child/youth is currently on AHCCCS, you need to bring:

- the child/youth's AHCCCS number (or AHCCCS ID card)
- an identification card (for you)
- guardianship papers (if applies)
- your insurance card (if you have other insurance AHCCCS is payer of last resort)

CRS checks every 6 to 12 months to see if your income changes. You need to tell CRS when your income changes. You also need to tell CRS when your medical insurance changes. You can do this by calling your CRS at the phone number on page 2 of this handbook.

Once your child/youth is part of CRS, you may have questions. If you want to know about paying for anything, talk to a Social Worker. The people at the clinic can tell you what you need to know to make decisions.

Co-Payments

If your child/youth is an AHCCCS member with or without other insurance, you will **not** have a co-payment. AHCCCS is the payer of last resort. Remember, if your child/youth has AHCCCS or any other insurance bring their member card to every CRS visit.

If your child/youth is not an AHCCCS member but has insurance you may be responsible for a co-payment. The payment cost may be on the insurance card. There may also be a co-payment for services if your child/youth has no insurance.

Member Services

This *CRS Member Handbook* tells you about some CRS policies. You can also call your CRS Clinic if you have questions. They can tell you about services or other policies and rules. If they are not helping or answering your questions, ask for a Patient Advocate. Your CRS Patient Advocate will help you:

- choose or change your CRS provider
- listen to your concerns
- help you make an appointment

The Patient Advocate and other Member Services staff are available free of charge Monday through Friday. The clinics are open from 8:00 a.m. until 5:00 p.m. The phone numbers and addresses for each CRS Clinic are listed on page 2 of this handbook.

Another place you can call or write to get answers to your questions about the CRS program is the Arizona Department of Health Services Office for Children with Special Health Care Needs (listed on page 2 of this handbook).

Member Rights

You and your child/youth have the right to:

1. Be treated with respect and dignity no matter your race, culture, country born in, gender (sex), age, health condition, sexual orientation, genetic information, ability to pay, or ability to speak English.
2. Receive care for your child/youth for their eligible conditions birth to 21 years.
3. Keep your child/youth's records and their health care private. You do not have to share with anyone you don't want to know about it.
4. Get information about the CRS doctors' and the staff education and work backgrounds as well as languages they speak.
5. Pick your CRS doctor from a list at the CRS Clinic. You also have the right to change doctors and go to another CRS Clinic.
6. Ask for second opinion from another CRS doctor.
7. Get services in a language you know. If you do not speak English very well, you can ask for an interpreter at anytime. You can also get information in sign language if you cannot hear. If you cannot read or see very well, you have the right to have someone read the information to you. This is free.

8. Look at, or get, a copy of your member health records. You can have something changed in the record if it is wrong, but you must ask to have this done.
9. Know about your child/youth's medical problems and what care is available. This way you can make decisions about health care.
10. Be told all your care choices and other types of care and how to get them.
11. Say you do or do not want any care for your child/youth. You will be told what will happen if you do or do not get care.
12. Be free from any form of punishment, restraint, or seclusion for making your choices, saying what you are thinking, or filing a complaint (or appeal).
13. Be told in writing of any big changes to your child/youth's health care services.
14. Ask and be told how much services will cost if CRS will not pay for them.
15. Ask and be told how CRS pays its doctors and other staff. You also can ask and be told how CRS pays its bills.
16. Get a copy of the results of the CRS Member Survey Report. You can find out what other people think about CRS services.
17. Be told in writing when CRS cuts, stops, or denies any health care service asked for by your doctor at the clinic. You must be told what to do if you do not like their decision. This can be called filing an appeal.
18. Have CRS staff explain how to solve complaints, concerns and how to file a grievance.
19. Tell CRS about any problems, or complain about any health care services, doctors or staff at CRS. You will not be treated badly because you complained.
20. To know about providers who speak languages other than English and how to get, for free, a directory of providers assigned to each CRS clinic to provide specialty services.

Member Responsibilities

You and your child/youth have the responsibility to:

1. Respect the doctors, the staff, and the other people who provide services to your child/youth.
2. Identify your child/youth as a CRS member BEFORE he or she gets any services.
3. Tell the CRS doctor if you do not understand your child/youth's condition or the plan for his/her treatment.
4. Tell the CRS doctors and nurses all about your child/youth's health including past problems or illnesses he or she has had, if your child/youth has been in the hospital, and all drugs and medicines that he or she takes.
5. Tell the CRS doctors and nurses if your child/youth has any changes in his/her health or medical condition.
6. Tell CRS Member Services and CRS staff about any other health insurance or monies you may have.

7. Keep your child/youth's CRS eligibility up-to-date. You must keep all of your CRS eligibility appointments, and tell your eligibility worker when anything that could affect your child/youth's eligibility changes in your family.
8. Know the name of your child/youth's CRS doctor(s) or primary nurse(s). Keep the doctor and clinic's name, address and telephone number where you can easily find it.
9. Take an active part in taking care of yourself and your child/youth's health. Take care of problems before they get bad. Give your child/youth medicine and follow treatments the way they are prescribed.
10. Make sure that you understand what the doctor told you before you leave your doctor's clinic.
11. Call and make your child/youth's appointments in time to avoid needing to go to an urgent care or emergency room for things you could get taken care of at the CRS Clinic.
12. Get to all of your child/youth's clinic appointments on time. Try and come 15 minutes before your child/youth's appointment time. Call the doctor's office before the appointment if you need to cancel or be late.
13. Bring your child/youth's shot records to all of his/her visits.
14. Please keep the PCP address and phone number current.
15. Tell CRS staff if you think someone is not being honest with you or you are feeling abused by a doctor, staff member or another CRS member.
16. Children and youth should take an active role in their own care to the best of their ability.

Clinic Appointments

Your child/youth needs to have an appointment to see a CRS provider. The clinic is a very busy place. Please call quickly to schedule a visit. When you call the clinic, be ready to tell the person on the phone:

- the name of your child/youth,
- that your child/youth is a CRS member, and
- the reason your child/youth needs the appointment.

If you think your child/youth needs to be seen sooner, please tell CRS why you think they need to be seen sooner. You can ask for a quicker appointment. It is always good for you to keep your child/youth's doctor appointments. Sometimes visits are made many months ahead, when they are, you will get a reminder letter. This is a good reason to let the clinic know when you move. The doctors want to see your child/youth at the time of the visit. Please show up at the clinic **at least 15 minutes before** the visit time and check in. The doctors see many members so please be on time.

Specialists

You may have a Primary Care Physician (PCP) assigned to you by your health plan/insurance. If you have a health care need(s) not related to your CRS condition and not covered by CRS, your PCP may have to give the ok (approve) if they want to send you to see a specialist. Your PCP's office will call the specialist and make an appointment for you, or they will refer you to the specialist so that you can make the appointment yourself for the non-CRS condition.

Canceling or Changing an Appointment

Please make an effort to keep your child/youth's visit. If you need help with getting to the visit, call the clinic or your health plan a few days in advance. If you need to let them know you won't be there or need to change a visit, try to call as soon as possible (at least two to three days in advance). If you do this, the clinic can schedule another child/youth who needs to be seen.

Waiting at the Clinic

Sometimes you might have to wait for a while at the clinic. This is because the doctor is seeing other patients. You should not have to wait more than 45 minutes. If you were on time to your appointment, and you feel that you had to wait more than 45 minutes, you may tell this to your CRS Patient Advocate.

If You Get a Bill

If you receive a bill for a covered service at a hospital, emergency room, or other facility, do not pay it. Call the place or person who sent you the bill. Tell them that your child/youth is a CRS member. If you get a bill after you have talked to the provider, call your CRS Patient Advocate for help.

You may ask for a non-covered CRS service and agree in writing to pay for it before your child/youth gets the service. Remember to tell providers that your child/youth is a CRS member before you get services.

Behavioral Health Services

Behavioral health services can help your child/youth with things like sadness, stress, and drug and alcohol issues. These services can help people to think, feel, and act in healthy ways. Let the CRS staff know if you think your child/youth needs this help. They can see a CRS psychologist or psychiatrist. Anyone can get emergency and crisis intervention services. If your child/youth needs more than 3 CRS visits with a psychologist or psychiatrist, CRS may help you get care in the community.

You can also talk to your child/youth's doctor or primary health plan. If your child/youth is having a problem and you think that he or she might hurt himself /herself or someone else and could lead to death, **call 911 right away**. Also call if they are yelling or moving and can't stop, won't answer when called and touched, or are acting in a way that scares you.

Arizona has Regional Behavioral Health Authorities (RBHA) that give these services. All AHCCCS/KidsCare (Title XIX and XXI members) are eligible for behavioral health services and can refer themselves (they do not need a referral). If you have AHCCCS, you can talk to a person called a Behavioral Health Coordinator for your plan. The coordinator can give you information so you can learn how to get services. Your CRS Patient Advocate has the names and phone numbers of the AHCCCS Behavioral Health Coordinators. They can help you find out what type of care your child/youth is eligible for. They will also know where you can get it. Everyone can get Behavioral Health Services in a crisis or emergency. If you have questions about what is covered or how to reach the RBHA, you can call your CRS Clinic (Phone number on Page 1 of this handbook). If it is not an emergency, call your local RBHA to set up a visit. If you have other insurance, AHCCCS is the payer of last resort.

Crisis Services respond to any request for services. The Crisis Staff respond to people at risk for harming themselves or others. Crisis Services are available to anyone regardless of ability to pay. An example of a crisis is:

- You need to talk to someone because you are feeling “out of control” of your behaviors and are thinking of different ways, when and/or how to kill yourself.

24 HOUR CRISIS PHONE NUMBERS AVAILABLE FOR EVERYONE:

You are not alone-24 hours a day, 7 days a week; the crisis line is there for you. Talk to a counselor right now and get help. This is free and for everyone:

- Maricopa County, **1-602-222-9444 or 1-800-631-1314**

What To Do In Case Of An Emergency

An emergency is when something happens and someone is hurt very badly. You may think he/she needs to get help right away or they may die. **If you think it is an emergency dial 911. If you do not think it is an emergency call your CRS doctor or your PCP.**

Tell the people at the Emergency Room (ER) that the child/youth is in CRS. If your child/youth is going to get care for an illness that is not a CRS condition, tell the person the name of your insurance provider.

Emergencies related to the CRS condition do not need to be approved. After being cared for at the Emergency Room (ER) your child/youth may have to go to (be moved to) a CRS hospital for more care. If you have any concerns or questions about CRS after getting ER care, you can call your CRS Clinic. When you call to get a time to see someone at CRS, tell them that your child/youth went to the ER. When you go to the visit, be sure to tell the CRS person about anything the ER told you to do or medicine they gave your child/youth.

How to Get Help Getting to Your Visits

Your health plans may pay for and help you with a ride to your CRS visits. Giving you a way to get to CRS is not a service CRS pays for (except from one CRS clinic to another). CRS will help and work with your health plan to set up any needed rides. This is for children/youth with CRS who do not have a way to get to the visit. You should try to use your own car, a bus, or get a ride with a friend. If you can't, call your AHCCCS Health Plan a week before your child/youth's visit.

Emergency Transportation

If you think your child/youth needs an ambulance and may die if they do not get one, **call 911 immediately**. If you are unsure, call your child/youth's PCP and do what they tell you.

If You Move

If you move out of Arizona tell your CRS Program. Your CRS Program can help you get services where you move.

Advance Directives

If you are 18 or older and your own guardian, you have the right to tell doctors how you want to be cared for if you are too ill to tell them yourself. An advance directive is a written document. It lets your doctor care for you if you are not able to make decisions. The document would tell doctors the kind of care you want if you have an illness that may not get better. It will also tell them what you want done if you are not awake or in a coma. This will tell the doctor the care you do not want. The directive can say that you want a certain care no matter how sick you are. The CRS clinics know about this and they have the forms. You can also get more information or forms at www.azsos.gov/adv_dir. CRS can be put it in your medical record(s). If you want to talk to someone about this, ask your doctor or someone at CRS.

If you have an advance directive and believe that the health care you are getting is not what you want, you can call the state and let them know:

Arizona Department of Health Services, Office for Children with Special Health Care Needs, Children's Rehabilitative Services, Member Services at (602) 542-1860 or 1-800-232-1676.

Grievances (Complaints)

CRS follows federal and state laws. Call, write, or visit your CRS Patient Advocate if you have any questions, problems or complaints about:

- the clinic
- your child/youth's health care benefits or services
- your child/youth's doctor
- other health care staff
- any type of problem with your CRS services.

If there is something you do not like, CRS wants to know about it. The Patient Advocate will do everything to help you. It means a lot to us to know if you are worried or not happy. We will try to help with what you do not like. We want to do this very quickly. But, sometimes this may take a little longer to solve. We will make sure the problems are resolved in 90 days. The phone numbers and addresses to contact are listed on Page 2.

CRS Approval and Denial Process

Sometimes, what you ask for has to be approved by CRS. The clinic uses a process called 'prior authorization.' The things you ask for will be looked at and CRS will let you know if it is ok for you to get the service. This is based on your child/youth's condition and your CRS benefits. If CRS denies your child/youth a service, cuts back a service, or stops a service, someone from the clinic will mail you a letter telling you why they made their decision. If services have already started and are going to be changed, the letter will be mailed to you at least 10 days before your services are changed (except in cases of fraud, if you move out of state, or ask to stop the service).

Appeals and Requests for Hearing

If you do not agree with a CRS decision/action, you have the right to an appeal. An appeal asks CRS to have a different doctor make another review of the denial decision. You may appeal if CRS:

- does not approve a service, including the type or level of service that was asked for by your child/youth's doctor
- reduces, suspends (stops for a short time), or totally stops a service that has already been approved
- fails to provide services in a reasonable time
- fails to act within a required time (14 days from date of request for services)

If you are asking for things that have already started and are now being stopped, you can ask to keep them while you are going through the appeal. You may have to pay for what you get during the appeal time if the decision does not change. If you want to keep your child/youth's services during the appeal, you have to ask this in 10 days after getting the letter from CRS telling you about the service change.

To file an appeal, you need to follow the directions in the letter you get from CRS. This is the letter that said you could not get the service(s). You have to “file” or make an official “appeal” in 60 days from when the action happened. A doctor can do this for you, if you give written permission. To get help filing the official “appeal” you can call your CRS Patient Advocate. As part of the process, you can ask to see your child/youth’s medical records and all things related to the decision to change or stop the service. You can also give things/papers to CRS that you think will help make the decision a yes. You can ask to give the things yourself or you can mail them. You can learn more about the appeal process. Talk to the Patient Advocate at your CRS Clinic.

There Are Two Kinds Of Appeals:

One is called a *Standard Appeal*. This can take 14 days for CRS to make a decision. Some times it takes 14 more days. This is called an extension and can happen if it is needed. The extension can only happen if it is in the best interest of your child/youth. You also can ask for an extension.

The other appeal, which happens faster, is called an *Expedited Appeal*. This appeal happens when CRS or a doctor helping you tells us that waiting for a standard appeal decision would put your child/youth’s health at risk. Expedited appeals have to be decided in 3 workdays. Whether or not an expedited appeal can be filed depends on the medical status and what is being requested. If you ask for an expedited appeal, but do not meet the rules for it, CRS will notify you. CRS will then follow the “standard appeal” process.

CRS will mail you a letter when they make the decision about your appeal. If you do not think they made the right decision, you can ask for a state fair hearing. This means that someone not with CRS will look at the case. The directions for filing for a state fair hearing are in the letter from CRS. If you want a hearing and you are an AHCCCS member, you must tell or write the CRS Clinic within 30 days of receiving the appeal decision letter. If you are not an AHCCCS member, you must tell CRS Administration in 30 days of receiving the appeal decision letter. You can ask your CRS Patient Advocate for help in asking for a state fair hearing. AHCCCS or CRSA will tell you the date, time, and where you need to go for the hearing.

Family Support Groups and Community Services:

1. CRS Parent Action Council

The Parent Action Council (PAC) is a group of parents, and CRS staff. They provide input to the Arizona Department of Health Services (ADHS), CRS Clinics, and for providers on how they think care could be improved. The Council is a place where parents can talk to each other. They can share ideas and resources to make the clinic better. If you would like to attend a meeting at the clinic or become involved in the activities, please contact a Patient Advocate at:

Phoenix: (602) 406-6460 or (602) 406-3060

Tucson: (520) 324-3224

Flagstaff: (928) 773-2054

Yuma: (928) 336-7294 or (928) 336-1621

2. Raising Special Kids & Pilot Parents of Southern Arizona

Raising Special Kids in Northern and Central Arizona and Pilot Parents of Southern Arizona are groups that give information, training, and materials to help families of child/youth with disabilities and special health care needs. They also match new families with more experienced parents. This is done through their parent-to-parent program. They send out newsletters that give helpful hints, explain laws, and list workshops open to parents. They also have books and information. All services and materials are free. If you want to find out more, please call them.

3. Information and Referral Services

Families with children/youth who have special needs also can call a statewide toll-free number. This number will help you locate resources in your community. The Child Information Center Hotline number is 1-800-232-1676. For the hearing impaired, there is a State Telecommunication Device (TDD) at 1-800-367-8939.

Fraud and Abuse

If you know someone who is cheating on his/her AHCCCS eligibility application, or a provider who may be committing fraud, please call (602) 417-4193 or 1-888-ITS NOT OK (1-888-487-6686).

What is Fraud and Abuse?

There are different kinds of abuse. It can be about money. It could be a provider charging for a service they gave to you but you did not need. It could also be people trying to get medical services for free that are not covered benefits. Another kind of abuse is hurting someone.

You do not have to tell them your name when you report a suspected case of fraud or abuse.

An example of provider fraud is a provider sending a bill to charge for services that they know they did not do. An example of member fraud is a member letting someone use his or her AHCCCS ID card when they know it is wrong. Another example is a CRS parent who lies to CRS about his/her child/youth not having other insurance.

To Report Suspected Fraud and Abuse

Individuals or Providers:

To complete an online form to report Fraud, Waste or Abuse, please go to the web address at: www.ahcccs.state.az.us and click on the link: **REPORTING FRAUD AND ABUSE**

AHCCCS,
801 E. Jefferson
Phoenix, AZ 85034
(602) 417-4193 or 1-888-ITS NOT OK (1-888-487-6686).

Services According to the Law

All services by the Arizona Department of Health Services are without prejudice or bias for:

- disabilities/handicaps,
- race or color,
- religion,
- sex (gender), or
- national origin (ethnic background).

The CRS Program follows federal laws such as:

- the Rehabilitation Act of 1973
- Title VI of the Civil Rights Act of 1964
- the Age Discrimination Act of 1975
- Titles II and III of the Americans with Disabilities Act
- the Department's Civil Rights and Section 504
- Federal Immigration and Nationality Act

Health Information

It is good for the parents to keep track of their child/youth's health history. Parents should also write down anything the doctors, nurses, therapists, and other staff tells them to do. The medical record is kept private. No information can be given from it unless the child/youth or legal guardian says that it is ok in writing. All medical records are protected through Federal legislation, known as the Health Insurance Portability and Accountability Act (HIPAA). Records from other health providers must be sent directly from that provider.

Information for My Child/Youth's Care

My child/youth's diagnosis: _____

My child/youth's medical record number: _____

Doctor(s): _____

Nurse(s): _____

Therapist(s): _____

Social Worker(s): _____

Patient Advocate: _____

Child Life Specialist: _____

Clinic Administrator: _____

Clinic Phone Number: _____

Other: _____

We hope that this handbook is helpful to you. We welcome your advice or any thoughts you have to make things better.
