

**Synopsis:**

During the previous week, respiratory syncytial virus (RSV) activity increased in Arizona.

**RSV activity highlights:**

- 98 laboratory-confirmed cases of RSV were reported last week; 419 laboratory-confirmed cases of RSV were reported during the 2009-2010 season.
- 10 counties reported lab-confirmed cases of RSV during the previous week; 11 of 15 counties reported lab-confirmed cases of RSV during the 2009-2010 season.
- The cases included in this report only reflect laboratory-confirmed cases that have been reported to the health department. There may be additional cases in the community that have not been tested.
- Data in this report are provisional and may change as more reports are received.

**Laboratory-Confirmed RSV Activity by Season [2006-2010]:**

Positive influenza tests are reported to ADHS. These include many types of test (rapid tests, DFA, culture, etc.).

### Lab-Confirmed RSV Cases Reported by County:

Since October 2004, laboratories have been required to report positive RSV tests to ADHS.

County	Number of Laboratory-Confirmed Cases
