

Synopsis:

During the previous three weeks, respiratory syncytial virus (RSV) activity remained sporadic in Arizona as cases of RSV were reported in seven counties.

RSV activity highlights:

- 1 laboratory-confirmed case of RSV was reported in the previous week; 14 laboratory-confirmed cases of RSV were reported during the 2009-2010 season.
- The cases included here only reflected laboratory-confirmed cases that have been reported to the health department. There may be additional cases in the community that have not been tested.
- Data in this report are provisional and may change as more reports are received.

Laboratory-Confirmed RSV Activity by Season [2006-2010]:

Positive influenza tests are reported to ADHS. These include many types of test (rapid tests, DFA, culture, etc.).

Lab-Confirmed RSV Cases Reported by County:

Since October 2004, laboratories have been required to report positive RSV tests to ADHS.

County	Number of Laboratory-Confirmed Cases
