

**Synopsis:**

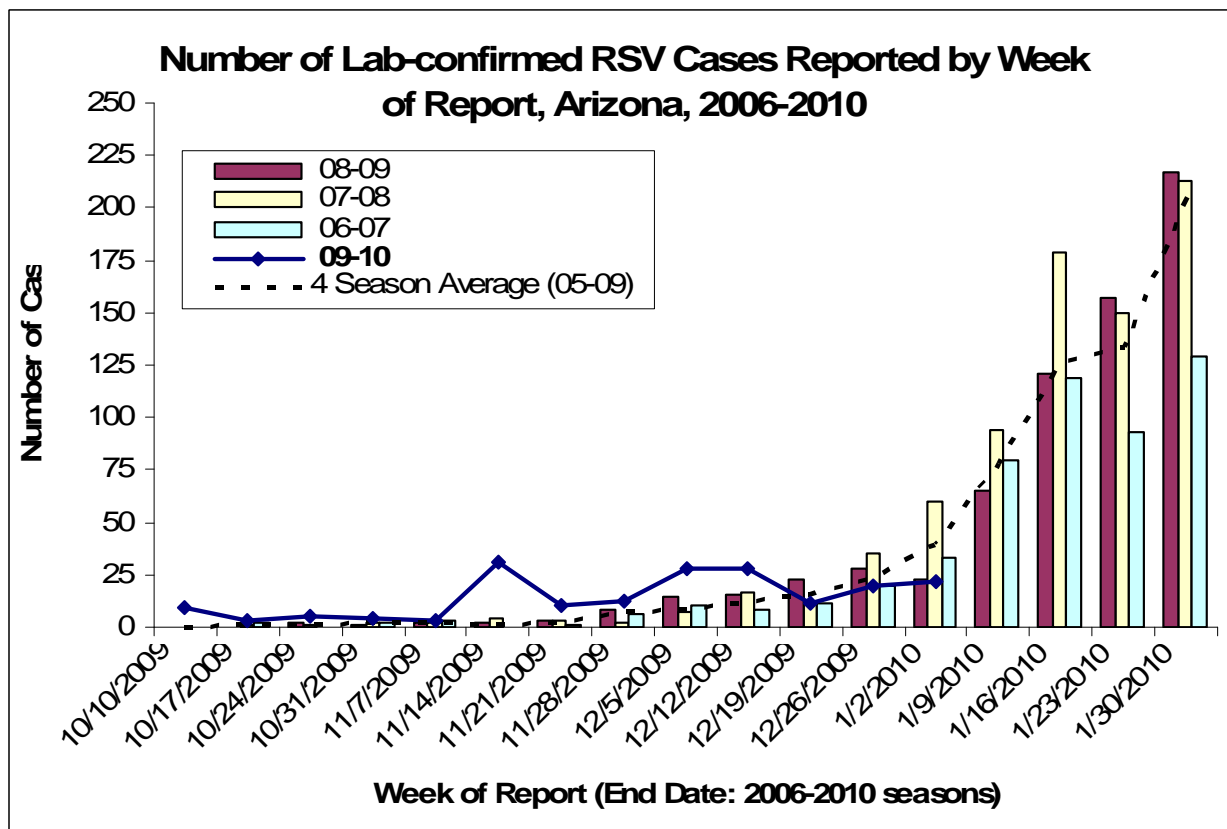

During the previous week, respiratory syncytial virus (RSV) activity remained constant in Arizona.

**RSV activity highlights:**

- 22 laboratory-confirmed cases of RSV were reported last week; 198 laboratory-confirmed cases of RSV were reported during the 2009-2010 season.
- 6 counties (Apache, Maricopa, Mohave, Pima, Pinal, and Yavapai) reported lab-confirmed cases of RSV during the previous week; 10 of 15 counties reported lab-confirmed cases of RSV during the 2009-2010 season.
- The cases included here only reflected laboratory-confirmed cases that have been reported to the health department. There may be additional cases in the community that have not been tested.
- Data in this report are provisional and may change as more reports are received.

**Laboratory-Confirmed RSV Activity by Season [2006-2010]:**

Positive influenza tests are reported to ADHS. These include many types of test (rapid tests, DFA, culture, etc.).

## Lab-Confirmed RSV Cases Reported by County:

Since October 2004, laboratories have been required to report positive RSV tests to ADHS.

County	Number of Laboratory-Confirmed Cases		
	2009-2010 Season	Last Week	Last 3 Weeks
Apache	2	1	1
Cochise	2	0	1
Coconino	8	0	0
Gila	0	0	0
Graham	1	0	0
