Notes: Non-resident cases have been excluded. Only incident cases are reported. *E. coli* 0157:H7, *Streptococcus* -Group B (invasive disease in infants <90 days old), *Streptococcus pneumoniae*, *Vibrio* spp., VRE and Yersiniosis became reportable in 1997. *E.coli* includes both *E.coli* 0157:H7 and Shiga-toxin positive *E.coli*. *Streptococcus pneumoniae* was only reportable by laboratories until Oct. 2004. *Haemophilus influenzae* type b includes all invasive *H. influenzae* type b, not just meningitis, as of 1995. Meningococcal includes all invasive disease caused by *Neisseria meningitidis*, not just meningitis. *Salmonella* Paratyphi A, *Salmonella* paratyphi B, and *Salmonella* paratyphi C have been reported separately from other *Salmonella* spp. beginning in 1997. Animal Rabies cases are not included. Hepatitis D has been reported separately from Hepatitis non-A non-B since 1997. Hepatitis E has been reported separately from Hepatitis non-A non-B beginning in 1998. Cases reported with an unknown sex or unknown age were added into the total for each morbidity. Rates calculated for *Streptococcus*-Group B (invasive disease in infants <90 days old) represent the number of cases per 1000 live births; all other morbidities are per 100,000 Arizona residents in appropriate county, sex, or age group.
