¹ Data are provisional and reflect case reports to Arizona Department of Health Services during this period.

² These counts reflect the year reported or tested and not the date infected.

³ Influenza is lab-confirmed only and represents "season-to-date" cases (counting starts in October) rather than year-to-date. Influenza was not reportable before Oct. 2004

⁴ Shiga-toxin producing *E. coli* was reportable only as *E. coli* O157:H7 before October, 2004.

⁵ MRSA was not reportable before October, 2004.

⁶ Based on animals submitted for rabies testing.

⁷ In June, 2009, a large commercial laboratory changed its reporting practices for coccidioidomycosis. Reported coccidioidomycosis has been elevated since then.
