**Notes:** Non-resident cases have been excluded. Only incident cases are reported. *E. coli* includes both *E. coli* O157:H7 and other Shiga-toxin positive *E. coli*. *Haemophilus influenzae* includes all invasive *H. influenzae*, not just meningitis, as of 1995. Meningococcal includes all invasive disease caused by *Neisseria meningitidis*, not just meningitis. Cases reported with an unknown sex or unknown age were added into the total for each morbidity. Rates calculated for Streptococcus-Group B (invasive disease in infants <90 days old) represent the number of cases per 1000 live births; all other morbidities are per 100,000 Arizona residents in appropriate county, sex, race/ethnicity or age group.
