2nd Largest County in US
18,652 square miles
Rabies in Coconino County

Confirmed Rabid Animals from October 2008 to April 2009 most in the City of Flagstaff:

- **17** Gray foxes
- **6** Stripe skunks
- **1** Ringtail cat

Total of **24** animals have tested positive

(Pending test results - 4 gray foxes)

- **2008** – **7** animals tested +
- **2007** – **7** animals tested +
Exposures

- 1 human was attacked by a fox and exposed
- 8 people were “chased” by 7 foxes and 1 skunk
- 7 dogs (vaccinated) exposed to animals that tested + and are going through 45 day quarantines
Location of Exposures

- Urban trail system around Flagstaff
Residential Areas & a City Park
Testing

- Human and pet exposures: suspect animals are tested at State Lab using Direct Fluorescent Ab (DFA)
- Non-exposures: suspect animals are tested by USDA using direct rapid immunohistochemical test (dRIT)
County Response to Rabies Epizootic

- Activated Health Department Incident Command System (ICS)
- Provided media outreach
- Health Director sent declaration for 90 day quarantine to Board of Supervisors (BOS)
- Quarantine went into effect on April 8, 2009
Quarantine was Initiated

Why?

- People and pets had been attacked by rabid animals on popular hiking trails around Flagstaff, in a city park, and in front of their homes.
- Currently, allowing licensed pest control companies to trap foxes & skunks that are taken to Humane Association for euthanasia and possible testing.
Quarantine Area: 1 mile around + sites
Rabies epizootic in Flagstaff concentrated in Foxglenn residential area

19 skunks tested +

Action Taken:

Trapped-vaccinated-released skunks
2009 Oral Rabies Vaccine (ORV) Project Proposal

- Request for emergency funding sent to USDA for ORV – still waiting
- Must compete with other states
- Hopefully will receive before 90 day quarantine is up – Why? Keep pets from eating ORV
- If we do not receive funding, then will try using county funds

(Note: 2006 USDA study in Flagstaff showed that ORV does not work on skunks – insufficient Ab development)
ORV Proposed Dispersal

- Flagstaff area – by hand
- National Forest Service - aerial
County Partners

- Special thanks to:
  - ADHS
  - USDA
  - AZ Game & Fish
  - City of Flagstaff
  - Humane Association
