The Department conducts an on-site initial inspection of each facility as part of the substantive review for issuing a license. To avoid delays in obtaining a license, please ensure the facility is in compliance with ALL regulations that govern Adult Residential Care Institutions before scheduling an inspection. It is the applicant's responsibility to review, comprehend, and demonstrate substantial compliance with all regulations that govern the facility. The Department and the Department's surveyors are NOT permitted to provide consultation services.

Please note the following when preparing for an on-site initial inspection:

- Policies and procedures must be applicable to the health care institution's class/subclass.
- · A policy must be the intentions of the facility and the procedure must be how the facility will implement their intentions.
- Writing the page number of each policy and procedure next to the applicable rule may accelerate the on-site substantive review process.
- The facility must have a sample form for all documents required by rule.
- The facility must have complete personnel records for all required staff along with a tentative work schedule.
- The facility's premises must not have environmental safety issues and must be sufficient to accommodate the services in the scope of services.
