# Hourly Vaccine Temperature Log

To be used at non-traditional vaccination sites during outbreak response. Monitor and record current, MIN, and MAX temperatures on this form every hour.

**VFC/VFA PIN**

**Facility Name** (as entered in ASIIS)

---

## Instructions

Review transport job aids for refrigerated and frozen vaccines before transporting vaccines.

### Check Temperatures Hourly.

Refrigerated vaccine safe temperature ranges are

- **36° to 46° Fahrenheit**
- **2° to 8° Celsius**

If the temperature goes out of range at any time, do the following:

1. Do not use doses exposed to out of range temperatures.
2. Post “Do not use vaccines” sign.
3. Alert the on-site supervisor.
4. Ensure the data logger probe is still in place next to the vaccine and recording.
5. Store vaccines under proper conditions as quickly as possible.
6. Contact the AIPO as soon as possible.
