

Coconino and Yavapai County Oral Health Coalition

- Coalition was formed in 2004
- Serves the Coconino and Yavapai Counties
- Vision Statement: The vision of the North Central regions of Yavapai and Coconino Counties is to reduce oral disease in children of all ages.
- Mission Statement: The mission of the region is to establish "dental homes" for underserved children via utilization of expanded dental teams. The regional coalitions seek to increase affiliated practice partnerships by engaging agencies and individuals tasked with improving oral health care in an effort to promote enhanced dental teams.

The coalition values collaboration with oral health partners and early childhood advocates in the region. The coalition recognizes the value of ongoing oral health programs in the region and strongly embraces input from both the public and private sector.

- Key members/partnerships:
